Vinnipeg, Sept. 28.—On the way up n Owen Sound everybody was talking wheat and mines, mines and wheat. own big loads of wheat and flour and

The Canadian Pacific boats are taking down big loads of wheat and flour and returning to Fort William with big cargoes of merchandise. The new elevator, with a capacity of 800,000 bushels, will be finished in a few days. The present one has a capacity of 250,000. There are plenty of cars and no time is lost in rushing the export grain to Montreal or in supplying Ontario millers, who want Mapifoba wheat to mix with their own. At a moderate estimate there are 2,500,000 bushels for export in Manitoba and the Territories. In some districts it is not turning out quite as well as was expected at the thresher, but it is a fine, bright sample, and, though there has been a slight drop within the last few days, the price is a good one.

The cargo of the "Alberta" on the vary of jackage freight. There was sugar, iron and groceries from Montreal wall-paper, bedsteads, stationery and groceries from Toronto, lard and hardware from Hainliton, doors and sashes from Ottawa, saddleby from Guelph; stoves from Brantford, "candles from Peterboro," The Wheat Roptes.

The Wheat Roptes is a growing and marketing the cost of growing land marketing the cost of growing and marketing the cost of growing in the sason's operations, besides the interest earned on the land, or a return, including interest in a profit of ext in the sason's operations, besides the interest earned on the land, or a return, including interest cannet of over \$100 per acre. Between Fort William and Rat Portage three or four thousand prospectors are at work. They will return when the cold weather sets in. Ten or more mines are being worked with good results, the one ost talked of being the Olive at Mines Centre and the Mikado.

most talked of being the Olivo at Mines Centre and the Mikado.

The Export of Wheat.

I fancy, however, there is quite as much money in raising wheat in Manitoba at 75 or 80 cents. There is a regular procession of wheat trains day and right between Winnipeg and Fort William. At Port Arthur the C.P.R. has an elevator of 300,000 bushels, used principally for cleaning smutty grain, but Port Arthur is on the whole rather dull. Fort William is the active receiving and shipping point. There are three elevators of 1,500,000 is being built. The wharves at the mouth of the Kaministiquia are lined with vessels unloading coal and loading grain. A few years ago a lake was regarded as a leviathan, but to day Ameridan steamers like the "Carnegie" to Buffalo and on the Suffalo was 11% cents, it was possible to send a bushel of wheat from Portage la Prairie and Brandon to Liverpool via New York for 25 cents—a feat which disposes of much. t of a tumbler that holds our Years ago Proof the Grand ia. There were lk on all kinds curiosity of all t of little round orange. They were brought round filled orabet brim with the fanous allo brewed nathe college. These, we are told, were Brandon to Liverpool via New York for 25 cents—a feat which disposes of much of the wild rhetoric about the Canadian speedily shown pty it was placed upon the table mouth balance is the solution of the solution perfect was the its proper posi-ed again. No

Pacific monopoly. Just now lake rites having advanced, the cost to Liverpool is a little more, but it will be down again in the spring.

It is not easy to ascertain the relative more and availing the Market will be down. be table mouth perfect was the lits proper posited again. No the spring.

It is not easy to ascertain the relative prices prevailing in Manitoba and at points inmediately south in Minneseta and Dakota. Of course one can get the south in Manitoba and at points inmediately south in Minneseta and Dakota. Of course one can get the sewspayer reports without trouble, but it so not always safe to accept them for the same trained of the same trained and being may be such that the uniter is "running wild." as grain men or the time being may be such that the uniter is "running wild." as grain men or the time being may be such that the uniter is "running wild." as grain men or the time being may be such that the uniter is "running wild." as grain men or will be such that the uniter is "running united its an abnormally high price at Grand-Forks or Red Wing on the American side. The traines so succession All Souls' and he finds that the Manitoba farmer thing a shade the best of it. Linkt year he had by far the best of it. Linkt year he had year.

a philologist.

The Farmers' Position.

Has wheat-growing paid at the low prices of recent years? That it has is, think, sufficiently demonstrated by the growth of Manitoha. Wheat is the staple and it seems obvious that if wheat-raising had not been profitable—in other words, if the community had been running at a loss—we should not see such unmistakable signs of prosperity as are of prosperity

no mistake. The Winnipeg Commercial tells of a farmer at Alexander who has which includes the cost of ploughing, sowing, harvesting, threshing and marketing. He reckons his land to be worth \$10 an acre, which at 6 per cent. would make in interest of \$900 a year and he allows as much more for interest on his

in connection with wheat growing.

000 or three times as much went to Eur

and at large. In addition, Montreal sent as in scellaneous assortment of staff for the Crow's 'Nest Pass road and there were several tons of mining tools and mining outfits for the Sault and British Colimbia, which came from Torong, and elsewhere.

The Gold Eind at Michipheoten, There is a rush to the Michipheoten, River, where gold, both quartz and placer, has been discovered. At the Sault a dozen of our passengers got off for that land of promise, but the majority of the prospectors get there by the Canadlan Staffer of William with 190,000 bushels for Buffalo and New York. We have spent \$60,000,000 on the St. Lawrence of as securing the grain trade of the Northwest is concerned.

Northwest is concerned.

William the "Rosedale," a Canadian steamer left for Prescott with 73,000 bushels will have to be lightered at Port Colhorne, slipped to Port Dalhousie by rail and re-loaded when the vessel gets there. At Prescott the entire cargo will have to be taken out and transferred to harges going through the canals to Montreal On the same day the American steamer "Bleiman" left for William with 190,000 bushels for Buffalo. She goes straight there in a 20-tempola without the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the control of the same day the canadian strained the canadian ering and inside of six days, the grain will be in heard the local steamer at New York, whereas the ordinary trip to Montreal takes twelveldays; that is, the grain men count on its taking from 12 to 14 days till the which is afford at Montreal in an ocean vessel.

This tells the whole story. Deepening the canals below Proscott to 14 feet will not help us much. To fight the Buffalo route successfully if would be programmed.

route successfully if would be necessary to deepen the canals from the Welland eastward to 20 feet, which would gost a mint of inoney. Buffalo receives 130,000,000 bushels of grain during the season from the Western and Northwestern States, it is carried to New York by rail States. It is carried to New York by rail e and canal at an exceedingly low rate. I The rate from New York to Livernool is three pence half penny just now or something over 7 cents. At New York there are always steamers in plenty and the Montreal game of squeezing shippers by corralling space cannot be played. The diversion of the wheat tradic of the Northwest to American channels cast titudes the Northwest to American channels east work from again, he considering all we have spent on canals.

Mr. Greenway's Hond. It is possible that we may get some of the traffic back when the road from Parry Sound is going. But, to tell the Parry Sound is going. But, to tell the truth, Minitobans have not much faith in that route. I John't know why, but in that route. I John't know why, but they seem to be settled in the conviction that once the Canadian. Pacific has hauled the grain to Fort William the route of least resistance—the chepest route, in short—is John'd to be by Binfialo. Mr. Greenway's scheme for building a road from Winnipeg to Dullith would, of course tend all the more to turn the traffic over to the Americans. Whatever chance Montreal may, have of Whatever chance Montreal may, have o

The Price of Graib.

The When wheat fell a few points last week some one started the report that there was a combine among grain buyers and millers to run down the pride. There is no such thing. It is an impossibility. The only practicable means of keeping the price down below fair market value would be for the farmers themselves to combine and refuse to accept the right figure, and this they are not likely to do. A combine aniongst buyers and millers is simply out of the question, for, a saming one could be engineered at the thousand and one points where they are competing, there would be nothing to hinder the farmers from shipping grain direct to Buffalo or Montreal, New York or Liverpool, and thus frustrating the conspiracy. The Canallian Haelfoc code not afford to tolerate for a day the exist. The Canallian Haelfoc code of a buying combine; it would have to smash is at all hazards and the readlest why of smashing it would be to help the farmer to send ble grain.

chee of a buying combine; it would have to smash it at all hazards and the readlest twity of smashing it would be to help the farmer to send his grain straight to its indicated to straight to its indicated is frequently done in the ordinary course of trade.

The implement men are doing a fine business: Collections are coming in well and there is a-brisk demann for machines as the wheat area will be greatly augmented next spring.

Things Have Changed.

When I was here fourteen years ago the Farmers' Union was in full blast and one of the chief "kiokers" was a farmer at Griswold, an Ontario man with a keen note for a grievance. Yesterday I discovered that he was stopping at the Manitoba, the swell hotel. He is on his way to Ontario for a holiday. He goes every year after harvest. "I found," he said, "that there was more money in raising wheat than in raising bell. I came here in 1878 and have had my ups and downs. But I have 350 acres under tillage, a stone house, barns, implements, cattle and sheep, everything of the best and all paid for, besides money in the bank, so I consider I have done well. This is bound to be a great country. An era of prosperity is setting in; at least I never saw a better feeling abroad. You couldn't get up an agitation among the farmers to-day, no, not if you prodded them with a fork."

a fork."
They tell in the States about a Populist farmer, on his way to a meeting where he was about to describe the hope-

apparent on every hand. Winnipeg has grown into a solid city, with fine stores, well-to-do merchants, many beautiful residences and an air of thrift and comfort everywhere, and the same may be said in their place and measure of Brandon and the Portage. The best proof, however, that wheat-raising has paid to the fact that the farmers have been paying off their debts to the loan companies and implement men.

This year they are on Easy street and of us used to worry old Van Horne. My, how Van used to cuss! Sam once offered him \$50 a month and board to drive oxen. He used to cuss so bed that at last my wife wouldn't let me go on deputations of the customer with the customer with the customer was a customer with the customer with the customer was a customer with the customer with the customer was a customer was a customer with the customer was a customer with the customer was a cus

at home and work. I guess that's partly how I came to quit agitating." GATINEAU The Week's Commercial Summary.

current prices for cago are 30c per bushel mo

Attorney-General McKenna's decision that goods from foreign countries coming into the United States, over Canadian railways were not subject to an extra duty of 10 per cent. has had a favorable effect on C.P.R. stock, which is higher in consequence.

The general tenor of alvices from

The general tenor of allvices from most lines of trade at Montreal continues of a favorable character. As a sign of returning confidence it is stated that many dealers throughout the country are showing a disposition to buy more liberally, and anticipate their wants, instead of ordering in the hand-to-mouth way which has characterized business of late. late.
The visible supply of wheat in the United States and Canada is now 17,-140,000 bushels, an increase of 1,374,000

years ago 39,355,000. The amount of passage to Europe is 23,750,000 bus! Is as compared with 23,520,000 bushels a year ago. The world's shipments last week were very lange, being, over 10,000,00 There is no particular change in the trade situation at Toronto. In all branches of wholesale business there is a umerous, and prices of staples are firm. Payments

staples are firm. Enyments in Canada were light this week. Indications are that all bankes have been weeded out. and that good times will I and that good times, will be temporary.
