The Origin of an Old Saying. It is a curious bit of literary exercise to take a common saying and trace it back take a common-saying and trace it book to its origin. Take the common saying, for instance, "All that glitters is not gold." It is found in our rout literature everywhere and in a dozen different forms. Dyyden bronders it, "All, as they say, that glitters is not gold;" Spencer says, "Gold is not stated and the says of the say of the say of the says of exerts on Nature's own restoratives. All druggists sell it. renders it, "All, as they say, that glitters is not gold," Spencer says, "Gold is not that doth golden seem,". Lydgate has, the same idea in the words, "All is not gold that outward showeth bright." Ohaucer expresses it in somewhat different phraseology; Middleton has it, "All is not gold that glisteneth," and Shakespeare says, "All that glistens is not gold." Go a little further back and the same expression is found in the monkish collection of proverbs, and there is no doubt if a classiproverbe, and there is no doubt if a classi-cal scholar were to set to work with the determination to hunt the proverb down, no matter how long it took, he would find it in Latin, Greek and most other ancient and dead languages. London, Sept. 29.—The Pall Mall Ga-ette publishes a special despatch from amatave. Madagascar, which says hat news of a serious character has Tamatave, Madagascar, which says that news of a serious character has been received in regard to the position of the French on the north-west front. According to these advices Gen. Duschesne has been compelled to fall back upon Mevatanana, withdrawing his advance guards, which had reached Kinajy, 60 miles fipm Antananariyo. The retreat of the French has restored the confidence of the Malagassys. A large quantity of arms had reached the confidence of the Malagassys. A large quantity of arms had reached the confidence of the french troops of flight are now volunteering to go to the front. It is reported that the physical condition of the French troops at Mevatanana is such that there are hardly 200 effective men left. The foregoing despatch bears no date, but is presumed to be sufficiently recent to describe the existing condition of

ENGLISH WEATHER London, Sept. 29.—The extraor London, Sept. 29.—The extraordinary hot weather eclipsed all other topics in England last week. On Tuesday the thermometer indicated 88 degrees in the shade in London, and 135 in the sun. The record is 20 degrees above the September average, and four degrees higher than on any previous day of this summer. The weather since Tuesday has shown little improvement, the mercury on each day rising to 84 degrees or higher. There have been numerous cases of sunstroke during the week; and several fatalities have resulted in various parts of the country.
