The Offer of Minimum Duties.

were abacks."

the hards of the other, we should a little difficulty in concluding that

ARE NOT CONDEMN THE TARIFF BUT DO NOT LIKE TO PRAISE IT.

For the present at least we must look mainly to customs duties.

Formerly we had a general rate of 17½ per cent. Eighteen years of Tory rule have increased debt and expenditure enormously and in the nature of things the rate has to be advanced. If we keep enormously and in the nature of things the rate has to be advanced. If we keep this in mind we shall be able to see more clearly that all the duties in the new tariff are not, as some extremists say, protection duties. The duty of 20 per That Has Been Don has in Point—The I Bue-The Abolition of the Corn Duty he Offer of Minimur [From Our Own Correspo

Ottawa, May 4.—The Tory brethren not quite know what to do abou the new tariff. They cannot in logic con emn the Government for not making a can sweep of the N. P. They cannot in The Abolition of the Corn Daty.

The Tories find fault with the removal of the duty on corn when imported by the farmer. The Patron handbook issued for the elections said on this point; "The oyalty condemn it for reducing the utles on British exports. All they can o is to tell the farmer that the Liberals ave not at any rate given him free trade t one fell swoop. To this the farmer ave I to gain by put ing them out and utting you back?" What Has Been Done for the Farmer.

The farmer has get a good deal after all. The coal duty is lowered one cent, which, with the tanking arrangement, that amounts to a reduction of one and a half more, is not sad. The duties on woolen goods of the coarser sort are largely reduced. Barbed wire and binding twine are made free. Wagons, bug-gles, the smaller implements, iron and two thousand million bushels, so that if with corn free again we should use twice four million or even ten times four million the gain to the American grower will scarcely be "immense," enough to make him rich. It will be profitable, as the Patrons said, to the Canadian cattle and dairy interests, and that is what Mr. Fielding has in view. The same investigation of the same profitable with the teel generally and other articles are reduced in duty, while the duty on a still larger warlety of goods will be cut by the preferential duties offered to Britain; and, last but not least, the Government has taken power to deal summarily with combines. This is not so bad for a begin-ning. In England afteen years clapsed from the practical abolition of the Corn Laws in 1846 till the tariff was, placed on a purely revenue basis. Let the Liberals have a change and in five years they will leave nothing in the tariff that should not be there, regard being had to the fact that we have to raise a revenue of \$40,000,000 per annum by means other than they direct that the

than direct taxation.

The reductions made by Mr. Fielding have been made at a time when it is no easy thing to reduce. He is a free trader at hears and would, if he could, place the country on that basis without delay. But as a prudent man he has to take existing conditions into account. Times are hard. Many of the protected industries are carried by the banks, and to wipe out their pretection would be to force them into bankruptey and cause grave disturbance in the financial world. han direct taxation. grave disturbance in the financial world.
Again, another set of industries, while
able to stand a considerable reduction
under ordinary conditions, would not be
able to live under a just now when the American manufacturer is "slaughtering" his surplus stock on every market to which he can obtain access.

Take, for instance, spirits. To buy a certain quantity of corn, barley, oats and rye and convert it into a gallon of proof spirits costs the Landdian distiller 30 cents. This is the bare cost of that particular process. But in order to arrive at the true cost, the actual clost to the distiller; we have a add a good many items, such as the enormous expense entailed by the ageing law, which oblices them to keep the smill in bond two years before disposing of at, interest on plant, including the huge storehouses built expressly to meet the requirements of the ageing law, and in crest on capital at 10 per cent. which, allowing for profit and loss, is a moderate return. This brings the cost of a gallon of proof up to do cents. A Case in Point.

cents. . The American distiller can make it for distiller cannot turn his over more than once in two, really as it works out, not

more than once in three years. It happens that here is an unusually large accumulation of spirits in the States. The output in the census year States. The output in the census year exceeded 100,000,000 gallons. There are probably 150,000,000 now in stock, and as the old Whiskey Trust has broken down and a new Trust is being organically the state of the control of the cont as the old Whisky Trust has broken down and a new Trust is being organized, comprising something like 25 or 30 distilleries, big and little, this stock is being sold for export in large lots for as low as 10 cents per proof gallon, Canadian measure. I speak of this case not to boost the Canadian distiller but merelly to illustrate my point, that the Finance Minister was bound, if he wished to be fair, to take note of the exceptional circumstances now prevailing ceptional circumstances now prevailing in the United States, where hard time and reduced consimption have led to the accumulation of an immense surplys of goods that night be thrown into Canada below cost, to the benefit for the tion of Canadian of spirits the customs duty had to be advanced to keep step with the increase in the excise duty It is now \$2.40 per proof gallon. That is to say the American distilleries can sell their surplus her for \$2.50. The excise duty in \$1.40, manufacturer's cost 60, leaving our distilleries without any margin of protec tilleries without my margin of protection at all. They may be able to stand it

cans would merely have to drop a notel or two to wipe them out and acquir-control of our market. The Exigencies of Revenue. stone, which is said to be flawless, is almost in its initual state, not cut in facets, but polished "en cabochon," to use the lapidary's term. It's shape is that of an irregulair core counded at the top. The color is pade blue clouded with a delicate white inist or fleediness. When lighted from above, six quivering, over restless rays need by the apox, a characteristic which gives this variety of supplied its name. One observer describes the goin as looking like the pole of a watery blue globe, with varying lines of longitude sheeting out in silken flames toward a mythical equator at its beset. When a light is placed on each side of it, we have to raise \$40,000,000 annually. \$40,000,000 annually per head is larger in the States, even with bill, partly becaus gone up like a rocket since 1878 while theirs has been coming down, partly because, as every one knows, we contribute a large sum every year to the provinces in the form of subsidies, whils with them the individual States have to

pay their own way, and partly because in our vast and thinly peopled country it costs more in proportion to collect the would be the chear way of raising the question. is sum, but it is out of England they raise a ohlfory, etc., and, by a heavy excise tax
on spirits and tobacce with a countervailing customs duty. We are debarred
by our proximity to the United States
from putting oo big a premium on
smuggling; thu an excise duty of ten
and sixpence per proof gallon, the English figure, would probably add nothing
to our revenue ever and above what is
now obtained from the duty of \$1.90,
because of the lillet traffic it would be
sure to create. gers, gun and game taxes, taxes on servants and tarriages, on dogs, on armorial bearings, on plate, etc., with HE AVOIDS EXPLOSIVES.

Drifter's Experiences Have Led Him Steer Clear of Them.

"As you say, I am extremely caution about handling high explicative," admit ted Drifter "and for a man who ha am unique. Why, I actually avoid fired works displays, except at a safe, distance, and when the big down town stores blosson out with Fourth of July decorations I pass by on the otler side.

"I wasn't so easily scared when you first knew hie. That's true. May be I can explain how the scare when you in me. Ohe day while tramping along over a dusty road in Connecticut—there being no stage line to my destination—I was overtaken by a jolly young chap who was driving such a wagon as cigar and candy clearly that all the duties in the new tain are not, as some extremists say, protection duties. The duty of 20 per cent. on implements, for example, is as much a revenue duty to-day as the duty not 17 per cent. was in 1878. Those who insist that Mr. Fielding should have given us a free trade tariff ought to tell us how they would raise \$40,000,000 a year without resorting to customs duties. The Abolition of the Corn Duty. overtaken by a joiny young or driving such a wagon as cigar and candy peddlers in New England affect. He gave me a lift and put the whip to his horses. He went at a hotpace and puffed here. The purpose are a constant from the case. I enjoyed

me a lift and put the wife can horses. He went at a hot pace and puffed away at a clear from my case. I enjoyed my smoke too—that is, until we reached the village. Then the driver tossed his stump in the road and said:

"Young fellow, fig that the cheroot you're riding on a powder wagen, the us smoking. I'm dised to taking chances; wasn't bern to be blown." The very next day an the country. A powder plant went up in the twinkling of an eye, less driver—well, he was too widely scattered to need a funeral.

"I was rattle brained when I made my first trip to the mining regions now for the elections said on this point; "The cattle-raising and dairy industries, of so muck importance to the country, require cheap feed above everything. It is their essential raw inaterial. Corn is relatively the best and most economical of feed. Because we suffer along with the American consumer from the United American consumer from the United States tax on our barley, it is of advantage that we should suffer still more by taxing their cheap corn—such is the logic of protection.

"The freeing of corn," cries The Mail and English (it are impensed been to the my first trip to the mining regions nov famous as the Lake of the Woods minera belt. We had to pack all the supplies t "The freeing of corn," cross The Mail and Empire, "Is an immense boon to the United States corn-grower," for "when corn was free before we took over four millions of bushels annually for home consumption." The crop in the States in any propitious year amounts to ever two thousand million bushels, so that if with corn free again, we should use twice four million or even ten times four million the gain to the American grower million the gain to the American grower million the gain to the American grower million to "unmense" enough to million to the distinct the foreman of the outfit, and back to the trail and said outside to the trail and said

quietly:... Drifter don't be so kittenish with that box. It's full of dynamite. Lucky for you and the lot of us that I filled it at the whater cacho near Rat Portage, and its frozen.'
"I didn't talk above a whisper during the rest of the trip. The next summer I went to the mine and did my turn on one of the drifts. One day I proposed a one of the drifts. The day engineer, laid off and went with me in our canoe. The plekerel didn't show up to suit Mike. So, padding to a rock entrely bare of vegetation he stretched himself, and said:—

aid: Now, Mr. Drifter, I'll show you how to dutch fish." He had a dynamite cartridge in a bottle. He inserted a fuse, packed the dangerous stuff tightly in the nyck of the bottle and said, 'I'll touch this off, toss it in the lake and heaven help the fishes. If argued against such ussportsmanlike slaughter, and Mike got rattled. We were standing on a maked rock. Mike's foot slipped that infermal bottle dropped from his hand, and we-

"No, we were not blown to kingdon come, for Mike just grabbed the bottle an inch or so from the rock. He throw it out in the lake. There was a con sion, a vast jet of water shot up in the air and hundreds of fluttering dead and air and hundreds of fluttering dead and dying fish lay on the surface. I couldn't was close enough. he suggested returning to the camp, and he was the guietest man in the outfit for the next month. vents.

Due thing seems to be admitted by the toinger Tories, who are Canadians after than worshippers of the status up, namely, that it is time for Canada assume her commercial independence to become sufficiently independent at any rate to entitle her to grant tariff "From that day to this I have been

just a trifle discreet as you might say. I don't nose around powder mills or try to investigate chemical works, and when I go back to mining the infine who they

fire in our shack will get out of camp
before he's a minute older if I catch
him."—New York Sun. The Greeley Colony. In considering the net results of Greeley colony it is, first important to note

It presents a striking contrast to the Fourier experiments from which it may be said to have descended. Each man The American distiller can make it for less. First of all, be uses corn almost entirely and pays only 15 or 30 cents per bushel for it. Our distillers, have to pay 7½ cents in duty alone besides cost of transportation from the United States. There the duty alone is 00 cents per ton; here the duty alone is 00 cents per ton; here the duty alone is 00 cents. Then the American distiller has and other products and letting colonial sell the spirits but from the still and the market, that is, the same man in the same man in the same man in the same man in the same had been available for stores, banks and small industries, it is likely that much because the construction of capitles and same man in the same ma

itiative would have been undertaken by the colony. In that case we should find broader lessons in co-operative effort or than ye do now:

It is also broader by two men who would reflect companies to private in two men who would reflect companies. They gether. During the evening or the product of the produ It is also important spirit There was here no common religious tie, as in the carly New England colonies; no shadow of persecution such as that which bound the Mormon pioners together in an indissoluble brotherhood. The nearest approach to this influence was the prohibition sentiment and this formed but a small part of the original plan. These colonists were carnest men and women who had gone carnest men and women cylo had gone forth to make hones white they could combine industrial independence with sooial equality and intellectual opportunity. They were grainly determined to accomplish what they had undertaken. This spirit and this alone kept them from going to neces during the first day. The preliminary spouting on the tariff closed last week and a couplejof wooks should suffee to put it through commitfrom going to pieces during the first flye years and laid the foundation for their

The Week's Commercial

9,978 bushels as against 80,088 bushe ypar ago. The carnings of the Grand Trunk Rail way for the week ended April 21 we 18/8,265, an increase of \$6,779. Stocks of wheat at Fort William a. Port Arthur are 8,889,666 bushels repared with 3,486,224 bushels

There has been some improvement in cotton securities since the changes in the tailff have been announced. Dominion cotton has, however, re-acted some from the best prices. The visible supply of wheat in the United States and Canada decreased 778,000 bushels last week, and the total is new 36,201,000 as compared with 57,-946,000 bushels a year ago. The amount affont to Europe increased 800,000 bushels and the total is 17,520,000 bushels as against 27,680,000 bushels a year ago. The visible and amount affont combined aggregate 23,721,000 bushels, which is nearly 30,000,000 bushels less than a year ago.

year ago.

The note circulation of Canadian thanks increased slightly during the month of March, and the total is \$1,083,500, which is about half a milling in gress of a year ago.

Dansitis on mild by the bear made public, have been made public, happears and conviction for oase the Bapner came acregated and now gives the state of Miss Sarah Ls.

The note of the convergence of the convergenc libn in excess of a year ago. Deposits on demand increased over \$2,300,000 last nonth and the total is \$67,456,000. Time deposits are practically unchanged at \$126,191,000. The discounts of Capadian lanks are heavy; the total at the end of March being \$213,232,000, an increase of \$4,500,000 for the month. Over due dobts re \$8,869,000. Cash assets show an in-sease. Species held now amounts to \$8,-47,000, and Dominion notes \$14,956,000. he amount due our bunks by agents in reat Britain is \$7,965,000, and the mount due from Urited States is \$15,-

\$4,000. Railway securities b over \$12,500,000 The Strangest Books.

The first anthology was a Greek poems, eigrans and other small pleces by Archibochus, Sappho dos, Meleager, Plato and others, between \$80 and 95 B.C.

In. 1471 at French beron differed a bledge of, 10 marks of silver that a copy of Avicenna awhich he desired to read, would be returned, and even security, equal in our money to his request was refused,.

It is asserted by typographical authorities that the first Bible printed in America was "John Eliet's Indian Bible," in 1663. The language into which this Bible translated is extinct, and it is said only one or two persons The "Book of Common I'm

prepared by the command of Henry VIII., in 1546 It underwood several revisions, but the second, made in the reign of Edward VII., very nearly approaches the prayer book as used to day in the Church of England. The prayer or the royal family was introduced James I.

Some white neckties, but returned with is also important to, note that the information that, while he found a store open, the proprietor could not sell deal and, undoppromising public him a thing, as it was after hours and he was afraid of a boycot.

This announcement can

less defamation, especially when Goddard pulled out a necktie and quietly re-marked that he took it when the proprietor wasn't looking and would pay him for it in the morning. It was not until Goddard had fished out two more, similarly abstracted from the Becker agreed to attend the he discovered that he needed a shave "Oh, that's all right," said Xerkes. "I have a safety with me, and I'll give you a shave that'll make you think o, have been a barber."
"What in the name of hos safety?" said Becker. "Never you mind," said Yerkes.
"Just lie back in the chair and go to sleep. I'll wake you up when I get

his hands behind the chair and went at him with a lawn mower razor. It was a beard of a week's growth, and the opera tor pulled and sawed with vigor. During the scrape, through which Becker yelled and swore and shed tears, a man from the next room came in and asked:—
"What in thunder are you tearing the paper off the wall for!'
This did not disturb the imperturbable
Yerkes one bit, but it made Becker
swear, plead and threaten all the harder.
Nevertheless Yerkes held his victim
down and shaved him to a finish. Then
he remarked ...

down and shaved him to a finish. Then he remarked:—

"I haven't any, bay rum, or, in fact, anything to put on Becker, but I want to say that the face would turn an edge on a corncutter. If it hadn't been for the fact that the barber shops were all dlosed there'd been danger of a boycott if a barber had shaved you, I never with the job,"

When Becker got his breath, he sat up in the chair with a wild look, and

up in the chair with a wild look, it? Well; I want 'to it? Well; I want 'to say that I'd rather have my whiskers pulled out by a corn sheller every time."
"Why?" asked Yerkes. "Wash't that a good shave?" ye led Becker. "Why, who in the name of heaven and earth ever heard of a man being shavel with

out lather?"
"Well, I'll be cussed!" Yorkes replied quietly. "I thought I had overlooked something by the way you howled and kicked."—Helena Independent. No Marriages in Korea

One year ago the Queen of Korea was assassinated, and because she has been unburied no marriages have been allowed to take place since then. No fond pair may marry while the King or Queen is dead and unburied. The Queen's mourning husband cannot bear to have her officially interred. For a year, then, passionate Koreans have been kept apart. Recently a fox entered the royal park, and as Koreans have a superstition regarding the fox the unwedded lovers took the appearance of the animal to be a good omen. The King does not see it in the same light.—New York Press.
