MARKDALE STANDARD.

## THURSDAY, DEC. 8, 1896.

The Week's Commercial Summary.

The earnings of Canadian Pacific for the \$32,000. Stocks of wheat at Toronto are 239,756

busicis, as against 217,457 bughels last veek and 71,315 bushels a year ago. The world's visible supply of wheat showed a larger increase than usual last week—the increase was 5, 200,000 bushels. There has been a decline of Sc. in Chica-go wheat within the past few days, and colders are consequently timid about the

Stocks of wheat at Port Arthur and Fort William are 2,772,643 bushels as nized as William J. Means, of against 1,176,973 bushels at the corress Rapids, Mich. against 1,176,972 bushels at the corresponding date of last year.

The Canadian Gazette says that Canadian horses are being imported into Lon-don in considerable numbers. At a recent 50, £45 and £44 and downwards.
There is no change in the trade situa-

There is no change in the time time time. Itev. J. D. Fisher, or montreast tion at Toronto. Business in wholesale been called to the pastorate of Knox church, St. Thomas.

1,085,000 bushels last week and the colar is now 61,008,000 has against 60,326,000 bushels two have ago, and 82,290,000 bushels two have ago. The amount affort to Europe increased 1,200,000 bushels last week and Mayor and Council Friday night.

Asmail, rotary engine or novel design sives of Cornwall and Stoimont. has been invented by Grant Brambel, of Sieepy Eye, Min., for patent of which H. F. Allen, of London, president of an engineering syndicate, has offered him \$1,600,000. The engine does away entirely with the crank motion of the steam engine, a most desirable, but to all intents the aettlement of the School question. and purposes an almost impossible thing to do. The engine uses its own plunger for a cut off. The engine is ateam tight, for a cut off. The engine is ateam tight, and requires no ring packing. It can be made marine type, and of course can be either simple or compound. It is not a cheap machine, although it costs less than an ordinary engine. It weighs less and occupies only a fraction of the space of the old style engine.

old style engine.

As this week practically closes the sea son of navigation at Montreal, there has been a considerable degree of activity in certific off shipments of week from the considerable degree of activity in the sea of shipments of week from the considerable degree of activity in the sea of shipments of week from the shipments of week from the sea of shipments of week from the shipments of week from t getting off shipments of goods to custon ers on St. Lawrence and Ottawa river points, and some dealers in heavy goods report a difficulty in getting freight space for orders to be delivered to Western points. Last vessels for sea are expected to get away by the 23rd or 24th. The general movement in most staple lines is fairly maintained, and collections are ago, but the even worse state of the country roads, everywhere complained of is not calculated to help their culation of money at interior points. With regard to values there have been no very marked changes during the week.

## Here and There.

We can take a fudge close we need along for convenience, in case, we need him. I'm going to the ranch." and Uncle Bill ploked up a saddle that lay on the ground near him and started for a pony staked out on the prairie, a hundred

yards away.
This move of Uncle Bill's appeared to This move of Uncle Bill's appeared to meet with favor in the crowd, and by the time he was on his pony and started to ward Turkey crock, he had a party of twenty-hyo at his back, among whom was lake Breen.

It was not a long ride to Pray's ranch, and the unnies went on a test. The ward to with the track of the results o

It was not a long ride to Pray's ranch, and the junies went on a trot. The way led principally over a rolling prairie, with an eccasional metre of live oak, or a chapparal thicket to relieve the monotony.

When they had come within a mile of the ranch, some one in the cavalende called out that there was a herd of sheep out to the northward. The company halted and looked in the direction, and street on the control of the plants stand too close to develop as they, should, or if you have more than you can care for satisfactorily, boldly take and looked in the direction, and street on the control of the plants stand too close to develop as they should, or if you have more than you can care for satisfactorily, boldly take and looked in the direction, and street of the plants stand too close to develop as they should, or if you have more than you can care for satisfactorily, boldly take and looked in the direction, and street of your discretion, and if now you have sacrified to many windows to your geraniums and begonias, or if the plants stand too close to develop as they should, or if you have more than you can care for satisfactorily, boldly take and looked in the direction, and since you have sacrified to many windows to your geraniums and begonias, or if the plants stand too close to develop as they should, or if you have more than you can care for satisfactorily, boldly take and looked in the close to your geraniums and begonias, or if the plants stand to close to develop as they should your native sacrification. enough, on the other side of a slight delegation was a herd of sheep, quietly grazing, but evidently making their way slowly in the direction of Pray's ranch, as a man was apparently urging them on while a dog was keeping them from strag-gling. gling. "That's Pray's Greaser now," said

or his having that

dog with him. Wo'd better get him while we have the chance," and he turnwith the fire the little fellow's clothes ed his head in that direction.

"Say 'squire," said Uncle Bill, turning to a bright, intelligent looking young nan riding near him, who got his title best go along and, soo that the Mox don't escape from the hands o' justice," and sly twinkle came into his eye, as he added." Seems like a mighty desprit feladded? Spenis like a mighty desprit fel-ler, the way he drives them sheep, an Jake an' the other fellers mebbe couldn't handle him right alone. "I'll take keer o' this cavyard."

this cavyard."

So the young lawyer and five others followed Jake Breen in a dash over the prairie to capture the Mexican, while the rest of the cavaleade rode on the ranch.

Pray's jacal, or hut, was a rude affair, constructed, as many of them are in that constructed, as many of them are in that country, by planting live oak pickets, ten feet long, in an upright position, side by side, to form the walls, and making a roof of prairie grass thatch. 'The cracks were stopped with mud, and the

much capital. She makes him to be, by much capital. She makes him to be less a kind of grace, a gras deal more there has be in by nature. She contributes the qualities needed in order to convert his vigor into a safe as well as productly efficiency. She introduces, for instance, into his intellectual nature that ingreate on of sentiments which intellect requires the safe as do its heat work. order to the attainment of the true, an without oaring to assert that man ! naturally heartless, any more than a should wish to assume that woman is by nature brainless, yet heart in its way by nature orangess, you money in its way, and woman so long as she is untainted and woman, so long as she is untainted by the passion of wanting to be a man, will be that member of the communia-corporation that will in particular con-tribute to the capital stock its affoctional element. Some woman tribute to the capital stock its affoctional element. Some women may resent this, but I would like to cattion young men against cherishing matrimonial designs upon any woman who is likely to regent it. It what you want is a wife and more merely a housekeaper, you must keep your eye well apen for a warm bundle of femininity that will be to you in a personal way what the fire on the hearth is to you in a physical way—a fund of sonal way what the fire on the hearth is to you in a physical way—a fund of tropical comfort that will keep the stiff-ness out of your thinking, the frost one of your feeling, and the general machin-ery of your life in a condition of pleas-urable activity." Gunpowder's First Use.

F YOU WANT A WIFE

People outside of military life who have no connection with the making of gunpowder know it only as a coarse, black powder like sand, which will-flash ing one-quarter of a yard in depth, the connection with the making of giupnowder know it only as a coarse, black powder like sand, which will flash off with a loud report if shut up in a case of any kind and set on free. It is a very queer mixture, made up of three simple and well-known substances, no one of which will expected, although two will black velvet ribbon. A broad sear of calfon enorcies the waiet, crushed into narrow folds and arranged in enormous loops with wide, velvet-rimmed ends. by the ancients on account of its flame, it is noise and its reading force, but their flame, it is noise and its reading force, but their was of velvet. The neck is square cut and finished with a narrow quilling of black velvet.

The round bodice of taffets had a perolian and finished with a narrow quilling of black velvet.

The round bodice of taffets had a perolian and finished with a narrow quilling of black velvet.

The elseves are the oddest things ever seen, but wholly suited to the remainder of the gown. The tight sleeve of taffets a reaches to the cloow, where it is set off by the follest sort of a fell of chiffon, with narrower frills set underneath, a fan. At the shoulder is a wide puff of the chiffon set ever one of taffets, with a fall challenge one part is so suited to the other; just the gown for a simall, dainty built was one part is so suited to the other; just the gown for a simall, dainty built was man who carties herself-lightly.

Another befrilled gown is built of huncer's graph velvet, with decurrations and the server of the sides of the deal dath and destruction to any the follest sort of the other; just the gown for a simall, dainty built was a way and the server of the server of the chiffs of this well and the destruction to a suggested that it could bused in engine of the part of the gown is built of huncer's graph velvet, with decurrations and the server time of the surface of the surface of the part of the surface of the could be used in engine of the part of the surface of the part of the sur

Cold boiled potatoes are a nuisance in a family that doesn't like them fried or in saind. One weeman of economical turn puts them into boiling water and lets them bubble for about ten minutes, then sho peels them and mashes in a kettle over the hoat, puts in butter and, grain and beats them for five minutes, and you wouldn't know them from perfectly frosh mashed potatoes.

Nicholas.

Tobacco is Increasing Color Blindness.

"Color blindness is on the increase," bit and Dr. D. L. Bliss, of New Yark, the may be otherwise perfect are not all: give them bubble for about ten minutes, then the these of tobacco had a good deal to do with it. I have examined a great many for color blindness, anyling on several processing the color blindness.

over the heat, puts in nutter and, cleans and beats them for five minutes, and you wouldn't know them from perfectly fresh mashed potatoes.

Some one wants to know how to freshen ham gresse so as to be able to need twithout the taste of ham in it. One good method is to put the fryings in a bin pan over the fire, with a pint of a bin pan over the fire, with a pint of cases exist among women will be found. Then put in thick slices of raw potatoes and set on the back of the stove to simpler. Half a dozen slices will do Cook ten minutes; then set away to coef. Skim the content of the content defect. I am a smoker and my percep-tions of color are unusually good, so that it is not impossible that a man may you will find that it will do nicely for that it is not impossible that a man may use tobacco without such an effect, but for mest ples or baking, payden bisoult.

Never throw away a scrap of grasse.

Says all in a tin can bear for the scrap of grasse.

Star: that it is not impossible that a man may use tobacco without such an effect, but

Never throw away a scrap of grease.

Never throw away a scrap of grease.

Says all in a tin can kept for the purpose, and once a week at least put-over the fire and fry one. After the frying process is concluded, pour on a pint of two of water, and let it boil up a minimus of the grease, and use with lye in linking scribbing scap. It is easily done and is excellent for cleansing purposes.

The sansible woman doesn't cover her floors with tacked down carpets, but has heavy rugs that only partially cover a painted or olled floor. Then she can take up the rags once a week and throw them dusted, and germs of malaria killed by the rags once a week and throw them the sun, where they can be dusted, and germs of malaria killed by the rags once a week and throw them floors best by all olds.

This is the jelly scason, and also the season for breeking glasses without stint with the hot juices. Try this: With the end of your finger take up a little syear, frosh lard and rub it all over the quistled of the gless, bottom that, all, so that every particle of the caused by tobacco."—Washington Star.

freish lard and rub it all over the queside of the glass, bottom and all, so that every particle of the surface is covered. Pour the jelly in the glass and set is away to cool. After cocling, rub off all the lard and cover the top with a tough white paper and white of an egg.

The gentle Elsie sat drearly in the glosming in the front room. She was very miserable, for on the previous night she had had words with her own, and now she fears her haughty er own, and now she fears her haughty Inrold will not call. Sho hears a step, a ring; a voice she servants in the hall, She will not wait until a light is brought, but gently calls, "Come in!" The visitor enters and, with a awful volume, the fair Elsle casts herself in his arms and softly murmurs: -"O, my darling, I am so glad you have come! I have so wanted to make it up and settle. And he of the embrace remarked:-Well, miss, it's very nice of you, and I'm very glad, tao, that you're going to settle up at last,"

> A Pretty Freek for a Girl, The yoke is very popular on all dresses for shildren under ten years of sige. A pretty little best frock was of hunter's green tweed, flecked with a warmish of red, the yoke and epaulets being of of red, the yoke and epaulets being of green silk, and the yoke aderned with three bands of covarm gulpure running across the figure, while below the insertion a band of coth, piped with silk, was fastened in festion by means of two large enamed buttons, which held it at either ond. The epaulets, were square in form, about four inches wills. it at either ond. The epaulots were square in form, about four inches wide, and were carried from thock to front, about two inches from the sleeve in frent, where they fell just under the strap, and its eustalphing button. A very dainty, and at the same time useful-locking coat was of blue serge, plaited into a narrow yole. A deep battlemented collar completely concealed this yoke, and was covered closely with tiny rows and was covered closely with tiny row of narrow military braid which almos
