A little close study of the question will give us an abundance of both fall and winter eggs, and increase the profits of the business.

What reason is there to believe that the Czar would seize the present occasion to enter a chalition against England? Such a step on his part would obviously cast the gravest doubt on the sincerity of his motives, in proposing the recent peace conference. Then, again, how could his Finance allinister. unfair treatment. Its greatest sin seems to be that it has saved its policy-holders about forty millions of dol ars which its competitors would have taken from them, and to this charge it pleads guilty. But why it should be abused for working for the peo-ple's interest is difficult to under-stand, unless it is on the principle that the most clubs and stones are always found under the best apple tree, and no doubt the insuring public will take that view of it. Indeed, it looks as though the the question of the future would be whether the public are to work for the stockholders of insurwork for the stockholders of insurance companies, or their own families, as the business seems to be drifting into the hands of a few manipulators. In other words, is it to be life insur-

Had the law been carried out and justice done the association, i would have shown nearly two million dollars of a surplus. This is the strongest endorsation the association could possibly get. Not only so, but to the thoughtful mind it means that

of thousands of policy-holders will end in inspiring still greater confidence in the association, leading on to still greater achievements in the future, making thousands of homes happy at the lowest cost consistent with aba The very men whom the shoulderers thought to please have long since been disgusted with their self-elected cham-
