

PREFERRED DAYLIGHT.

A housemaid who had borne the pain of a troublesome tooth for several days, in the hope that by enclosing a little money and a patient she might avoid the expense of a dental operation, was finally obliged to go to the dentist one evening to have the tooth extracted.

A WINTER SCOURGE.

La Grippe or Influenza Responsible for Hundreds of Untimely Deaths.

La Grippe starts with a sneeze and ends with complication. It lays a strong man on his back; it tortures him with fevers and chills, headaches and backaches. It leaves him a prey to pneumonia, bronchitis, consumption and other deadly diseases. You can avoid la grippe by fertilizing your system with Dr. Williams' Pink Pills. They protect you; they cure you; they up-build you; they banish all evil after effects. Dr. Williams' Pink Pills ward off all winter ailments. They cure all blood and nerve disorders. They are the greatest blood-builder and nerve tonic that science has yet discovered. We know this to be the solemn truth; but we do not ask you to take our word alone. Ask your neighbors, no matter where you live, and you will learn of someone who has been cured by Dr. Williams' Pink Pills; after other medicines had failed. It is upon the evidence of your neighbors that we ask you to give them a fair trial if you are sick or ailing. Mrs. Emma Deuce, St. Bullard, Que., says: "Words can hardly tell how pleased I am with Dr. Williams' Pink Pills. I had an attack of la grippe which left me a sufferer from headaches and pains in the stomach. I used several medicines, but nothing helped me until I began the use of Dr. Williams' Pink Pills. When I began them I was weak and very much run down. The pills have completely cured me and I not only am strong as ever, but have gained in flesh. The genuine pills always bear the full name, 'Dr. Williams' Pink Pills for Pale People,' on the label around every box. Substitutes can't cure and to take them is a waste of money and endangers life."

COAL THAT DEFIES MINERS.

4,000 Feet Is the Limit at Which Coal Can Be Mined.

Beyond the depth of 4,000 feet the physical barriers for coal mining appear, under existing conditions, to be insurmountable. Increase of temperature is the chief obstacle in penetrating to a greater depth than 4,000 feet. At a depth of only 3,000 feet the temperature of the earth would amount to 98 degrees. A further depth of 200 feet is thought possible, however, at which point the temperature of the air would be equal to the heat of the blood. This would give a depth of 3,420 feet, beyond which point the continued sinking of the shaft becomes purely speculative; but it is assumed that a depth of 4,000 feet may ultimately be reached in coal mining. The effect of pressure is another obstacle. In the Deekfield colliery, pressure became so powerful that it crushed in circular arches of brick four feet in thickness and in one case a pillar of cast-iron, twelve inches square, supporting a roof only seven feet in extent, was snapped in twain. It is estimated by the Royal Coal Commissioners that the English coalfields contain beneath the mining limit of 4,000 feet no less than 1,480,000,000 tons. This gives a hint of the workable stores of coal beneath the hickable limits which science, combined with invention, will some day find a means of bringing within the reach of human needs.

A MOTHER'S DELIGHT.

Is to See Her Little Ones Healthy, Rosy and Happy.

All mothers delight in seeing their little ones bright, rosy and happy, but unfortunately all mothers do not use the best methods to gain this result. We give you a new and soothed stuff, believing they are soothing him—but the result is just the opposite, as these soothing stuffs are poisonous and dangerous. Baby's Own Tablets should always be used and they will be found a prompt relief and speedy cure for all the minor ailments from which little ones suffer. All experienced mothers use these tablets and all mothers who use them praise them. Mrs. S. M. Black, St. Peter's, N.S., says: "I have used Baby's Own Tablets for most of the ailments from which little ones suffer and I find them the best medicine I have ever tried. No mother should be without them in the house."

These tablets are good for children of all ages and can be given with absolute safety to a new born babe. Sold by druggists or sent by mail at 25 cents a box by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont. Send us your name on a post card, and we will mail you a valuable little book on the care of infants and young children.

Tourist in retired village? "So that's the oldest inhabitant? One hundred and four years old? No wonder you're proud of him? Nature 'I guess' has done no work in this place 'cept to grow old, and it's took him a right o' time to do that."

Breathing Disease.

Infectious diseases are breathed into the system from those affected with disease or from bad smells; yet how many women breathe daily the offensive steam from common soaps made from rancid fats, and keep their hands for hours in such solutions, and the clothing from such soaps is worn next the tender skin. No wonder disease and eczema are prevalent! Users of Sunlight Soap—Osgood, Benson's difference between that and the pure healthful smell from the vegetable oils and pure edible fats in Sunlight Soap. 208

TUBERCULOSIS IN CATTLE EXPERIMENTS TO ERADICATE THE DISEASE.

Some of the Main Practical Conclusions Which Were Arrived at. A series of valuable experiments has just been completed at Storrs Agricultural Experimental Station, Connecticut, with a tuberculous herd of cows. The results of the efforts to eradicate the disease with a minimum of financial loss are of enhanced importance in view of the fact that, with all the heated discussions are going on all around us concerning the relation of tuberculosis to human public health, controversialists have too often lost sight of the practical utility of experiments. Here, therefore, we have something tangible upon which to act.

In 1896, the Connecticut Agricultural College owned a herd of about fifty head of cows and young cattle. Prior to this date the herd consisted of grade animals, mostly of Jersey and Guernsey blood, but in that year 15 registered Jerseys, Guernseys, and Ayrshires were purchased. Since that time the acquisitions to the herd have been from the natural increase of these animals, and the occasional purchase of grade cows. Up to October, 1897, the entire herd was untraced, but in November, 1898, a cow which had dropped a strong, vigorous calf in the previous August, and from New Year's day to the first of November in the latter year had yielded 292 pounds of butter, fell suddenly ill, as if there were no hopes of recovery. She was slaughtered in November, 1898, a post-mortem examination showing a generalized and advanced case of tuberculosis. The herd was then tested with tuberculin when twelve animals responded making

A TOTAL OF FIFTEEN

out of a herd of forty-eight animals that had contracted the disease in one year, demonstrating how remarkably infectious it is. The following are some of the main practical conclusions arrived at from these experiments. The elimination of tuberculosis from a herd is a gradual process. One tuberculin test is not sufficient, as new cases will develop from time to time. All the herds represented in the herd were about equally susceptible. Twenty per cent. of the Jerseys, 26 per cent. of the Guernseys, 21 per cent. of the Ayrshires and 20 per cent. of the Holsteins responded to the tuberculin test. The largest producers in the herd were not more susceptible to tuberculosis than those of the least productive capacity. The disease was not inherited. None of the offspring of the tuberculous animals, 17 in number, have developed the disease. Repeated injections of tuberculin result in a failure to respond. Sixteen animals that had responded once to tuberculin failed to respond to the subsequent injections in ten out of 20 instances, or 50 per cent. The post-mortem examination of certain animals, which previous to slaughter were apparently in good physical condition, showed the disease extensive, violent, and evidently in the infectious state. The post-mortem examination of certain animals, slaughtered in some cases 16 months after first response, showed mere traces of the disease, which had then made little or no progress, and the encysted condition of the nodules might indicate possible recovery. The slow progress of the disease in certain animals, and the rapid progress in others, took place at the same time under the same sanitary conditions. Individuals, therefore, possess different powers of resistance to the progress of this disease when once it

HAS GAINED FOOTHOLD.

Whilst there may be animals showing physical symptoms of disease, there may be other animals in the herd in a condition to spread the disease. The farmer who wishes to completely eliminate the disease from his herd must aid the Government officials with some individual effort and sacrifice. Deter ventilation, exercise, sunlight, nutritious food, as preventive measures; the tuberculin test as a diagnostic agent; and either immediate slaughter or isolation of all reacting animals as a method of disposal—all these are agencies of which any farmer may make use.

What is known as the "Bang" or isolation method is economical when a large herd is affected, or when a small herd of valuable animals is diseased. The offspring are removed when dropped, and raised on the pasteurized milk. The disposal of the diseased animals may then be postponed until their increase shall make good the loss of numbers and which would be occasioned by their final disposal of the diseased members.

That much has been accomplished within the past few years in the anti-tuberculosis crusade, statistics show that human tuberculosis is on the decrease notwithstanding the latest consumption of both milk and meat. Statements often made, that bovine tuberculosis is on the increase, especially in dairy cattle, have not been proved. The increasing knowledge of the disease, of the efficacy of good ventilation, exercise, sunlight, and nutritious food in fortifying the system of the an-

Tea drinkers try "Salada" green tea.

imal; of the introduction of tuberculin as a diagnostic agent; of the use of disinfecting agencies and the method of isolation, should instill in the minds of the owners of our herds of cattle a greater confidence in their ability to combat the disease. These agencies are within the reach of us.

W. H. COARD, Dept. of Agriculture, Ottawa.

ROLL BUTTER.

The young housekeeper who told the fishman that she wanted some eggs, and when he asked her how much, replied, "About two yards of half," "Has a rival in this woman?" "I wish to get some butter, please," she said to the dealer. "Roll butter, ma'am?" he asked, politely. "No, we wish to eat it on toast. We seldom have rolls."

There is more cataract in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. A great many years ago doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it a constitutional disease and therefore required constitutional treatment. F. J. Cheney & Co., Toledo, Ohio, the only constitutional cure on the market, taken internally in doses from 10 drops to a teaspoonful, acts directly on the blood and mucous surfaces of the system. They offer one hundred dollar refund if it fails to cure. Send for circulars and testimonials.

F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Hall's Family Pills are the best.

FOR THE LITTLE ONES.

An A B C book, beautifully illustrated, is one of the latest advertising productions of Massey-Harris Co., Ltd., the makers of the famous Massey-Harris farm implements. By mentioning this paper and sending your name and address on a post card to the Company in Toronto you can obtain a copy.

WHAN THE LAMPS ARE LIT.

The children like to get an attractive book to read after supper—so do the old folks sometimes. We have pleasure in informing our farming readers that by sending their name and address on a post card to Massey-Harris Co., Ltd., Toronto, they will be sent a Massey-Harris illustrated, free of charge, for one year. It is a bright little magazine, containing many new pictures and some good reading. Don't forget to mention this paper, or you may not receive the journal.

Clara—"Did the newspapers notice your father at the great banquet?" Johnny—"Yes." Clara—"Well, mamma said she could not see his name in the list." Johnny—"No, but the list ends up with 'and others.' That means papa. They always mention him that way."

For ten months I suffered with Rheumatism; I could move neither hands nor feet, and felt excruciating pains in my whole body. A German friend recommended St. Jacobs Oil; the result astonished me, all pain vanished, and I was cured.—J. B. Hyland, Troy, New York.

"Well, well," he exclaimed, as he sampled her first pie, "where did you get this?" "I made that out of Mrs. Shouter's cook book," replied young wife. "It's a good one." "Ah!" he broke in, "this leathery part is the binding. I suppose?"

20 MILLION BOTTLES SOLD EVERY YEAR.

Gonquers is the absence of pain, and millions have been made happy through being cured by St. Jacobs Oil of RHEUMATISM, NEURALGIA, TOOTHACHE, HEADACHE, BRUISES, SCALDS, BURNS, SPRAINS, and all pains for which it is used. This oil can be applied, it never hurts, and it is the best remedy for all these ailments. It is sold in bottles of one dollar and in bottles of five dollars. It is sold by all druggists and by mail from J. B. Hyland, Troy, N. Y.

PLENTY ON HAND.

The thriftness of a London shopkeeper is illustrated in a story told of a dry-goods dealer. The merchant was of an excitable temperament, and on hearing his assistant say to a customer, "No, we have not had any more of that kind," was unable to contain himself such an admission. He strode his way to the assistant, and said to the customer: "We have plenty in reserve, ma'am plenty up-stairs." The customer looked dazed for a moment, and the shopkeeper did not seem happy when his assistant informed him that the customer was speaking about the weather, and had remarked, "We haven't had any rain lately."

TROUBLES OF AN EX-BEEVE.

WERE EASILY DISPOSED OF BY DODD'S KIDNEY PILLS.

W. G. Cragg, of Dresden, Had Inflammatory Rheumatism, and Was Cured Slick and Clean.

Dresden, Ont., Jan. 19.—(Special)—"Dodd's Kidney Pills cured me quick and clean of the Rheumatism," says W. G. Cragg, ex-creeve of this town. "It was the Inflammatory Rheumatism I had, and I think Dodd's Kidney Pills are as fine a remedy for that as I want. I am as sound as a bell now as far as Rheumatism is concerned."

This is Mr. Cragg's experience, and it is the same as many others. People generally here are learning that Rheumatism is simply a result of Kidney Disease, and that the kidneys do not do their duty and take the uric acid from the blood, it crystallizes at the muscles and joints and causes those tortures too many people know too well. "I had been troubled with Inflammatory Rheumatism for eight years," continues the ex-creeve. "I could scarcely get around to do my duties in my store. I tried doctors and medicines without getting any benefit; till I heard of Dodd's Kidney Pills. Six boxes cured me completely."

Cure the kidneys with Dodd's Kidney Pills and your Rheumatism will cure itself.

The presence of a mind of an impecunious lover was illustrated recently at a bar, where there was a still for the sale of watch-charms. "Oh, George!" she said, "buy me a charm." "Sarah," answered he, "you have too many already."

AN ADMIRABLE FOOD

EPPS'S COCOA FOR MAINTAINING ROBUST HEALTH IN WARM CLIMATES.

Butcher—"Come John, be lively now; break the bones in Mr. Sampson's chops and put Mr. Smith's ribs in your basket." "All right, sir, just as soon as I've saved off Miss Murphy's leg."

Philadelphia, Atlantic City, Baltimore, Washington, Old Point Comfort, and the South via Light Valley Railroad and its connections. Four fast express trains daily for Washington, Ashterville, Southern Pines, Charleston, Savannah, Jacksonville, St. Augustine, Palm Beach, Tampa, Miami, Nassau, Cuba, and all Florida and winter resorts south. Excursion tickets now on sale. For full particulars, illustrated literature, maps, etc., call on or address Robt. S. Lewis, Canadian Passenger Agent, 38 Yonge street, Toronto, Ont.

Minard's Liniment Cures Diphtheria.

EAT BUTTER.

The Purest Form of Fat It Is Possible to Eat.

Butter is so common a commodity that people use it and scarcely ever think about its value. It is the yellow cream of the milk of dainty cows that it is. Of course they know that it is useful in many branches of cookery, and that without its aid the table would be bare of its thin, cut bread-and-butter, its delicate cakes, and its other usual accessories. Beyond these uses the value of butter is a thing only vaguely thought of.

But this delicate fat is as valuable as the dearest cod-liver oil for weakly people, and doctors have frequently recommended the eating of spread with butter as a means of pleasantly taking into the body tissues, one of the purest forms of fat it is possible to get.

Butter is a carbon, and all excess of it is stored up as fat in the body. It gives energy and power to work to those who eat heartily of it. So it is not economy at table to spare the butter, even to the healthy folk. For anyone afflicted with consumption, butter-cookery, if plenty of fat can be digested, it is one of the best ways of curing the disease if it is in its early stages, or of keeping it at bay if advanced. Butter is not a simple fat, composed of merely one sort. It is a mixture of no less than seven different sorts of fat, and no more complex oil can be taken than this is.

Insist upon having the best deal and if your Grocer has your interests at heart he will give you Blue Ribbon.

Minard's Liniment Cures Distemper.

Cheerem—"O I come! Stop borrowing trouble." Glumey—"Borrowing? Gee whiz, man, trouble isn't like money. When I borrow money I can forget about it right away."

AN OLD AND WELL-KNOWN REMEDY. Minard's Soothing Syrup has been used for years by millions of mothers for their children's whooping cough, croup, colds, influenza, and all the ailments of the throat, chest, and lungs. It is a purely vegetable preparation, and is perfectly safe for all ages. It is sold in bottles of 25 cents and 50 cents. Send for circulars and testimonials.

Husband (reading the paper)—

What fools some men will make of themselves! "Wife—Well, Henry dear, what have you done this time?"

Minard's Liniment Cures Croup in Cows.

Witherby (savagely)—"Isn't it about time to have those windows cleaned?" Mrs. Witherby—"Why, they were cleaned only recently." Witherby—"How recently?" Mrs. Witherby—"Two girls ago."

When washing greasy dishes or pots and pans, Lovers' Dry Soap (a powder) will remove the grease with the greatest ease.

"Englishmen owe a good deal to the tailor," says a journal of the tailoring trade. "Quite so; and there is no doubt that the tailor would be very much pleased to collect if he could."

SOMETHING TO REMEMBER.

When traveling you should bear in mind the road and the trains that will take you to your destination in the fastest time, and in the most comfortable manner. In both respects, the Grand Trunk service excels in both particulars, and passengers from Toronto to Montreal, Buffalo, New York, Detroit and Chicago, will find the day trains equipped with vestibuled coaches, handsome Cafe Parlor, and Dining Cars serving meals a la carte. The night trains carry Pullman sleeping cars on all above points. You can get Toronto for Montreal and east 9:5 a. m. and 10 p. m. for Buffalo, New York at 9 a. m., 4:50 and 11:15 p. m. and to Detroit and Chicago at 7:35 a. m., 4:50 p. m. and 11:25 p. m. Tickets, reservations, etc., at city office, northwest corner King and Yonge streets.

Dear Sirs—I cannot speak too strongly of the excellence of MINARD'S LINIMENT. It is the remedy in my household for burns, sprains, etc., and we would not be without it. It is truly a wonderful medicine. JOHN A. MACDONALD, Publisher Arapric Chronicle.

HIS OWN FREE WILL.

Mr. Breezy (with hesitancy)—"There, I've hit the nail on the head at last." Mr. Breezy—"Why do you put your finger in your mouth?" Mrs. Breezy—"That was the nail I hit."

JUST LIKE BUYING RHEUMATISM.

We put the bills in your pocket and take away the malady. Isn't that just like buying it? There's the bunch of money you'll get out to get rid of the rheumatism if you buy prescriptions with it. It's a cure you want, not prescriptions.

SOUTH AMERICAN RHEUMATIC CURE.

pull the rheumatism out by the roots. No more doctoring, no more medicine, money saved; health saved, life saved. CURES IN 1 TO 3 DAYS.

Mrs. E. BISHOP, a trained nurse of Halifax, living at 23 Cornwallis St., writes: "I have been a sufferer for six years from rheumatism. Many doctors treated me, but relief was only temporary. I tried South American Rheumatic Cure, and after four days' use of the remedy, was entirely free from the disease."

SOUTH AMERICAN KIDNEY CURE

rich in healing powers, relieves bladder and kidney troubles in six hours, and in the worst cases will speedily restore perfect health.

AN UNSOLVED

Or The Mystery

CHAPTER VIII.

Mr. Percy Leicester stood on the steps of the Naval and Military Club. Mr. Leicester was one of the cleverest men in town, and just so many clever men about town, he had been everything; taken the honors at his university, won the eleven; stroked his boat; played the eleven; made a record at a dredger; created Brutus in A. D. C. He had begun in a church; he had graduated in a there. Beginning as an evangelist, he had written a novel which proved. He had then gone into an army, figured well in at least one campaign, and invented a new machine-gun. Having invented the machine-gun, he had retired from the army and for the law, as he said, in order he might obtain some favor from the law of his country, or subject of his. Every one knew that portion of the system of patent jurisdiction which treated the rights of patentees so perspicuous that he who read read. Just now he was not reading anything. He wrote a little, a little tennis, cricket, and a few really charming things, and a few religious subjects; laid down the social conduct of the race; was an excellent publicist on all sorts of subjects, from possible point of view; in fact all things which a respectable man should know, and he was not to be classed as a dilettante.

It was on the day that Mr. Furvetchky met Mr. Leicester. Mr. Schwabe's roquet that Leicester stood on the steps of the Naval and Military Club. He was alone; there were him Colonel Panton, who was a bit of a body, who was popular, and young Panton, who was a bit of a body, who was not yet dry. Leicester was not smoking, but Mr. Furvetchky was smoking, and Mr. Leicester was doing nothing, but looking meditatively at the wall on either side of the entrance. "Think it's going to rain?" old Downpaw, looking up at the sky, said. "I don't think so," Mr. Leicester seemed to say, with a faint smile, and Leicester's thoughts were wandering. "Leicester," continued the evidently caring nothing that received no information as to prospects of the fine weather as you are going to do with you. Mr. Leicester answered in a well-bred monotone, still staring at the brick wall, which looked horizon—

"I'm going to see the 'Devil's Dam'." "What's that?" cried young Furvetchky. "I'll let you know when I get it." "Is it a play?" inquired young Furvetchky. "No; I should say it was a play." "Is it a picture?" demanded young Furvetchky. "No; I should say it was a picture." "What is it then?" asked young Furvetchky. "Well, in a sense, I suppose secret—at present. It's a subject, but I imagine—

trick." "What's the trick?" there a new come to town?" "The Colonel's tone was a bit malicious. He had a point, conjuring his friend, and his were not identical. "Not that I'm aware of, some that you would Monsieur nor Madame Nury—new conjurer, since they're months old, at least. The only way I was coming along dilly, I saw the conjurer's lot of conjuring, and that would be 'The Devil's Dam' after a three o'clock Sphinx's Cave, and to eight. That's all I know up to now."

"Awful rot, that sort of thing," Mr. Leicester was very dry; he had only been into the world, whether amateur or professional. I believe, Leicester you have made the student life?" "Conjuring, and all that, thing."

Mr. Leicester said nothing, only gazed abstractedly at the wall. But Mr. Leicester said that something was wrong. "Do anything in that line?" Mr. Leicester asked, in that airy which nowadays conjurers dress their fatigues, and in a ple generally.

But as Mr. Leicester continued to say nothing, but gaze, the Colonel took up to answer.

"I have always understood Mr. Leicester is the finest in the world, whether amateur or professional. I believe, Leicester you have made the student life?" "Conjuring, and all that, thing."

Mr. Leicester said nothing, only gazed abstractedly at the wall. But Mr. Leicester said that something was wrong. "Do anything in that line?" Mr. Leicester asked, in that airy which nowadays conjurers dress their fatigues, and in a ple generally.
