A Newspaper Sensation. Collingwood, Sept. 25.-A big sensa

tion was created in this vicinity a cou-ple of weeks ago by the Collingwood Bulletin's account of the case of Mr. Valentine Fisher, who has been cured of sciatica of nearly thirteen years' standing, by Dodd's kidney pills. Everyone who talks with Mr. Fisher is speedily convinced that his was a maryellous using remedies for rheumatism, sciatica, dropsy or other diseases, but fail to obtain relief, because they do not attack the seat of the disease, which is many of such cases, the kidneys. Anyone who loubts the efficacy of Dodd's kidney pills may soon be convinced by writing to Mr. Fisher himself, or Wm. Williams Esq., Principal of the Collingwood Collegiate Institute, Capt. F. A. Bassett, or A. H. Johnston, Esq. all of whom are

Hello! Hello central! Hello! Give me Markdale please? For Sale.

Hello, is that Markdalo? A large lot with computable dwelling house on Mill St. bespetiful equition. Enquire a I want to ask if you know that great ump maker there?

O yes, overybody knows Artley the ump maker for miles around here. Is that the fellow who drives the rds, he drives a span of mules so people will know him better. [When

they see the nules they say, there's the noted pump maker coming. Exactly; we see him driving past here wo or three times a week and would like to know where he takes them all

Yes.

Well you see it is just this way, Art ley's pumps have gained a wide reputation. Where one goes more is sure to follow. They are now scattered through the six townships viz: Euphrasia, Holland, Glenelg, Artemesia, Proton and Isprey, with a few even beyond that. Well tell me, why are his pumps so

universally praised and admired? O that is easily explained. You see Artley is a natural genius, as well as a practical mechanic, consequently his pumps are made in a superior workmanlike manner. Some people have an idea that any body can make a pump. So long as it will lift water. In a sense that may be frue. You can make a pump by nailing a few boards together, but it is another thing to make a pump

to work easy and be durable. I notice in lasts week's STANDARD that he has been making some improvements in his pumps. Can you tell me soulcthing about them. Woll, I haven't time to explain it all

to you hero. You willfunderstand that that the head and the cylinder are the two important parts in a pump. He has made some important improvements in the head which you should see for yourself. He now lines the cylinder of his wood pump with a brass shell, which makes them a great deal easier to work. They will also last much longer as the cylinder is generally the first part to give out in a pump. Is there an thing more you want to ask? No, that will do this time. Thanks. Good bye. Ly .
