The wheat markets are weak. Man toba grades are lower owing to big yield. Sales at 80c for No. 1 hard, To Earnings of Canadian Pacific for th last week of August were \$539,000, an in crease of \$8,000 as compared with corres

ponding week of last year. Canadian securities are fairly active and very strong. Cable is firm, with in-dications of going higher. A quarterly dividend of 1 34 per cent. has just been

Sales of wool, which averaged over 10,000,000 pounds per week when great speculative stocks were being taken, have shrunk to 5,380,500 for the yeek, against 7,557,800 for the same week in 1892.

. The visible supply of wheat in the United States and Canada is 35,440,000 bushels, an increase of 350,000 bushels for the week. A year ago the visible was 66,484,000 bushels, and two years ago 56,881,000 bushels. There were 42 failures in the Dominio

There were 42 failures in the Dominion last week, as against 43 the previous week, and 40 in the corresponding week of a year ago. Ontario leads with 21, being half the total for the week, eighteen of whom had our lowest credit or blank rating. Quebec had fifteen, an increase of one over the previous week. Nova Scotia had three, Pritish Columbia two and New Brunswick one. In Prince Edward Island and Manitoba none were reported lagtweek. R. G. Ding & Co. weekly week. R. G. Dun & Co.'s weekly review of trade in the United States says: There is no real reaction in business. Gains which were recognized as temporary are vanishing, but there remains a decided

vanishing, but there remains a decided increase over last year at this date, although prices average \$.3 per cent. lower than a year ago. It needs no keen observed to see that the fraction against a rapid advance is strong.

Cotton is strong, but has paused. The general ten ency to surtail purchases where prices have notably advanced grows clearer in boots and shoes, in wool and in some products of iron. The combinations have again advanced prices of har iron \$2 per tent and of wire nail 20 per keg, while Bessemer is quoted at \$17. Peat Putsburg, and castern manufacture from imported ore has again commenced to supply western consumers.

The Days of Slavery. Who tells me the days of slavery past? There are other kinds than that of the negro. We are more or less slayes to some habits and under bondage to them as surely as ever human being was to a human taskmaser; not always habits that show plainly like drinking; smoking, swearing, but hidden ones perhaps known only to ourselves. Procrastimation has a hold on me; an inclination to plan faster than I can accomplish, and put by till some future time, until at last I find that future packed, stacked and crowded so that I are ed and crowded so that I am at my wits' end what to do and what not. Again, I am a slive to impulse. I incline to drop what I am doing at the first desire to do some other thing, which at times gets me into trouble: something that should have been finished is not. d I am reminded of my mother's re-rk many years ago: "Your bump of mark many years ago: "Your bump of stick-to-it-ivenes is very small and will some day get you into trouble.". Let us look within and see what slave holders we can destroy and thus help to make this world brighter and better.

A dinner party in the suburbs one evening last week was brought to a summary ending by the entrance of a large sized bat into the room, which swooped down over the table, causing such a seattering of the fair sex, including the host ss, as an earthquake could scarcely have accomplished. The innocent cause all this disturbance sought refuge in the upper folds of the window draper s, whence it was impossible to dislode f, and as the ladies persistenly refused o return to the dining room while the ntruder held possession there the remining courses were served informall in the library to the scornful amusemen of the men. One of the latter is report ed as saying, "And yet women consider themselves our equals and want to vote!

following terms to a letter he has received criticising the recent actions of his department as to the mixing of wheat:—
"With regard to the postponement of the decision as to the vexed question of mixing, I have only to say that the department has to consider the interests of the producers, and of those who invest their capital in moving the Western crop, as well · Geneva's Great Fountain. The fountain that the municipality of Geneva has recently established at the entrance of the port of that city is certainly the largest fountain that exists upon the surface of the globe, since it is no less than 300 feet in hight. It may be seen from a great distance in clear weather, detaching itself like a great sail flapping through the effect of the wind. as those of the eastern millers, who mally

gicat sail napping through the effect of the wind.

The city of Geneva possesses a most complete distribution of water under pressure, the motive power for which is obtained from an artificial fall established upon the Rhone at the point of the lake. The water for domestic purposes and for the running of certain motors is raised to a height of 215 feet above the level of the lake. For the distribution of motive force it is raised to a height of 460 feet. The reservoir is an open air one, and is situated upon the top of Bessingers, at a distance of three miles from the turbine building. A very ingenious regulator, invented by Mr. Turrettini, assures the uniformity of pressure in the piping.

in European markets, our methods must be assimilated to those of the controlling apport markets. If we initiate restrictive legislation which does not prevail there, will not our products seek a foreign route to the sea rather than submit to the exactions demanded when shipped from our town porty? by Mr. Turrettini, assures the uniformity of pressure in the piping.

The length of the first pipe line is about forty miles, and that of the second about sixty. It is with the latter that the fountain conduit is connected. The latter is set in play only on Sundays. It is sometimes set in operation also on week days, in the evening. Instead of a single jet of great height, several are then utilized that do not rise so high. Powerful dectric light projectors, placed in a structure near by, brightly illuminate them with their rays of varied colors, which transform them into a luminous fountain of the most beautiful aspect. Several despatches passed between Ot-tawa and St. John's Mid., regarding the seisures on the coast of the Canadian Lab-rador. The information which the Govern-ment reserved from a leading to the Covernador. The information which also were defined from a leading Newfoundland firm confirmed in part the press despatches regarding the estimes. Is is asserted the Captain Howard, who was appeared the Captain Howard, who was appeared the Captain Howard, who was appeared to the captain Howard with the captain Howard with the captain Howard with the captain Howard was a presented to the captain Howard with the captain Howard was a presented to the capt

no island colony, but in the absence of the precise details it is impossible to determine whether or not the seigure was justified. The opinion in official circles is that if Capt. Howard has taken advantage of a mere technicality, he has done what is nothing short of a blunder. So far no word has been received from him, only the other side of the case is to hand.

To-day the owners of the vessels wired the Department of Customs giarranteeing the payment of any fine that may have been incurred, and they were immediately notified by the Customs Department that the release of the vessels had been ordered. It appears that the hero'of the Gatling gun has acquired important interest in the locality. He has gone extensively into the lobster fishing and banning business, and consequently some critics see interested ing of Wheat-Controller Wood Ex-Ottawa, Sept. 6.—Professor E. Stone Wiggins, who predicted the great storm that passed over the Atlantic and Pacific in March, 1888, predicts a storm of equal lobster fishing and canning business, and consequently some ortice see interested motives in the supposed attempt to harrass the fishermen, but the Newfoundlanders are after cood, whereas Howard is interested in the lobster. It is also stated that this official team A medical section. violence between the 17th and 21st of the present month. Asked to-day his reasons for predicting the storm of 1888 and the for predicting the storm of 1888 and the one he promises us for this month, the professor said:—"My reasons were these: The sun and moon were in the same are of right ascension, almost in the same spot in the heavens, and were near the celestial equator, and at the moment when our Norhern Pacific was turned towards the sun. Their united force was increased by the moon's perigee being at her nearest orbital point to the earth. Furthermore the was in conjunction with Venus on interested in the lobster. It is also stated that this official is an American difficen. This is equally erroneous, for Howard was naturalized sometime before his appointment, otherwise he could not have been appointed. It is worthy of mention, however, that he receives no calary save his share of the selzures which he lawfully makes. nakes. Howard is under the supervision of the Customs officer at Quebec, but in the present instance has been lordered to report direct to the department the particulars of the selzures, and to release the vessule she was in conjunction with Venus on March 5th, with Mercury on March 6th and with Mars on March 7th On looking

over calculations of the March storm, of 1883, made in September, 1883, I find ref-erence to a sister storm on September 21st, 1895, twelve years afterwards. On the 18th 1895, twelster storm on September 2185, twelster storm and severe of 1895, twelster storm and 1895, twelster storm and 1895, twelster storm and 1895, twelster storm will pass over the sun's disc a few degrees west of San Francisco, causing a solar college, the moon horself being in perigee, and two hours later on the celestial equator, Mars and Venus.will both be in conjunction with her on that day. A great storm will therefore sweep the shores of all the continues from the equator to the poles as early as the 17th inst., but on the east coast of North America will treach its ell-max with high tides by the afternoon of Saturday, 21st inst. There is danger of yolcanic, upheavals on the meridian of Japan and of earthquakes in South America and Mexico."

Grades of wheat.

The following grades of wheat.

The following grades of wheat.

The following grades of wheat. Grades of Wheat,

The following grades of wheat have been established by Order-in-Council:—

Spring wheat, extra Manitoba hard wheat, shall consist wholly of wheat grown in Manitoba or the North-West Territories of Canada, and shall be composed of at least eighty-five per cent. of hard wheat; No. 1 Manitoba hard wheat shall consist wholly of wheat grown in Manitoba or the North-West Territories of Canada, and shall be composed of at least two-thirds of hard wo first two-thirds of hard cod fyfe wheat.

No. 2 Manitoba hard wheat shall consist wholly of wheat grown in Manitoba or the North-West Territories of Canada, and shall be sound and well eleaned, weighing not less than sixty pounds to the tushel, and shall be composed of at least two-thirds of hard rod fyfe wheat.

No. 2 Manitoba hard wheat shall consist wholly of wheat grown in Manitoba or the North-West Territories of Canada, and shall be sound and roasonably plean, weighing not less than fifty-eight pounds to the two-thirds of hard red fyfe wheat two-thirds of hard roasonably plean, weighing not less than fifty-eight pounds to the two-thirds of hard red fyfe wheat Government has no lands in the West to sell in blocks. The policy is to place the land freely at the disposal of actual setters, and honce is unfavorable to speculation. It is possible, however, that a deal will be made with the Canadian Pacific arrivay, which has land for sale in the ilway, which

The horse stolen was five years old, about 15 hands high, and weight about 1,000 pounds, black mane and tail, enough to be graded as No 2, weighing not less than fifty-six pounds to the bushel.

Rejected spring wheat shall comprise all wheat for warehousing, but too low in weight or otherwise unfit to be graded as with white spot on each hind foot betwee the fetlock and hoof, and never was shod.

The buggy was an old open one of a dark

A STRANGE BURIAL.

No Minister Being Handy in Phonograph Service Was Held.
One of the most novel funeral ser-Goose wheat No. 1 shall be plump and mons on record was preached the other day at Coney Island. Baby Burr was day at Coney Island. Baby Burr was interent months old and weighed twenty-two pounds when she died. She was exhibited in a little tent. She took pneumonia and died a few days ago. When the funeral day came there was no minister; So a religious phonograph with a huge trumpet was projected over the coffin. An extra "loud needle" was used and the voice from the machine, as clear as a bell penetrated to all parts of the room. Those who attended the funeral sat with bowed heads and never looked up as the lylinders were changed. Had a Goese wheat No. 3 shall comprise such as is not good enough to be graded as No. 2, reasonably clean, and wellghing not less than lifty-five pounds to the bushel. Winter wheat, extra white winter wheat, shall be pure white winter wheat, shall be pure white winter wheat, choice in color, sould, plann and well cleaned, welghing not less than sixty-two pounds to the bushel. the bushet No. 1 white winter wheat shall be pure winto winter wheat, sound, plump well cleaned, weighing not less than sixty pounds to the bushel. as the rylinders were changed. Had a stranger been listening at the door he would have thought that a minister No. 2 white winter wheat shall be white No. 2 whith winter wheat shall be winter wheat sound and reasonably clean, wilghing not less than 58 pounds to the bushel.

No. 1 red winer wheat shall be pure red winter wheat, sound, plump and well shaded, wolghing not less than 62 pounds abound of the familiar words a changed words which respectively. The sound of the familiar words a changed words with a sound of the familiar words a changed words and the changed words a changed words a changed words a changed words which haves thought that at minister words with the change words which haves thought that at minister words were the changed words which have the changed words with the changed words with the changed words were the changed words with the chan cleaned, weighing not less than 62 pounds to the bushel.

At the sound of the familiar words a spirit of calm seemed to come into the room. Then a shrill voice, unlike the winter wheat, sound and reasonably clean, weighing not less than 60 pounds to the bushel.

No. 1 mixed winter wheat shall be white and red winter wheat mixed, sound, plump and well cleaned, weighing not less than 62 pounds to the bushel.

No. 2 mixed winter wheat shall be white and red winter wheat mixed, sound, plump and well cleaned, weighing not less than 50 pounds to the bushel.

No. 3 winter wheat shall include winter wheat not clean and plump enough to be gradel as No. 3, weighing not less than 57 pounds to the bushel. dy away to its last resting pla

old Gravesend Cemetery. Her Train of Thought. Masculine Voice (from first floor, which is the one above me)—"Elmira, my dear, Elmira! Do I not perceive a strange odor as of something burning emanating from the regions of the cook room?" Feminine Voice (from nowhere in iparticular—"Ah, yes, Won't you just come down and remove the dinner from the fire and send for something to cat? I am writing an article for the Sanitary Era on the chemistry of food and the modes of preparing it, and I wish you wouldn't interrupt my train of thoughts." Live Stock Notes.

as those of the eastern millers, who usely use but a trilling proportion of the growth of Manitoba wheat, and who last year, I am credibly informed (except in one case, which happened through inadvertonce), did not receive a single bushel of wheat from the Port Arthur elevators. Apart from the case alluded to, every bushel was either exported or purchased direct from Port Arthur elevators as 'cleaned wheat'. It is important also to determine what Summer is the time to get hene in condition for fall and winter laying. Most of those that were prolific layers in spring will not want to set, but this should not be allowed. Hill off all the roosters, and begin feeding the hene liberally of the kind rott Arthur elevator as 'cleaned wheat.'
It is important also to determine what would be the effect of too restrictive legislation on our great transportation routes.
Is Duluth, and so long as our prairie wheats are mainly sold side by side with the products of Minnesota and Dakota in European markets our scales. of food that makes feathers. Wheat is as to moult early, and get through this de-pressing operation before oold weather. A small quantity of linseed meal will help the hens to shed their old coats. Many de-not begin to feed extra until oold weather. Then even if the new coats is recovered the Then even if the new coat is produced, the hen is too much exhausted to begin layin before spring. The small Yorkshires are not

Works the Other Way.

RHEUMATISM CONQUERED. GREAT ADVANCE IN MEDICAL SCIENCE.

Discovery Which This Fainful Dis-case Cannot Resist—Mr. B. Binedell, of Paris, Ont., Belates His Experionce With the Cure. Paris, Ont., Review. Rhomatism has long baffied the modi-cal profession. Medicine for external and internal use has been produced, plasters tried electricity experimented with, hot ried, electricity experimented with, hot and cold baths and a thousand other thing

tried, but withous avail. Rhoumatism still held the fort, making the life of its victims one of misery and pain. The first real step toward conquering incumatism was made when the preparation known as Dr. Williams' Pluk Pluk for Pale Poople was discovered and since that time People was discovered and since that time thousands have testified to their wonder-ful officacy in this, as well as in other troubles, the origin of which may be traced to the blood. traced to the blood.

Among those who speak in the highest terms of Dr. Williams' Pink Pills is Mr. Blaadel, of this town, who is known not only to all our citizens but to residents; of

Land 8 peculators.

Two American capitalists visited the Department of the Interior to-day for the purpose of securing the co-operation of the Government in a speculation which they have in hand. The spokesman, Mr. W.O. Morton, of Minneapolis, stated that they desire to acquire a large tract of land in the West, to which they will bring settlers who will purphase the property from them. Mis. Herning, of Copetown, who had been cuped of paralysis by the use of Dr. Williams' Hink Fills, to give them a trial. Tollowed her alytice, and after using a box or two I began to feel much better, and am satisfied that but for the timely use of Pink Pills I would to-day have been a physical wripek, living a life of constant pain and I cannot speak too highly of their curative powers, or recommend them too strongly to other sufferers. I cheerfully give nemistation to publish my discussion give permission, to publish my statement in the hope that some other sufferer may road and profit by it." Dr. Williams' Pink Pills strike at the

root of the disease, driving it from the system and restoring the patient to health and strength. In case of paralysis, spinal troubled, locomotor-ataxla, spinate, rhoutreatment. They are also a specific for the trouble which makes the lives of so many chooks. Men broken down by overwork, worry or oxcesses, will find in Pink Pills n certain ouro. Sold by all dealers or sent by mail postpaid, at 50c, a box of six boxes for \$2.50, by addressing the or. Williams! Medicine Company: Brockville, inns' Medicine Company, Brockyille Ont., or Schepoctady, N.Y. Beware of mitations and substitutes a

'just as good.'' Always on Hand .- Mr. Thomas I Always on Hand.—Mr. Thomas H. Porter, Lower Ireland, P.Q., writes; "My sqn, eighteen months old, had croup so bad that nothing gave him relief until a neighbor brought me some of Dr. Thomas Eelectric Oil, which I gave him, and in six hours he was outed. It is the best modicine I ever used, and I would not be without a bettle of the without a bottle of it in

A Rash Experiment. "I am a ruined man !" Passers by paused and noted the indi-vidual who sat on the force, regarding with and dejection the new house over in the ungraded lot. Somebody remembered that he was the man who draws the plans for \$2,000 houses that are printed in the newspapers "I am a ruined man!" he said for the third time.

Then they understood that he hall tried to build a house from one of his own

Medlent Testime Reputable medical men will rarely a Reputable medical men win rarely as low their names to be published, endorsing any special form of medical treatment. Often however, there may be found at Lakehurst Institute, Oakville, members of the "noblest of the professolves fallen victims to alchhol. One of these recounts his experience and observation thus: "From my town case and others I have observed; it have no hesitation in sayin; that your method of treatment is ominently successful. I was greatly surprised to see men of fifty years and over who had been for many years addicted to the excessive use of alcohol, in the course of five or six days enting heartily, sleening well, with no eating heartily, sleeping well, with no more desire for alcohol, and with a feeling of then 1 and bodily vigor not experienced by years—this I consider really wonderful? We might add that these results are mainly due to the care and judgment exercised in each individual case or trusted to the care. ual case entristed to us—features set dom discoverable in other institution having similar objects. Beath Through the Kidneys. Hardly any organs of the human sy om play a more vital part than the kidneys. A derangement of these even to a slight de-gree, will lead to trouble that is likely, if gree, will lead to trouble that is likely, if not stayed, to prove fatal. There is only one way for the system to be rid of this disease, and that is by trying a medicine that will not specially, and is a specific for kidney disease. This is the strong faster in the great South American Kidney Cure. It is prepared specially for those organs, is radical in its basishment of disease is patod here, and rich in the healing powers necessary to complete restoration.
