There is no abatement of the better feeling noted of late among Montreal business men, and the general trade distribution is of a freer character, though buying is still slow. Large purchases are the exception. In some quarters a little improvement is noted in remittances, but from the country would indicate that the market is still held to hold for higher prices, and are not reducing store bills as they are generally expected to do at this season.

The failures in the Dominion last week were trifling, decreasing, being 40, as against 54 the week before, and \$3 in the same week of a year ago. Outstanding debts head the list with \$1; on this number 15 out of 1000 credit or blank rating, and the highest amount \$1,000. Quebec had eleven, being 10 per cent of the previous week.

Montreal had four. New Brunswick and Nova Scotia had two each. None were reported from the other provinces last week.
