Sporting News

The Shelburne club have entered protest against six of the Aberdeens. viz: Stephenson, Ashley, Whitney, Mc-Qualg, Ross and Sproule. Their plea is that these six players being members of the Markdale club participated in a game of lacaosse at Walkerton on May 24th in contravention to the constitution of the C L A. The protest will be defended but it will be a few days before the the judicial committee can render their verdict-Guilty or not guilty. If the ruling of the committee

is unfavorable to the Markdale club it will mean the suspension of that club for the season. The Shelburne club have just about reached the end of their tether. In former years they may have had a wining team; last year they had not. Not.

having a winning team they had reyear, being minus the team but also plus the goal nets, an umpire is almost a superfluity so that they now carry their petty one-horse grievances into court, hoping thereby to win a game which twelve of their best men failed o do on their own grounds.

RECT FROM WHEAT.

a Brend Which Is Said to D

Italy in the throes of a bread famine has devised a new form of that necessary article of food. It is called "antispire," and is the invention of M. Angusto Des-

and is the invention of M. Augusts Desgotte, which does away with the work of a miller. For several weeks the establishment in Rome in the Via Minghetti did a rushing business, until the novely wore off and opposition bakers reduced their prices on white bread.

The "natispire" bread is made directly from the wheat, and a great saving in the manu acture is credited to it. After the wheat has been thoroughly sifted and cleaned it is subjected to a bath in tepid vator for several hours. When it has thus been soaked it is poured into a machine which reduces it to a homogeneous paste. This machine is composed or a double like of thin spirals working in opposite directions. By these spirals the softened wheat seeds are well kneaded. At the end of the spirals is a double cylinder

wheat seeds are well knowled. At the ord of the spirals is a double cylinder which receives the paste and makes it still more compact and ready for shaping into loaves and baking.

The quility of the bread made by the new process is variously estimated. Excellent judges and unprojudiced practical bakers admit its excellence and say any taste can be suited by having due regard to the leavening, manipulation and treatment in the over. Italian experts who it is a suited by having due regard to the leavening, manipulation and treatment in the over. Italian experts who proporties and pronounce it most nour-ishing. In color the "antispire" bread is

The English church people had a garproperties and pronounce it most nour-ishing. In color the "antispiro" bread is very brown; its oder is agreeable and taste quite pulatable. A cardinal virtue talained for it is that it nover gets moldy and will remain "fresh" for days.

The representation of Union.

The representation of the state of the s among Christian men. It binds all these together who profess the name of Christian to feel the totological matters among Christian people are largely due to the manifold-ness and stality of the revolution which they all adeept. Not, indeed, that any of us will prize less dearly those aspects of the faith which we have found most holoful to our own souls, but this we see that there may—may must—be, in seplenteems a revolution, stores of grace upon which we correstees have not drawn. Christian mon. It binds all those who profess the name of Christ A surprise party was held at the Rev-

And so we are led to a larger charity; "Ecoping curselyes in the love of God as wellook for the morey of our Lord Jesus Christ und sternal life." ght of opinion is in favor of a amount of good, pure candy children with or soon after moderate caten by their food, and that it is not only not it their root, and that it is not only not to the least detrimental, but is positively beneficial. It is the cheap sweets manu-factured out of injurious compounds that have drawn upon the practice the edition of medical men. Pure sweets contribute

upon which we ourselves have not drawn

aluable force to the human system, and cell not be feared. A Chicago physician laims that one can sourcely out too much pure chocolate. Now, if this authority would only go a little farther and toll us how we are to know the pure from the impure, a great burden would be lifted from many mothers who are unxlous told right and yet are equally unxlous to surribute to their children's
