DOCTOR JACK

By ST. GEORGE RATHBORNE Author of "Doctor Jack's Wife," "Captain Tom," "Baron Sam," "The Pauline of New York," "Miss Caprice," etc.

CHAPTER XXI. "Indeed—how?" "Did you not tell me you were here, that your word was law by the power I gave you, until he himself comes?"

"That ring—notice it, Senator Jack. It is the sign of my captivity, and yet it holds a wondrous power—at sight of it his slaves prostrate themselves before me."

"I cannot. On oath, he made me swear by everything, sacred not to give Jack Morton his freedom. His hatred for that man and you is something terrible."

"That is not true, Senator Jack. My feelings have undergone no change since first we met in Barcelona," she replies, quietly, and a glimmer of the truth begins to creep into his brain.

"I know you would not give me your plans, and I feared that disaster would overtake all, so I resolved to put myself in a position where I could save you at last, or, if all was lost, die with you."

"I have ever seen," Avis has said of them. "Avis—yes, I should despise and hate her because she has stolen what I hoped belonged to me."

"How came you here?" she continues. "On the same train as yourself, but you did not know it. There are a good many things Doctor Jack does not know—for instance, that I was aware of the visit he made Monsieur de Fréchet of Police in Paris, and guessed what his intention might be."

"You see I did not warn the pasha?" "You see I did not warn the pasha?" "You see I did not warn the pasha?"

"You have it in your power to assist me."

FOR FARMERS

Seasonable and Profitable Hints for the Busy Tillers of the Soil. POULTRY NOTES. Suitable Food for Ducks. — Ducks, like hens, eat a great variety of food...

Spore the Pullets. — When filling the fattening crates or pens with chickens, spare all the best pullets. They are certain to be needed this winter...

"I have considered that. They will find no one on board the Thistle down with the city, and orders will soon be given for departure, arranged the very night would see us beyond the Golden Horn."

"The vision at the little window disappears—Mercedes has gone to battle again to secure with the great sorrow of her life and Jack's only at the blank white walls where the new-closed trellis shutter marks the fissure."

"I am more than ordinarily nervous over this affair—so much is concerned in it, and there so many chances of trouble, any one of which must upset their calculations."

"Good sheep will not remain good unless well cared for. See that every lamb loses its tail in proper time and of proper length."

"In the formation of a flock of blood-breeding ewes, uniformity of character is essential. It is very important to maintain and utilize both the wool and mutton qualities of the flock."

"Clark M. Drake throws out the following hints to those who contemplate retiring from the country to 'enjoy' town life, and they are worth pondering: 'Remaining on the farm where the mind and hands may be occupied, and still severe labor be avoided, is really an ideal life.'"

"When you meet with pale, weak women who complain of lack of vigor and vitality and suffer more or less in a feminine way, you can be almost sure that they did not have proper care at that critical period in their lives when the functions of womanhood were developing."

"These physiological changes usually take place at a time when girls are bending every effort to succeed in their school work, and are depriving themselves of the outdoor exercise, rest, and sleep which is so important at this time in order to keep up good health in the face of the strain which is put upon the whole system."

COMPLETE DIAGNOSIS

"You have appendicitis, and I have trouble," announced the physician, as he peered through the patient's legs...

town, where he has no business to occupy head or hands. He leaves away his time in an arm-chair, a hammock. I can see that he is losing ground in physical and mental powers. His days will be less and less enjoyable than if he had managed where both mind and body might be occupied. Unless something is done, it is better to die than to live like this."

ICE ON THE FARM. It is not unfair, we believe, to state that not one farmer throughout the country provides his family with a supply of ice for the summer season. And, yet, it is the very important element of preserving health, as well as pleasurable addition to the life we use. This is a little less than a necessary of life. But in many cases of serious illness it is one of the best medicines true in fever, hemorrhage, etc.

THE WOOL GROWERS. Good sheep will not remain good unless well cared for. See that every lamb loses its tail in proper time and of proper length. Good tender grass is the best promoter of the health of the sheep. Sheep can be fattened rapidly and economically with good pasturage and a little grain.

STAY ON THE FARM. Clark M. Drake throws out the following hints to those who contemplate retiring from the country to 'enjoy' town life, and they are worth pondering: 'Remaining on the farm where the mind and hands may be occupied, and still severe labor be avoided, is really an ideal life.'"

BUSHEL BOXES OF APPLES. Speaking of packages for apples, J. H. Halsey, well-known fruit grower, said recently that in his opinion the bushel box was not the proper package of the future, but of the past.

POISONED BY HIS BOOTS. A young man of nineteen the other day had his yellow boots blackened by an unlined dye at a Paris boot-maker's. After wearing the boots for one day he was suddenly taken ill and developed symptoms of poisoning. He was removed to a hospital, where he lay for a few days in a precarious condition. The Paris physician, in consequence of the man's illness, ordered all boots blackened with aniline to be seized.

"I hear Boreen is working for one of the big railway companies. I didn't suppose he knew enough for that. What sort of a job has he got?" "Toys—'He listens to the complaints of people who have been injured by the company. By the time he has talked to them for half an hour they are willing to give up their claims just to get out of his hands.'"

"Dr. Chase's Nerve Food keeps in supply in excess of the demand. Mrs. Capes, 38 Morse street, Toronto, says: 'My daughter has been using Dr. Chase's Nerve Food for nervousness, paleness, and a run-down system, and I can say that her health has improved very much under this treatment. She used to complain of being tired in the morning, her appetite was poor, and she had lost her weight. Since using this medicine I can see a great change in her looks, her nerves are steady, and she is feeling very much better in every way.'"

A Critical Time in Woman's Life

The Wonderful Benefit to be Obtained by the Use of Dr. Chase's Nerve Food.

When you meet with pale, weak women who complain of lack of vigor and vitality and suffer more or less in a feminine way, you can be almost sure that they did not have proper care at that critical period in their lives when the functions of womanhood were developing. These physiological changes usually take place at a time when girls are bending every effort to succeed in their school work, and are depriving themselves of the outdoor exercise, rest, and sleep which is so important at this time in order to keep up good health in the face of the strain which is put upon the whole system. When your daughter gets pale and listless, seems to lose interest in her surroundings, and suffers from stomach pain and headache, you may be sure that her nervous force is being exhausted more rapidly than it is being created, and that her nerves and body generally are crying out for more blood, for rich, life-sustaining blood. As a treatment for growing girls, Dr. Chase's Nerve Food has the highest endorsement of all that has been tested. Its virtues, it is successful in affording the extreme luxury of being rich in the blood—increasing the quality as well as the quantity of the blood—creates new nerve force. Blood and nervous force are consumed at a tremendous rate during the trying time, and Dr. Chase's Nerve Food keeps in supply in excess of the demand. Mrs. Capes, 38 Morse street, Toronto, says: 'My daughter has been using Dr. Chase's Nerve Food for nervousness, paleness, and a run-down system, and I can say that her health has improved very much under this treatment. She used to complain of being tired in the morning, her appetite was poor, and she had lost her weight. Since using this medicine I can see a great change in her looks, her nerves are steady, and she is feeling very much better in every way.' Dr. Chase's Nerve Food, 50 cents a box, at all dealers, or Edmondson & Co., Toronto.
