The Medicine for Liver and Kidney Complaint.—Mr. Victor Auger, Ottawa, writes: "I take great pleasure in recommending to the general public Parmsled." Pills, as a cure for Liver and Kidney Complaint. I have decreed for the last recommended to me without relief, but after eight of Parmeleo's Pills I was quite relieved, and now I feel as free from the disease as before I was troubled '

Cooked foods are best in winter, and it is not necessary to cook in summer for the fowls, as grash and a variety of food is then more plentiful. Mea is excellent, either cooked or raw, and the ground grain may be given cold or hot as pro-farred. The labor of caring for a flock must never be overlooked as it is an item of expense. Only when one has a very large flock does it pay to make a specialty of cooking the food, and even then it should not be a daily occurrence. In summer such work need not be done as long as green food is pleatiful . Green Food.

Commons for the south division of the County of Longford, has been added to the Judicial Committee of the Privy Clover contains much more mineral matter than grain and the hens will reliable thighly. If the flock is confined in yards give finely cut clover or place soon than the contained in the contained the As Parmeleo's Vegotable Pills contain Mandrake and Dandelion they ourse Liver and Kidney Complaints with unerring certainty. They also contain Roots and Herbs which have specific virtues truly wonderful in their action on the stomach and bowels. Mr. R. A. Cairneross, Shakespeare, writes: "I consider Parmeleo's Pills an excellent remedy for Billousness and Derangement of the Liver, having used them myself for some time." yards give linely cut clover or place sodsin the yards for them to pick. Bulky
food is of great advantage to poultry,
as it serves to assist digestion and pro
motes health. Variety can be best socured by the use of green food, as noonly the leaves but the soods are relished. If less grain is given and more

-The Son of the Old Man.

The son of the Old Man.

It is sad to relate that last week there was much profanity amongst politicians in this good province of Ontario. By the "bosses" both parties had been deceived, or perhaps it would be more just to say that they had been thwarted in their desire to pursua their local elections to the bitter end. At Osgoode hall on Monday last there gathered a great number of party lawyers and political leaders. Protest papers, properly filled in, were in their hands. Thick wads of, money ware in their inside pockets. When the habd of the clock had swung round to nearly noon it was announced that no protests would be lodged other than the eleven against Conservatives that protests would be lodged other than the clayen against Conservatives that had been handed in a few days before. And that is how the matter new stands. No Liberal sees in Ontario is protested. Elayen Conservatives are assalled. From all over the country come objections from both Liberal and Conservative politicians. Down in Brockville, the home of John F. Wood, ex-Controller of Customs, the Liberal organ demands to know whether James Sutherland has erected himself into a Liberal was. In other counties the James Sutheriand has created himson, into a Liberal boss. In other counties the Conservatives are furious. The truth is that Sir, Charles Tupper and James Sutherland had a very complete understanding as to what was to be done. The arrangement that was made was that the Liberals were to protest ten under the conservatives half a dozen. eleven and the Conservatives half a dozen

been so lenient with his conquerors.
Ontario Conservative Schism.
A remarkable schism has arisen in the ranks of Ontario Conservatives. Numbers of them protest against Sir Charles Tupper's continuing to hold the leadership. These goutlemen refrait from nom-inating any man to take his place. George Eulas Foster seems to me to be the duly man who has anything like the qualifi-cations. And I am not so sure that he has those in any great measure. Why a has those in any great measure. Why a change should be made now is more than I can understand. The Liberals aver that they will settle the School question. With this, issue out of the way Sir Charles should prove an acceptable leader to his party. His imperialism should commond itself to English speaking Canada. Mr. Laurier already shows signs of dropping two or three items of the Conservative programme. Mr. Mulch will see to it that the cold storage scheme is given a fair trial. But I have it on the best authority that the fast Atlantic line scheme is to be suffered to drop. An annual subsidy of three quardrop. An annual subsidy of three quarters of a million dellars was to be granted by the Conservative Government to the projectors of the line. The Liberals are determined to show a decreased bud-The Canadian Artillerymen won the Queen's Prize and the Londonderry Cholera in Egypt again shows an increase, and anxiety is felt on account of the absence of reports from the camp of the strength of the absence of reports from the camp of the strength of the absence of reports from the camp of the strength of the absence of reports from the camp of the strength of the strength of the absence of reports from the camp of the strength of the strength of the absence of reports from the camp of the strength of the country. That, you will appeal to the country. That, he proved the strength of the s ing, the Minister of Finance, and Sir Richard Cartwright, who is at the head of the Department of Trade and Com-merce, will have the chief hand in drafting the revised tariff. It happens that Mr. Fielding comes from Nova Scotla, where are situated Canada's greatest from mines. The fact is significant. When he mines. The fact is significant. When he was in Opposition Sir Richard called loudly for free-iron. I do not think he will be found to hold the same views when in February next the people of Canada are given the result of the deliberations of these two experts in fiscal matters. As the ex-Minister of Finance was fond of saying "the country's bills have to be paid." The object of the now Government has been stated themselves to be to make these bills

small as possible. But we have fixed charges amounting to nearly a third of our revenue. These charges are mainly in the form of interest of our public debt. Any schemes for colonization, or the building of railways or canals will necessitate an increase in taxation cannot hope for any great decrease increase is not probable. clean to use. There are two which I like so well that I seldom use any others. For fibrous-rooted plants there is no food that is better than common glue. A piece an inch square dissolved in a teacupful of warm water is sufficient for a plant in an eight or ten-inch pot, if given once in two or three weeks. Nitrate of soda is also good, but it is more of a stimulant than a food, and the result is not so lasting. It is one of the best things for sick plants that I were knew of. Work in the surface of the soil with a fork, and water with the solution as described later on, and a plant is far gone that will not take on a new lease of life. A teappoonful of the nitrate of soda to a quart of water and applied twice a week is about the right treatment for either sick plants or bulbous-rooted plants that are coming into bud. Be a little careful about giving this to bulbs before they show buds, or the result may be a luxurant growth of foltage at the expense of the blossoms, but after the buds are formed it will make them fairly "hustle." Nitrate of soda is extremely soluble and so is quickly taken up by the plants, and care must be used that too much is not given a the plants stimulated beyond what is antival and healthy growth. The looks of the plant will tell when enough has been given, and then want of the commissioner Mercier was to be its allone. Since 90, and Mr. Cioran. All that the people wanted was to be let allone. Since 90, and the conditions were different from those in Quebec, and the school; love at the Month of the commissioner Mercier decided to take no action. He found it has the people wanted was to be let allone. Since 90, and the conditions have changed once more. The old Archbishop is the school and the commissioner of the conditions have changed once more. The old Archbishop is taked in the minds of Roman Cathbishop is the school and the casts as trong side light upon the casts a strong side light upon the casts a strong side light upon the story in all the Roman Cathbishop is the school and the A Montreal Story of the School Question.

between the Premier and the Government of Manitoba a very thorough under standing as to the course that is to be taken in respect of the School case. There can be no doubt that Mr. Laurier was speaking by the book when he said at St. John's the other day that he would have the whole subject disposed of within six months. One of the signs of this was in the gathering at St. Hontface the other six months. One of the signs of this was in the gathering at St. Bontface the other day, when a French Canadian Liberal Association for Mafitoba was formed. Recruits are being brought in by scores. At the opening meeting the fact that Canada has for the first time a Franch-Canadian Prime Minister was enlarged more what is no follows:

DOCTORS GAVE HER UP. BEMARKABLE EXPERIENCE OF MRS. SALOIS, OF ST. PIE.

Grippe, Followed by Infla

the Lungs, Left Her on the Verge of th Grave-Her Whole Body Racked With Pain-Her Husband Brought Her Hon In the pretty little town of St. Ple Baget county, is one of the happles homes in the whole province of Quebec and the cause of much of this happlness and the cause of much of this happiness, is the inextimable boon of health conferred through the use of Dr. Williams Pink Pilk. Mrs. Eva Salois is the person thus restored, and she tells her story as follows: Like a great many other Canadians, my husband and myself left Canada for the States, in hope that we might better our condition, and located might better our condition, and locate in Lowell, Mass. About a year ago I gay

birth to a bright little boy, but

yet on my sick bed I was attacked wit la grippe, which developed into inflam mation of the lungs. I had the very be

Catholic figures on the commission. To which the Liberal papers make answer that no Frenchman is necessary. Portfolio of the Interior. And still the portfolio of the Inter without a holder. Joseph Martin's friends labor unceasingly in their effort to obtain for the author of the School Bill this honor. Mr. Laurier is known to have a desire to summon Martin to take charge of the department, but other French Canadians of prominence, and Solicitor-General Fitzpatrick, who is ball French, have told the Premier that to do so would be to make a most serious inte-take. Israel Tarte advocates the calling of Senator Moinnes or some other Britselves short of money and could not file ish Columbia member. Martin, Tarte the necessary papers. The Liberals kept points out, drafted the School Bill. Clifton their side of the bargain. fard Sifton, the Provincial Secretary of Manitoba, carried out its provisions. Neither of those men would be acceptable to Quebec. And Quebec must be kept satisfied. For my part, I should like to see Sifton at Ottawa. He is an able and honest young Canadiau. He believes in Canada's nationhood. He would rise above sectional interests. He is the equal of Martin mentally and he possesses just what Martin lacks—an attractive personality. Far be it from any of us to denounce a man because he lacks personal

the country that they, the people most interested, are eminently yell satisfied with the new basis. That is the plan. It

will be injured or benefited by this rather early description of it. The party newspapers refrain from mentioning it. The Government press, of course, will say nothing until the Government makes

say nothing until the Government makes announcement. The Conservative editors, who must see very plainly the game the Ministers are playing, are silent for fear of losing by elections in Quebec. The

estant an Irish Roman Catholic and

ceived. I do not know that it

ment, and although the inflammation left me I did not get better, but confin-ually grow weaker and weaker. I could not sleep at night, and I became so ner-yous that the least noise would make me tremble and cry. I could not eat and was reduced almost to a skeleton. My whole body scened racked with pain to such an extent that it is impossible for me to describe it. I got so low that the doctor who was attending me lost hope, but suggested calling in another doctor for consultation. I begget them to give me something to deaden the terrible pain I endured, but all things done for me seemed unavailing. After the consultation was ended my doctor said to I me, you are a great sufferer, but it will not be for long. We have tried everything; we can do no more. I had therefor to prepare myself for death, and would have welcomed it as a relief to my suffering, were it not for the thought of loavsuch an extent that it is impossible for have welcomed it as a relief to my suffering, were it not for the thought of eaving my husband and child. When my
husband heard what the doctors said, he
replied; then we will at once go back to
Comada, and weak and suffering as I
was we returned to our old home.
Friends here urged that Dr. Williams'
Plnk Pills be tried, and my husband
procured them. After taking them for
some weeks I railied, and from that on
I constantly imfroved in health. I am gait, the twinkling eye. Also, he makes few mistakes in men, albelt he has had scant experience in the world of politics. Before the elections Hugh John came to Ottawa and there had nany interviews with the Ministers, of whom, of course, he was one. Sir Frank Smith, who was a power in the councils of the Conservative party, watched the young man intently. And, after the final meeting bor the election, the old. Further of Vernery some weeks I railied, and from that on I constantly improved in health. I am now entirely free from pain. I can eat well and sleep well; and am almost as strong as over I was in my life, and this renewed health and strength I owe to the marvellous powers of Dr. Williams' Pink Pills and in gratitude I urge all sleep resolute to the them. for the election, the old knight of Tor-onto said to his friends: "That is the next leader of our party." The story was told Hugh John. He became aghast, and said Pink Pills and in grattenae
sick people to try them.

Dr. Williams' Pink Pills create new blood, build up the nerves, and thus drive disease from the system. In hundred cases they have cured after all thus estub. at once that his inclinations were not in that direction. Moreover, he pointed out that there were many men who hid a much better right to the post than he had. John Haggart is a boliver in the political future of the member for Winni-peg. The ex-Premier, I am afraid, thinks he could furnish a very good leader out of his own party. "Sir Charles Hibbert," said his father during the campaign in

drads of cases they have cured after all other medicines had failed, thus estab. lishing the claim that they are a marvel among the triumphs of modern Nova Scotia, "I consider to be as able Nova Scotia, "I consider to be as able a statesman as Canada possessea," One must make allowance for a father's pride. But it is certain that "young Charley"; had the correct political instinct when, in 1895, he left the Cabinet in intrade mark, "Dr.; Williams" Pink Pills for Pale People." Protect yourself from imposition by refusing any pill that does not bear the registered trade-mark around dignation because the other Ministers would not consent to make an immediate

They met with a decisive refusal. In the meantime the Conservatives of the riding assembled and nominated James McLauchlin, the wealthy biscult manufacturer, of Owen Sound.
The Controller of Customs, who is to be McLaughlin's opponent, is also a manu facturer of the toothsomedaintles. Pater an eight or ten-inch pot, if given once in two or three weeks. Nitrate of soda is also good, but it is more of a stimu-McLangniin's opponent, is also a manu-facture of the toothsome dainties. Pater-son already is in his riding, working aniain. The people of Owen Sound are in fear lest their labor shall be suf-fered to go without the improvements that the last Government commenced. lant than a foot, and the result is not so lasting. It is one of the best things for sick plants that I over know of. Work up the surface of the soil with a fork, and water with the solution as des And we may all be surprised if the tire-less Tarte does not point out that if the people of North Groy are friendly to the teaspoonful of the nitrate of soda to a quart of water and applied twich a week is about the right treatment for either sick plants or bulbous-rooted plants that Government, the Government will not be unfriendly to them. All of which is part of the noble game of politics. are coming into bud. Be a little careful about giving this to bulbs before they CHANCE OF A LIFETIME. show buds, or the result may be a lux-uriant growth of folinge at the expense of the blossome, but after the buds are formed it will make them fairly "hustle." Nitrate of sode is extramely soluble and so is quickly taken up by the plants, and care must be used that too much is not given and the plants stimulated beyond what is natural and healthy growth. The looks of the plant will tell when anough her hear clump.

The foreman of the Squedunk County lressing his colleagues, 'we have now the opportunity of a lifetime. If, we set promptly we may become famous and near our names ringing from one, and f the country to the other. Do you wish o plod along as countrymen or shine as attrictic citizens of a glorious state in a lorious Republic?

This brief address was not without it Meckness is love at school; love at the Savior's feet. It is Christian lowilhood. It is the disciple learning to know himself; learning to fear and distrust and abhor himself. It is the disciple practising the sweet, but self-emptying lesson of putting on the Lord Jesus Christ. It is the disciple learning the defects of his own character. It is the disciple praying and watching for the mellowing of his temper and the amelioration of his character. It is the living Christian at his Savior's feet, learning of Him who is offect.

"Let us shind!" oried one of the members and the others took up the ory until people passing on the street outside catching only the last word thought ion of bootblacks was in see "We have before us," continued the preman when quiet had been restored, nothing but a lot of jail cases and out or two little embezzlements that will cut no figure outside of this of uty and not much of a one in it. What want to something that will be heard all over the state, so that the people of this great commonwealth will realize that we are it work protecting the interests of all as patriots should."

We hope the day is not far distant when the profound ethical axiom of Carlyle that "everybody who is not working is stealing." will be universally recognized. The Apostic Paul went very far. He said that the man who will not work shall not est. We would not go quite so far at present, but we would with the greatest relief and delight put on broad and water and the treadmill every well-dressed and well-fed rascal who lives upon his ancestors' carnings and wastes atricts should."
"Hear! hear!" oried one of the jurors.
"That's the stuff!" exclaimed another.
"We were not out out for routine work," said the foreman "and I am glad o see that you recognize that fact. Let is put aside these pairry little jail cases and come down to work that is of some and come down to work that its of some importance. As I came past the boarding school on the hill this marning I noticed that the flag was not flying."

"The high wind last night—" began one of the jurors.

"Oh, I know what broke the staff," intervented the formum "that the flags. upon his ancestors' earnings and wastee his healthy days in idleness and frivol-

his healthy days in luieness and irrvol-ity. Every one who is not mentally or physically deficient is under a para-mount obligation to leave the world bet ter than he found it, to work hard with interrupted the foreman, "but that does not concern us. The law is specific in regard to the time when the flag must float above schools, and as patriots—"." muscle or with brain for the public the Grand sury intercept one connected with after indicting every one connected with the school, they went out and subscribed for every paper in the vicinity to see how their names looked in print.—Chi-Sometimes the lenses of sp nary rubbing will get them hright. A piece of tissue paper, dipped in a weak solution of washing sods, will prove affectual. When a lens becomes brown or asty looking use a paste of fine rouge and water. This must be used by rub-bing briskly, with either the point of the finger or the side of the hand. This

X RAYS AND CONSUMPTION dition of the Lungs Clearly Shows

More interest is taken in the authode ray exhibit in Mechanics' Building, where the meeting of the Massachusette Medical Society is being held, than in all the other exhibits put together, and Russell Hall was crowded all the morning with medical men anxious to bee the revelations which were being made there by the new light. Dr. E. A. Codman has charge of the exhibit, and it is one of

charge of the exhibit, and it is one of the largest and most complete ever shown anywhere.

The chief object of interest is the big fluoroscope, by which the whole upper part of a man's body, penettated by the cathode rays, is shown. This is done by throwing the shadow from the tube on a The chief object of interest. Is the big fluorescope, by which the whole upper part of a man's body, penetrated by the cathode says, is shown. This is done by throwing the shadow from the tube on a large canvas erroen forming one side of a box of which the observer its. By means of this apparatus the linterior of the man's cheek could be plainly seen, with the outline of the different organs against the light from the tube. The man who was shown this morning was a consumptive, having had a cough! for about two years, and the cathode ray showed his condition very distinctly. The right lung, which was healthy, was penetrated by the light so that the ribs on the two years, and the cathode ray showed the condition very distinctly. The right lung, which was healthy, was penetrated by the light so that the ribs on the front and hask could be seen rhainly, but on the left side the lung was tuber-culous, and the ray did not penetrate, so that only a dark mass could be seen. This exhibition caused the greatest interest, in other case of the lungs, but among those of the physicians who make a specialty, of diseases of the lungs, but among nearly all who attended the meeting. There was a line waiting all the morning which extended from the apparatus across the room and out to the door of the much hall, and, as it took less than half a minute to make the examination, it is probable that several hundred physicians must have seen it up to noop.

Besides this large fluoroscope, there were several instruments of the ordinary

that several frantieri physicians that have seen it up to noon.

Basiles this large fluoroscope, there were several instruments of the ordinary kind on which examinations were made by niceus of aye shields. One of these by niceus of aye shields. One of these courts are several and the by nicans of sya shields. One of these instruments was more powerful than the long and the large fluoroscope, although of course only a small part of the body could his seen by it. Not only could the ribs and vertebrase be seen plainly when one of the wyo shields was held against a man's chest, but when a pair of forceps, were held against his back, on the outside of his coat, they could be distinguished without difficulty. Several of the men there had fractures in some of their bones, and these were plainly shown on one of the mackinosi glying an excellent demonstration of the giving an excellent demonstration of the

graphs made by the X-ray process were thrown upon a carvas by a stereopticon, showing some excellent cased of broken bones and dislocated joints, and also cases where objects were embedded in the flesh, one or two of which it would probably have best impossible to flud without the aid of the cathode ray,—Bos-

PITCAIRN ISLANDS.

In the possession of one of the misstohary party just arrived from the South Seas on the Adventist vessel Pitchirn is a letter which has an inter-esting and unique history. It travoica about 25,000 miles, while the distance between the mailing point and its destina-tion is but 1;200 miles, and it went the most direct route possible and did not ng else can, the complete isolation of he little Pacific paradise founded by

John Adams. Tablet is only about six-days' sail from Pite drn, and is a sour c withous love-site. Piteat, nors take the wisks. But letter-writing, although i forms an important part, of the court ship, is generally confined to one letter as when the answer is received it is gen erany the arrival of the bride. Except a small vessel or a man-of-war consents to carry letters between the two points, which opportunity rangly occurs, the only remaining hope is front, a passing ship bound from San Francisco or Portland to Europe. A man now residing in Oak land was once deputed to carry the Pitcaten mail for Tahiti and to-day told the story of now it was done. Wo left san Francisco in the ship City of Hankow, and were off Pitcalra

Island on Christmas Day. Only about hours, we have to and signaled to Adams Point, Then the two bonts. Adams Point, Then the two binats, Queen Victoria and Admiral Drew, came off with two loads of venetables. Gov. McCoy also came off and asked us to carry some letters to Tahiti. We rather smiled at first, but when he produced seven letters and told us, there was no other way to send them we consented; and after paying for our fruit and vegentables. and after paying for our fruit and vogetables we started on our trip. Those letters were the cause of a good deal of inconvenience. When the captain handed in England he took the letters ashore and wont to the Postmustor. Then he was informed that he must make an afildavit and must apply to the Postmuster General for 14 cents, the tartiff for carrying letters from countries not in the, postal union. Eventually the letters were united in the Falmouth Post-Office, after we carried them about 13,000 miles.

From Falmouth they went to Southampton, and were sent in the usual course water by the manner. ton, and were sent in the usual course of events to New York, another 3,000 miles. They then crossed to San Fran olseo and were put on board one of the Australian steamers and put off at the nearest point to Tahith, their destination. The resiminder of their journey was covered with a small boat. In all, the letters and occupied 41/2 months on route.

Moral Cure of the Child. It is natural the bringing up of infants is a scrious matter. Some parents wisely bring up their children thomselves and o not allow them to be dragged up by servants. It should be remembered that the moral and physical character of the child, for good or ill, is formed during the first seven years of life. It is too late to commence to train him affect the to commonce to train him after; the seeds are surely planted, and they will bring forth a plentiful harvest

The courage and heroism which accept the burdens of life and follow the call of duty however footsore and weavy, bring to the heart a peace and serenity which Living to One's Self.

oharacter. It is the living Christian at his Savior's feet, learning of Him who is meek and lowly, and finding rest for his soul.—Dr. James Hamilton.

It is Work or Steal.

The living Christian at meanness to.

In the living Christian at mean no honor. He has lived in himself, he has died in himself, and all that he leaves in memory of himself speaks no word of praise in his behalf, no word of word of praise in his behalf, no word of justification. This is no true life. It is the worst of all failures. There are glorious opportunities in this world for service. He who wisely nees them enriches both his race and himself; and, dying, leaves a monument which outlast granite and is brighter than polished brass.

Brown Sugar to Europe. Brown sugar, long in disfavor in this country on account of the cheapness of the whitehed product, is still used in many parts of Europe and ifked better than the white, last year 695,486 gallons being sent abroad, valued at \$22,052.

n place of the one he lost, and his witches like mad the whole time Swollen Eyes.

If the eyes look swollen and bloodshot, aponge them several thinds during the day with hot wate.

A heavy cold, or using them too much, will produce this appearance of the eyes, and perfect rest is the best ours. Lis down in a dark-ned room, with a cloth dipped in hot water laid over the eyes.
