THOUSANDS UNDER RUINS. EAT NO BREAKFAST NOW

MANCHESTER PEOPLE HAVE A NEW IDEA.

Health Culture Society Says Food Is Not Needed After

Sleep. Manchester has been the cradle of many notable movements in Exc Tho term "Manchester School" has in recent years carried a significance outside the domain of a signification where it still stands for free-tradeism, anti-expansionism and individualism. The Manchester 13 plo are now pioneers in a movement which has survived the first ordeal of derision and in redulity. The cry in Manchester to-day is "No break

last," as the cry a Keneration ago The new crysade is being waged are expected to make more rapid Physical Health Culture Society, of which many prominent citizens are members. The Lord Mayor pre sided at a large meeting of the sorecounted their personal experience in going without their breakfast. The : physiological basis of the plan is thus expounded by a medical be

Properly digested food only stores waste muscular tissue, su piles heat and force and toess the brain and nervous system. The brain and nervous system control and give power and action to all the muscles of the body, including the stomach Mis power of the brain is rom rest and sleep alone, and

NOT PROM FOOD digestion of food is a tax upor brain energy and it s necessary hat the tax should occasionally During the sleep comparafively little waste occurs. Food is not so much needed after a long sleep as after prolonged work. Al curative power is brain energy. After this statement the laymen of Manchester defended the doctor's statement of their faith. One robust young man said that he began last June on the no-breakfast plan. Re had severe headaches on the second and third days and intermittent head che during the first week. The second week he became convince that it was an entirely good thing and lewas of that opinion now lie a cup of cocoa at mofning and took at night. They must not, he said, belittle the morning pang of hunger It is the very real thing at first, but it disappears. He took his first ment at 12.15 p. m., and the second at 6.15 p. m. He felt that he had derived great benefit from the plan.

Another young athlete who rises at 5 in the morning said he took his first meal at noon and the second in the evening. He said the best thing was to avoid the chaff of companions by not talking about the matter. He advised experimenters not to tel their friends when they began, as the after would be sure to say that they

the breakfastless idea was in saying that the brain did not supply en rived their power from digested foot und blood tissues. What the brain did was to liberate muscular ener y as required.

hether or not the new school has any sound physiological basis it is centainly making converts in Man hester The speakers did not touch on the questions of local conditions hough it is probable that a man't ceing in the morning in the humid egyy hir of Manchester is not the saine as in the exhibitanting atmosphere of this country. Even the is threatened with a coal thriftee on change from London to America has known to have the result of giving a man a hearty appetite for a
