They are the best of friends, Si Richard never goe back on a colleague who is under fire, but sticks to him all the closen Mr. Tarte is the target for overy editor, correspondent and liar-onspace who is hard up for something to write about, but thus far not a particle of evidence has been adduced to show that he has done wrong either in the Drummond County or any other transktion with which the Government has been connected. (In the contrary, investigation will demonstrate that he has been grossly maligned by the Tories, and that whatever of boodling has been done in the Irummont case lies at the doc of some of their own leaders. Mr. Tarte is as honest a man as there is in public life; he was too henest for the Tories, hence, their system tised onshught upon

I know from the best source that the stories about his being about to build a "mansion" in Montreal and about his sons spending money like water are puro a mansion" in Montreal and about his sons spending morey like water are puroromance. He is as poor as a churchmouse and is quite satisfied with his modest home on St. Denis street. His sons work hard at La Patrie and may make some money out of it in time, but at present have no hing beyond a trilling salary and are as frugal and economical as Example Canadian.

Mr. Tarte's Position. The notion that Mr. Tarte forced him self upon Mr. Ladrier is also without conduction it is chiertained, I dare say, by some Liberal members from Quebec who thought they had a claim to Cabinet positions; all the same it is errone out. Tarte worked like a Trojan for four years as Liberal organizer in Quebec. Hd got next to n thing for his services, tof the Liberal party was poor, and when the campaign closel in June, 1896, was up to the neck in debt. But instead of demanding a Cabinet office, as the rumor mongors have it, he asked to be allowed to fromain in privale life and atting to remain in private life and attend to his newspaper. He had been defeated in Beauharnols because instead of attending to the constituency he was away working

Far from that, he has been sinscientiously trying to live down the estand as a Minister has been seruluous to a degree it avoiding even the appearance of will. This will be established at the contract of the c ppearance of evil. This will be established at the enquiry. He asks for no nercy from Liberals or Torics either but merely to be fairly judged once the evilence is made public. I venture to product that after the investigation the bries will come to the conclusion that bey had better let Tarte alone.

The Attackson Mr. Laurier. They may have more success with their forts to burks M. Laurier's visit to france. For a fertnight or more comfrance. For a farmight or more com-numications, dyidently from Canada, have been appearing in the French pross-designed to inflaning French opinion against the Premier by describing him as an Anglo-maniac and flaming John Hull. The French are not on the best of terms with Englan just now and may be influenced by these attacks. The ques-tion is how the Quebec writers who are pillorying Mr. Libitier as a superformation is how the Quippee writers who are illorying Mr. Laurier as a superloyal British subject contrive to uphold their own reputation for loyalty. It is a paltry lusiness if ever there was one. But such

If Mr. Laurier should decide to visit Rome the valiant Protestants of the Mail and Empire are sure to accuse him of selling us to the Pope; while their Ultramontane allies in Quebec will swear that he is a bad Catholid, an enemy of clerical schools and a free-thinker. The letter of Mgr. The Capadian Pacific is noted for its energy and will probably "make a record" for rapid gönstruction with the Crow's Nest. The Government will, it is thought, give a bonus for the extension of the line from Robson to the Boundary Creek country, about 100 miles. Some think this end of the road should be commenced without any very great delay. think this end of the road should be commenced without any very great delay. The Boundary Creek region is rich in low grade ores which can be turned to account with cheap fuel.

There is a report that the Heinze people, who were refused a bonus at the recent session for the projected line from Robson to Pincteon, intend to begin building and trust to luck. The British and trust to luck. The British

The safest thing the Ottawa Government can do, therefore, is to let the Heinzes and Brother Hill understand that if they choose to fulld a line they will have to grant running powers to the Canadian Pacific, inassinch as Canada is detentined to retain control of coordinate is determined to retain control of overy portion of British Columbia. The railway returns, which are a good commercial barometer, are every week, and, unless there is an unexpected set-back, the revival in trade should be well under way by the fall. It is not likely to amount to much in the States till the question of burrency reform is permanently settled, and of course we cannot look for a "hoom" in Canada till our neighbors are really prosperous. The lumbermen here are pleased that lumber has got off so easily under the new American tariff, for the United States is by odds the best market we have for the cheaper and coarser arades. The crops in Eastern are not looking quite as well as those in Western Ontario. In Quebec, where there was an exceedingly wet spring, they are backward and light though the recent hat spell has helped them along. In Manitobathey never looked better. With good lack the harvest up there will beat all former ones for there was an unusually large area of new land s wn.

The crow's Nest undertaking has put heart into the British Columbians and Manitobans. All the supplies will be States till the question of burrency re-

They go from St. Vincent to the penitentiary at Dorohester, N.B. Mr. Noxon and Mr. O. K. Fraser have done valuable work for the country onco they began their enquiry at Kingston, and honorable mention should also be made of Mr. Eilbeck, the secretary, who has been abused in the Tory papers for doing his duty in a thorough but kind and considerate way. Mr. Foster, an Ottawa official, is acting warden at St. Vincent, would particularly syarn, boys who carply smokes is rarely known to make a man of much energy of character, and he generally facts physical and muscular, as well as mental, energy, would particularly ayarn, boys who captued a while ago to the British Columbia pebitentiary and now to St. Vincent, is spoken of here as likely to be

The evidence shows that of late, years at any rate the Government inspection has been somewhat of a farce, simply because the inspectors have been too casy-going and not disposed to unearth scandals. not disposed to uncarth scandals.

There is a belief in Mortreal that a good part of the Tory cambaign fund used in that district came from the large outlays on capital account at St. Vincent. It may be difficult to prove it. But according to all accounts the commissioners will have a shocking story to tell of the waste of money and private tob.
