Men

eyed, alert, the model soldier and the best lighter in the world. Lord Kitchener called on the columns who took part in the 'drive' to perform a task, which, I venture to say, no general has ever asked of his troops before. The thing was done with willingness and an eagerness which proved that the commander-in-chief knew his men. Not a single column marched less than 70 miles, and was no halt or off-saddle. Many murched 80, and some ... companies and squadrons nearly 90 miles. It forms a record for marching in South Africa, and, I venture to assert, anywhere else. From 6 o'clock one evening until 8 the next is a weary time for a man to be in the saddle, but it was passed cheerfully by all the columns, and the last 'drive' deserves to rank as one of the finest performances of the

THE MOUNTED INFANTRY.

British army.

"It is difficult to leave the subject without a reserence to the work of the Regular Mounted Infantry. There seems to be an idea abroad that the driny is composed of small units of infantry thrown into a lump together with a horse and a bandolier and dubbed a mounted infantry battalion. There may have been a time when this was partly true, but it no tonger holds good. We have now in the field battalions of mounted infantry which have made for themselves a tradition, and possess an esprit de corps unsurpassed by any our crack regiments. If you ask mounted infantry soldier now what he belongs to, he no longer gives the name of his regiment, but that of his mounted infantry battalidn. Officers carry on their shoulder the number of the mounted infaitry battalion to which they beong, and not, as formerly, the iamo of their regiment. They have one through a hard mill but they lave come out of it magnificent specimens of soldiers. Who would lave dreamed two years ago that he would see soldiers who at that time ell on their horses on the least provication, galloping at Boers and iring from their horses at the galop 1 And yet it is not an uncomnon sight. Every trick of the Boer s now known by our men. They have the dash of the old Peninsular fivily, with the cunning of their respect enemy: They are proud to degree of their mounted infantry padge, and can never return to the americas of infantry work. There is guent feeling among both the men end the officers that at least the rst dight original battalions should ecome permanent. A great percent-

or 12 years if they can remain nounted, but they will leave the irmy the moment the war is over f their time is up and they are expected to return to their regiment. These battalions have made for hemssives a name, and to disband hem back to their different infantry egiments would be a loss to the rmy which only those who have erved out here can properly ap-

## POOR DIVESTION.

RENDERS THE LIFE OF THE

DYSPEPTIC MISERABLE

dyspepsia is one of the worst to endure. Its victims find life almost a burden. Food becomes distasteful: they suffer from severe pains, in the stomach; sometimes excessive heart pa pitation, and a general feeling of reakness and depression. Though this disease is one of the most distressing, it is one which, if the proper remedy is employen, can be readcured. Thousands throughout this country bear testimony to the officacy of Dr. Williams' Pink Pills as a never failing cure. Among them is Mrs. Adolphe A. Latrousse, a well known and highly esteemed lady residing at Sorel, Que. She says:-For two years I was a constant sufterer from bad digestion and its accompanying symptoms. Food became distastaful and I grew very weak, I suffered much from pains in the stomach and head. I could not obtain restful sleep and became unfit for all housework. I tried several medicines without finding the least relief and I continually grew worse until in the end I would vomit everything I ate. had almost given up hope of ever being well again when one day I read of a case similar to mine cured through the use of Dr. Williams Pink I determined to give these a trial and am happy to-day that I did so, as by the time I had taken eight or nine boxes - my strength had returned, the pains which had so long facked me disappedred, my stomach would digest food properly and I had fully regain-

ed my old time health, and have not sin e had any eturn of the trouble." Ur. Williams' Pink Pills are a purely tonic medicine and unlike all purgalives; do not weaken the system. but give life and energy with every They are a certain cure for rheunatism, sciatica, indigestion, partial paralysis, St. Vitus' dance and the functional ailments that make the lives of so many women an almost constant source of misery. Sold by dealers in medicine or sent postpaid at 50 cents a box or six boxes for \$2.50 by addressing the Dr. Williams' Medicine Co., Brock-

PREDICTING THE WEATHER SURPRISING DISCOVERY

When Sun and Moon Repeat Themselves Weather Will Do the ...

MR. HUGH CLEMENTS.

Same. Mr. Hugh Clements, of Dulwich, any spot on the earth's surface, held one long ear very straight and that there is not be announces as a "coronation year the earth seem to go on just as be wagged both wisely, as if to say, done for Mr. Page Hugh Clements, of Dulwich, son can predict the daily height of the barometer, the temperature and the direction of the wind in any part of the world for any day in the future.

It is a large order. As may be imagined, the moon has a good deal to do with it. Mr. Clements has been at work on this subject for twenty years, and to a London Daily News baby is peevish, cross or unwell, it were swung around toward him and representative he confided some of is an unfortunate fact that too many he found himself buckled between his results.

He started out on this great inquiry in the interests of agriculture, and put the little one into an unin any direction, and an effort was while possessing all the qualities of and carefully compared the weather natural sleep, but do not remove the made to fasten the canvas belt under milk in concentrated form, except records with the motions of the cause of the trouble. What is want him. planets. Nothing came of it except ed to make the little one bright, Then Old Crow understood that the is completely soluble in water, and as moreury will -urely de-troy the genee of planets. Nothing came of it except that he incidentally discovered the cheerful and well, is Baby's Own cause of sun spots; But when he excapt the motions of the motion of the motions of the motion of weather is "not an outcome of blind teed to contain no opiate or other chance," but of fixed laws," and is a function of the phases of the moon."

Meton, in the sixth century, B.C.,

The cost of reduction. Exemple the kicking gear was under conclude the kicking gear was under conclude the chief kicking gear was under conclude the fixed laws," and is a function of the phases of the moon."

Wellow the fixed laws," and is a fixed laws, "and is a law to the flour made from skim milk can be sold for about 13 cents a pound. Meton, in the sixth century, B.C., made the first discovery in meteorological science, when he found that ish that I had to walk the floor with of shoes, yet he was not in the least producing it. the moon has a

CYCLE OF NINETEEN YEARS. Then Hippgrchus found that the ies; "during which the human mind seemed to sleep," and then came Copernicus, who was followed later by Clements:

It has been left to the latter to piece together all the discoveries of

the motions and relative positions of Co., Brockville, Ont. the earth, the sun and the moon repeat themselves the weather will do the same. All the tides and air currents will be the same, and the weather in each place will be what of the duchess of Sutherland to Rus-spring gun. But the man was out

about each other without repeating their motions until you consider the case of the earth, the sun and the moon. The nineteen year cycle of the eclipses is a mere trifle. There is also the cycle of 18.6 years performed by the moon's nodes in careering round the ecliptic, and the performence is done in such a giddy and unstable fashion that the moon oscillates five degrees on one side and then five degrees on the other. Then the moon's apse declines to fall into step either with the nodes or with the cycle of eclipses, and makes a round of calls on the plane of the

the fact is of no use, because we

THE WEATHER ON THAT DAY. Then, to be strictly accurate, you must allow for the earth's irregularities, as well as those of the moon and the earth is well known to have Feeling of Weariness, Pain and Depression Ensus.

From LeSorelois, Sorel, Que.

Of the diseases afflicting mankind of paradise.

And the earth is well known to have a slight lurching, movement which produces the procession of the equinoxes. Taking this into account the sun, earth and moon have not exactly repeated their relative movements since many thousand years before Adam and Eve took possession of paradise.

of paradise. There is snother difficulty which would have daunted any man with less intellect than Mr. Clements, Sir Robert Ball told us two years ago that changes in the distribution of polar ice cause the earth to alter her axis, and to hitch the equator up a few miles here and there, much as a NEW INVENTION TRIED WITH seaman adjusts his belt. This was very disrespectful of Sir Robert Ball. The equator had never been attacked like that before. But it is to be feared the charge is only too true. This business about the equator is the most awkward of all for Mr. Clements. The other motions to be dealt with are periodical. The pro- machinery has just been tried at St cession of the equinoxes is rather di- Louis with success. It was mule latory, taking 25,867 years to com- versus machine in a shop at Tenth plete, but still it does work round at and Walnut streets, a few days ago, last. THE PSYCHOLOGY OF HAIR: Coarse black hair indicates power of character, with a tendency to senstality. Straight stiff black hair and beard indicate coarse, strong, rigid and straightforward personality. Fine hair generally denotes exquisite sensibilities; flat, straight hair a melancholy but constant habit. Harsh, upright hair is the sign of a reticent and sour spirit, a

sign of a reticent and sour spirit, a stubborn and cruel character. Coarse red hair and whinters are accompan-ied, by violent arimal passions, but some force of individuality. Auburn hair, on the contrary, denotes the highest order of sentiment and intensity of feeling, purity of thought and the greatest capacity for pain or pleasure. Crisp, curly hair, we regret to say, is indicative of a hasty mpetuous and rash character, and generally, light hair is characteristic of a sympathetic and indolent constitution. There is no doubt that the coloring matter of the hair may be in some way affected, or may af fect, the disposition, for it is an odd thing how often the sulphur in red hair or the carbon in black appears in the individual's acts and thoughts.

## THANKS FOR BOTH.

OWN AND HIS WIFE'S GRATITUDE,

A Strong Letter Written With the Noble Purpose of Trying to Benefit Someone Else.

St. Hippolyte, Que., May 12. (Special)-Mr. L. A. Paquin of this village has written for publication the following letter. In it he speaks for both himself and his wife. The letter reads:

"After much suffering I had become unable to work. I had Kidney Trouble which gave me great pain.
"My wife had used a box of Dodd's

Kidney Pills for a similar trouble sometime before, and as they had completely restored her to good health I made up my mind to take a treatment myself "I was not disappointed, and I can now say that I have tried and proved Dodd's Kidney Pills to be the

greatest medicine in the world. "We are now both quite well, and able to do our work as well as ever. "We have found Dodd's Kidney Pills to be a remedy, which saves us the pains and trouble which we so often see in others, who are languishing and incapable of attending to their work.

'We keep Dodd's Kidney Pins constantly on hand, and use them occasionally if we feel the slightest indisposition. We have used altogether between us six boxes.

"Perhaps I should explain why I write this letter. It is because I feel there may be many others who It is because I have not heard of Dodd's Kidney Pills, or who, having heard, have not yet given them a fair trial, and to such I would say 'Give Dodd's I idney Pills a fair trial and you will agree with my wife and myself that there is not any other such med-
