

# FROM BONNIE SON

NEWS FROM THE HIGH AND LOWLANDS

Many Things Happen to the Minds of Auld Scots Sons.

Dundee chimney sweeps formed a defence association.

General Ian Hamilton inspect the Glasgow Boys this month.

Dumfries has resolved a public house on the Glasgow system.

There were 1,608 deaths in Glasgow last year, a death rate of 20.1 per 1,000.

Glasgow is cheered with the thought that Lord Roberts may visit the city.

The widening of Clunie Brae, bridge is one of the Port Glasgow improvements.

There were 6,951 persons approved for crime in Dundee last year, an increase of 1,280.

The Dundee Tramway Committee have decided to remove all cushions from tramway cars.

Mr. Alex. Ewing, long a respected resident in Dumfries, has reached his hundredth birthday.

The Temperance party in Perth have entered the "war path" with vigor and enthusiasm.

The Glasgow School Board have decided to supply spectacles to children with defective eyesight.

The Musselburgh authorities have decided to go on with new municipal buildings at a cost of £8,000.

Three thousand five hundred "Dundee" children have been enrolled in Glasgow for rifle shooting.

An old lady in Govan has been spared to see the death of her only great-great-grandchild, a boy of about 12 months.

The new gasholder and other extensions at Coatbridge were opened on the 19th ult. The cost of the extensions has been £22,000.

One Edinburgh clergyman is of opinion that it will be impossible to get a good Christian to take charge of the museum on Sundays.

The Edinburgh School Board are exhibiting a collection of photographs, illustrating life in factories and industrial schools in Scotland.

Quip-Quip and Dundee are at £10, which Dundee claims for the loan of a fire engine on an emergency.

The Edinburgh ladies who are bent on securing Parliamentary suffrage continued together lately and took a gloomy view of their cause.

A vegetarian who filled his sweetheart in Glasgow because she persisted in eating beef, has had to pay £50 as solatium for a vivisection.

Dr. Jamieson keeps step with the march of civilization. The first billiard table ever installed in the town was formally inaugurated the other day.

Govan Unionists presented Mrs. Duncan, the wife of their candidate, with his portrait in oils and a gold bracelet set with sapphires and diamonds.

Dr. Jamieson has lost an old landmark in a large tree which stood in Maxwell street and braved the storms of a century. It was hewn down on the 16th ult.

Rogers & Co., Port Glasgow, have received an order from the American Oil Company of London for a four-masted steel sailing ship.

Dr. Jamieson John Andrews, of Paisley, has lived under five British sovereigns. He was born on the 18th of June, 1815, the very day the battle of Waterloo was fought.

Harvey's Yoker Distillery, Limited, has fallen on evil times. This concern, which was floated on glowing prospectus promises, has this year made a loss of £3,695.

An advertisement has a modern Samson who feels his strength on his thighs and left them lying in the roadway. He did it for fun, but had to pay 30s for the caper.

Tarbolton Literary Society have elected Rev. Mr. Higgins, who has been president for 17 years, with a walking stick and ball barometer, and a gold bracelet to Mrs. Higgins.

# NO JOY IN LIFE.

SO SAY THE SUFFERERS FROM CHRONIC DYSPEPSIA

Trouble That Makes the Life of Its Victims Almost Unbearable—Causes Headaches, Heart Palpitation, Dizziness, a Feeling of Weariness, and a Dis-taste for Food.

From "L'Avenir du Nord," St. Jerome, Que.

Sufferers from dyspepsia or bad digestion are numerous in this country. Almost daily one hears some one complaining of the tortures caused by this malady and it is not uncommon to hear a sufferer say "I wish I was dead." And indeed, the suffering caused by indigestion cannot be imagined by anyone who has not suffered from it. The victim is a constant sufferer from headaches, heart burn, heart palpitation, and nausea. He has a taste in the mouth, is unable to obtain restful sleep and has always a feeling of weariness and depression. There is a sure cure for this trouble and it is found in the greatest of all known medicines—Dr. Williams' Pink Pills for Pale People.

Among those who have been cured of this distressing malady by Dr. Williams' Pink Pills is Mr. Alfred Hastot, a well known farmer living near St. Jerome, Que. To a reporter of "L'Avenir du Nord," Mr. Hastot told the following story of his illness and subsequent cure:

"For three years I was an almost continual sufferer from the tortures of indigestion. After eating I felt as if some heavy weight was pressing against my chest. I was racked with violent headaches, my temper became irritable, my appetite uncertain, my nerves were a wreck and I was always troubled with a feeling of weariness. I was able to do very little work and sometimes none at all. Although I tried many remedies, I was unsuccessful in my search for a cure until a friend advised me to try Dr. Williams' Pink Pills. Any doubts I may have had as to the merits of these pills were soon dispelled, for I had not been taking them long before I noticed an improvement in my condition. I continued the use of the pills some weeks when I considered myself fully cured. To-day I am as well as I ever was in my life, and would strongly advise all similar sufferers to try Dr. Williams' Pink Pills, and am sure that they will find them beneficial as I have.

Dr. Williams' Pink Pills, cure by going to the root of the disease. They make new, rich, red blood, strengthen the nerves and thus tone up the whole system. Sold by all dealers in medicine or sent by mail, at 50 cents a box or six boxes for \$2.50, addressing the Dr. Williams' Medicine Co., Brockton, Ont.

# THE MOST HOSTILE WAR.

One of the Greatest Conflicts of Modern Times.

The cost of war must be counted in blood and money, and there can be no doubt that the which began with Napoleon's assumption of Imperial power, and lasted by land and sea until the Armageddon of Waterloo, was in both senses the most hostile in human history. It is practically certain that the war which ended in the downfall of Napoleon did not cost less than five hundred million lives within four years. During this period Great Britain's national debt was increased to \$500 millions, and of course the debts of other countries were increased proportionately.

Next in proportion would come the American Civil War which is perhaps one of the bloodiest on record. 520,000 men were killed on the side of the Confederates, and the North was \$80,000,000. The cost in treasure was \$1,400,000,000. Next is the Crimean War with the loss of 750,000 men and about \$250,000,000. Then comes the Franco-German War of '70 and '71 in which France lost 55,000 men and Germany 60,000. The cost of this war was, in round numbers, \$300,000,000. The bloodiest battle of modern times was that of Leipzig, during which 80,000

# THOUGHTLESS WOMAN.

Mr. Krusty—Well, it's too late now now you've come to my office and tell me all this.

Mrs. Krusty—Why, I didn't think you stop at your office.

Mr. Krusty—That's just like you. You'd just stop to think occasionally, perhaps you would have thought of it.

# THE ETERNAL FEMINE.

Mr. Pepprey—For goodness sake I want to prevent you going on a vacation.

Mrs. Pepprey—Well, there's the vacation we can't take it along.

Mr. Pepprey—But Mrs. Nexclore she'll be glad to keep it for us.

Mrs. Pepprey—I suppose so. She'll tell her some of our family secrets.

# WORK HORSES IN HOT WEATHER.

Mr. Henry P. Hills gives his management of work horses in hot weather.

The management of the horses in hot weather is of much importance to the farmer and owner of horses. I have had the care of horses for nearly fifty years and know there is much in the treatment of this valuable animal to get best results. There is much to be gained by proper feeding and watering of this useful servant. For hard work I think the best feed is a ration of oats and corn about half and half, with plenty of good hay. Horses thrive best, I think, when the oats are cut and mixed and dampened with water and a small quantity of bran added. But feeding shelled-oats with some bran added is also a good plan, dampening the same. In mixing the ration a small allowance of salt should be added. In hot weather I water my horses at least six times a day, and find it pays. Before going to work and about eight o'clock, then before and after dinner, then again at four, and before feeding at night. The horse will look better, stand the work better, and have better health generally. For a horse to fill himself with a large quantity of water just before meals is not the right way to insure good digestion, or to avoid colic, etc.

I also find that a bucket of water after supper and before breakfast is often relished in hot weather or when feeding dry feed. During working hours the horse should have an occasional rest of a few minutes each hour when the work is very hard. At night a comfortable stall with dry bedding is essential. Very warm nights I prop the doors open and fasten with bars. A lattice door could also be used. I also find that an occasional nip of grass for a short time is beneficial and almost necessary as it is the natural food of the horse. During the hottest nights of summer when the weather is dry and the pastures short I often turn the horses out in a near-by lot or pasture for which they make known their gratitude with whinnies and nickerings horse-fashion.

# NOTHING LIKE BEING CAUTIOUS.

He walked into the chemist's shop with a hesitating step and glanced nervously at the rows of bottles, with a scared look in his pale blue eyes. After fidgeting about uncertainly for some time he at last caught the eye of the assistant and, beckoning nervously, he went to a secluded corner of the shop, where the assistant was surprised by finding a trembling forefinger hooked tensely into one of his button-holes and an eager face thrust suddenly almost against his.

What's the matter? asked the chemist.

I s'pose you can lay your hand on the morphine bottle, can't you? said the stranger in an anxious whisper.

Yes, sir. Certainly, replied the astonished salesman.

An 'I reckon if you was pushed you could find the strychnine in a minute or two?

Of course.

Mebbe the arsenic hasn't got lost or mislaid clear beyond findin', if you just had to, has it?

Assuredly not.

Can't the sugar of lead bottle couldn't get away from you if it tried?

No, indeed.

An' chasin' up the vitriol to its lair would be just play for you?

My dear sir, of course I am familiar with all the drugs here.

But s'posin some of the other fellows had been changin' them around just as a joke, you know?

What do you mean?

Suppose the bottles had got mixed up?

Impossible. Besides everything is plainly labelled.

But there ain't no chance of your givin' off arsenic acid for pepper-mint?

Not the slightest.

Well, I've half a notion to risk it. Yes, you may give me five cents worth of pepper-mint, young man.

## ON THE FARM.

### FEEDING AND BREEDING.

The feeding of the dairy cow begins the day it is born. The little calf should be fed a ration that will keep it growing and thriving but not one that will put on much fat. When about two weeks old begin giving a little clover hay and a little wheat bran dry; begin early to feed a large amount of roughage so as to enlarge the digestive organs. The calf should be so fed that when she becomes a cow the food she eats will be used in the production of milk rather than fat. It takes a certain amount of food to sustain life and the return we get from the food she eats above the amount necessary to her maintenance, so it pays to feed liberally.

A balanced ration should be fed by all means. Timothy hay, corn stover and corn meal might be liberally fed and still the cows be starving, so far as milk and butter making is concerned. Food containing much protein is necessary. The remainder of the ration may be raised in abundance on the farm and some of the protein foods, but a part of it must be bought in the form of cottonseed meal, gluten feed and so on. A good ration is about 40 lbs. of silage, 4 lbs. wheat bran, 2 lbs. cottonseed meal, the cottonseed meal contains about 1 lb. of protein and the bran about 1/2 lb. At noon good clover hay should be fed. A small teaspoonful of salt should be given with the evening meal. But suppose this ration is given and then the cows turned out and allowed to go to the creek and drink ice water and stand around a straw stack all day. No benefit would be derived, as the feed would be all consumed in heating the body. The cow must have a warm, light, well ventilated stable, a place where she may stand or lie comfortably and contented, and half the battle is won.

In choosing a breed be sure to choose a good dairy breed. After choosing a breed stick to it and breed to a pure-bred sire of the same breed, and family, and then keep in the family. Don't mix breeds and then expect to produce all the good qualities and blot out all the bad, for it is uncertain business. By all means raise your own cows. Have the calves from the best cows of the best breed, and the best of them will prove to be as good, if not better than their dam. The Babcock test and the scales are the best means and the only practical way of distinguishing the quality. A good plan is to weigh the milk of each cow once a week, morning and evening, and keep a record of it, and then test it three or four times a year, mixing a little from four milkings as a sample. In this way the amount of butter produced by each cow is ascertained, and it is easily determined which cows should be kept and which sold. This is the only way to get together a good dairy herd. Send your milk to some good creamery, or make a prime article yourself, build up a good market and stick to the business through thick and thin.

# COMMITTED SUICIDE.

How the Boxer Leaders Put an End to Their Lives.

A Chinese paper published in Peking has obtained the following details relative to the deaths of the high officials Chau-Chu-Chiau, Yung-Chien, and Prince Chwang, who committed suicide on command of the Emperor. It is impossible to give the full report, as the details of the actual suicides are given with true Chinese barbarity and unadorned lucidity. The whole account, however, bears the stamp of truth, and the statement of the Chinese court that the three officials had paid the penalties for their crimes, hitherto approved, may hereby be considered as confirmed. The report runs:

Chau-Chu-Chiau ate gold leaf, which is the distasteful method of taking one's life among the well-to-do Chinese. Death is caused, not by poisoning, as is generally assumed, but by asphyxia, as the thin gold leaves stick in the air passages. Hoping against hope, however, that the Emperor would have mercy on him, he took too little, and as he still lived when the time prescribed had elapsed, he took opium and other means to effect his death. His religion forbade him to do this by injuring his body in any way.

Prince Chwang, who received the news of his sentence in Bu-Chofu, a large town in the southwest of Shan-si, immediately hanged himself in a temple of the local mandarin, with whom he was living, in the presence of the Imperial Commissioner, Ko-Pan-Hwa. He used the white silk cord sent him by the Emperor, as a significant sign of the mitigated punishment.

Yung-Nier, the President of the Court of Censors, was the most cowardly. He was in prison in Singan-fu, and continually upbraided Prince Ching "for leaving him in the lurch." He suffocated himself with earth heaped on his head, so his death was kept hidden some days till the decree was published. Prince Tuan anticipated his banishment, and on receiving the sentence at Ninghsia, a town on the Mongolian frontier, whether he had fled, proceeded at once to Turkestan, lest the allies might still demand his death.

# A MANITOBA MAN.

## ONE OF THE LINKS IN THE LONG CANADIAN CHAIN OF DIRECT EVIDENCE.

Testifies to the Powers of the Famous Dodd's Kidney Pills—Cured of Backache Like Thousands More.—Spreads the Good Work Among His Friends.

Onk Lake, Man., Aug. 12.—Frank Colleaux, of this place, has turned missionary. A conscientious sense of duty has impelled him to spread a certain good work among his friends and neighbors. The work in question is the work of Dodd's Kidney Pills.

Some time ago Mr. Colleaux was cured of Backache. He has it for years. Though he didn't know it, his kidneys were affected, and it was his kidneys that caused him so much misery.

But he found relief. He did more, he found a positive cure. He read that Dodd's Kidney Pills Cure Backache. So he did; they've cured thousands of cases of it, simply because they act on the Kidneys with such splendid effect and thus get at the cause of that fearful disability.

So Frank is spreading the good tidings among his friends as fast as he can. If he meets a man suffering with Backache he tells him right straight what is really the matter with him and recommends Dodd's Kidney Pills. In this way he is the means of helping many a poor victim of Kidney Disease who might never have understood that in Dodd's Kidney Pills he has a sure escape from his affliction.

"It gives me a great amount of pleasure," says Mr. Colleaux, "to recommend Dodd's Kidney Pills to all my neighbors and friends. I can testify to their excellent curative properties for Backache because two boxes cured me."

# DO YOU KNOW.

Do you know that every cruelty inflicted on an animal in killing or just before death poisons to a great extent his meat?

Do you know that every cruelty inflicted on a cow poisons to a greater or less extent its milk?

Do you know that fish killed as soon as taken from the water by a blow on the back of the head will keep longer and be better than those permitted to die slowly?

Do you know that birds destroy millions of bugs, mosquitoes and harmful insects, that without the birds we could not live on the earth, and that every little insect-eating bird you kill and every egg you take from its nest means one less bird to destroy insects?

Do you know that a check-rein which will not permit a horse to put his head where he wants to, and to kick where he likes, is a cruel torture to the horse?

Do you know that the mutilation of a horse by cutting off his tail compels him to suffer torture from flies and insects every summer, as long as he lives?

Do you know that every kind word you speak to a dumb animal will make not only the animal but yourself happier, and not only make you happier but also better?—G. T. Angell.

# CISTERS FOR THE COWS.

Cows in order to do their best and give us the greatest amount of profit must have ready access to pure drinking water at least three times a day in summer. Farmers who have no wells or springs on their land should dig a few large cisterns around their buildings and see to it that the supply of water is constantly replenished by each rain.

Cisterns will be one of the best investments they can make, for they are not only useful in summer, but in winter as well. During the cold days water freshly drawn will be drunk in pails full, whereas a few swallows would suffice if sucked through a hole in the ice.

# WILLIE'S IDEA OF IT.

When Willie came home the other night he was more convinced of the uselessness of schools than he ever was before. Asked the nature of his latest trouble, he explained that "postpone" had been one of the words in the spelling lesson of the day. The teacher had directed the pupils to write a sentence in which the special word should appear. Along with others, Willie announced that he didn't know the meaning of the word, and so could not use it in a sentence. The teacher explained that it meant to "put off," and encouraged the youngsters to try. Willie's thoughts were on pleasanter things than school, and his made-to-order sentence was: "Boys postpone their clothes when they go in swimming."

# A BAD OUTLOOK.

Harriet, if we don't have rain soon, the corn crop will be ruined.

"Oh, Harry, how dreadful! you know we hate canned corn."

So Frank is spreading the good tidings among his friends as fast as he can. If he meets a man suffering with Backache he tells him right straight what is really the matter with him and recommends Dodd's Kidney Pills. In this way he is the means of helping many a poor victim of Kidney Disease who might never have understood that in Dodd's Kidney Pills he has a sure escape from his affliction.

"It gives me a great amount of pleasure," says Mr. Colleaux, "to recommend Dodd's Kidney Pills to all my neighbors and friends. I can testify to their excellent curative properties for Backache because two boxes cured me."

# DO YOU KNOW.

Do you know that every cruelty inflicted on an animal in killing or just before death poisons to a great extent his meat?

Do you know that every cruelty inflicted on a cow poisons to a greater or less extent its milk?

Do you know that fish killed as soon as taken from the water by a blow on the back of the head will keep longer and be better than those permitted to die slowly?

Do you know that birds destroy millions of bugs, mosquitoes and harmful insects, that without the birds we could not live on the earth, and that every little insect-eating bird you kill and every egg you take from its nest means one less bird to destroy insects?

Do you know that a check-rein which will not permit a horse to put his head where he wants to, and to kick where he likes, is a cruel torture to the horse?

Do you know that the mutilation of a horse by cutting off his tail compels him to suffer torture from flies and insects every summer, as long as he lives?

Do you know that every kind word you speak to a dumb animal will make not only the animal but yourself happier, and not only make you happier but also better?—G. T. Angell.

# CISTERS FOR THE COWS.

Cows in order to do their best and give us the greatest amount of profit must have ready access to pure drinking water at least three times a day in summer. Farmers who have no wells or springs on their land should dig a few large cisterns around their buildings and see to it that the supply of water is constantly replenished by each rain.

Cisterns will be one of the best investments they can make, for they are not only useful in summer, but in winter as well. During the cold days water freshly drawn will be drunk in pails full, whereas a few swallows would suffice if sucked through a hole in the ice.

# WILLIE'S IDEA OF IT.

When Willie came home the other night he was more convinced of the uselessness of schools than he ever was before. Asked the nature of his latest trouble, he explained that "postpone" had been one of the words in the spelling lesson of the day. The teacher had directed the pupils to write a sentence in which the special word should appear. Along with others, Willie announced that he didn't know the meaning of the word, and so could not use it in a sentence. The teacher explained that it meant to "put off," and encouraged the youngsters to try. Willie's thoughts were on pleasanter things than school, and his made-to-order sentence was: "Boys postpone their clothes when they go in swimming."

# A BAD OUTLOOK.

Harriet, if we don't have rain soon, the corn crop will be ruined.

"Oh, Harry, how dreadful! you know we hate canned corn."

# Thanks, dear Mr. Brandy for your advice about 40¢

## Manson Ceylon Tea

I have tried it & must say it is most delicious - my husband says that breakfast is something to look forward to.
