

THE FALLACY OF A FACE

Crane holds that the beginning of his courtship was unique, but that it was the night of the view that he learned against his will that he was being deceived.

DIFFERENCE IN MILKERS

A cow made to milk a great deal of milk, and a cow made to milk a little, are both equally good, and the difference is only in the quantity.

SOLDIER SUES GENERAL

Ex-Sergeant Major Edmondson, of the Imperial Yeomanry, is suing Major-General Sir Henry Macleod for damages for alleged false imprisonment in South Africa during the late Boer war.

THE DATE OF ADAM'S BIRTH

With a view to ascertaining the exact date of Adam's birth, Dr. Lightfoot, a well-known scientific man, has spent much time during the last fifteen years.

Clean Your Liver

Munyon's Liver Remedy.

The music had quickened to its end, when he swung her out of the crush. His brain was still swaying to the beat of the tune as he drew down a passage to a distant seat.

MUNYON'S REMEDIES

Munyon's Liver Cure, 25c a vial. Munyon's Blood Cure eradicates all impurities of the blood. Munyon's Cold Cure prevents pneumonia and breaks up a cold in a few days.

"Please do enlighten me. I'm just dying to know." "I suppose you're laughing at me," he said. "I suppose you think because you're so horribly pretty you can turn a man's head just for sport. But it isn't sport; at least not to me. I'm handicapped every way."

The music of the next dance beckoned. It appeared distant, and much subdued. His balance and his nerve seemed lost. He rose slowly.

ANTI-VACCINATION AGITATION

FUNDAMENTAL PROVISION OF THE VACCINATION ACT NOT COMPLETED WITH.

Rev. J. A. C. McCuaig Says Compulsory Vaccination Should Cease.

The uncompromising anti-vaccination resolution, adopted recently at a public meeting held in St. Andrew's Hall, Toronto, appears likely to become the subject of considerable heated discussion.

HERE AND THERE

Notes of Interest About Almost Everything.

Bank of England notes cost a half cent apiece to produce.

The world now consumes 6,300,000,000 pounds of tobacco yearly, or 2,812,500 tons. This is worth \$260,000,000.

The world's smoke bill is just \$5,000,000 a week.

Some of the residents in the village of Arde, near Rochdale, England, have formed a Free-planting Association, with the object of improving the appearance of their streets and the approaching roads.

The proportion of married people to the population is highest in Hungary, where 407 per 1,000 of the people are married.

Chicago puts forth a claim to be considered the true Babel of the twentieth century. No fewer than forty languages are spoken within its limits, and of fourteen each is spoken by more than 10,000.

A good Indian elephant can be obtained for \$700, while \$1,500 would hardly purchase an African elephant.

The latter are now very scarce, only five having been brought to Europe since the year 1880.

Police statistics show that the arrests for drunkenness in London are at the annual rate of one to every 175 inhabitants, in Birmingham one to 158; in Manchester one to 71; and in Liverpool one to 50.

It has just been discovered that there exists at Rapperswil, Switzerland, a fund consisting of nearly \$50,000, which has been subscribed by Poles in various parts of the world for the purpose of waging war on Russia when a propitious time shall arrive.

No man can put into an advertisement what is not in himself. If he is businesslike his advertisement will be businesslike.

the law is supposed to exist. For example, Section 15 makes provision that in every municipality where smallpox exists, or in which there is danger of its breaking out through communication with infected localities, the Council of the municipality may order the re-vaccination of all persons resident in the municipality who have not been vaccinated within seven years, and the medical practitioner shall adopt the same measures to secure the re-vaccination of all such persons as he is required to do with regard to children.

"Here is a provision to enforce re-vaccination of adults on the ground that vaccination holds good no longer than seven years. But only in case of smallpox epidemic does the law become aggressive. It considers a person as unvaccinated after seven years, but makes no provision, except upon the appearance of smallpox, for the re-vaccination of such persons. It provides that three-month-old infants must be vaccinated, but every man and woman and child over seven years of age in the community may go unvaccinated unless an epidemic of smallpox appears.

THE GREAT MEAT PACKER

Valuable Lessons From the Case of Gustavus F. Swift.

In the career of the late Gustavus F. Swift we have another and signal proof that there is no lack of opportunities, but only of who have the intelligence, the courage and the persevering energy to improve men, says the Chicago Chronicle.

THE MAIN PRODUCT

He could sell the latter on a narrow margin and still make profits.

HEIR OF AUSTRIA-HUNGARY

Personality of the Archduke Franz Ferdinand.

The famous prophecy of the late M. de Blowitz, that the death of the Emperor Francis Joseph of Austria-Hungary would be the signal for the great European war, leaves of doubt no room.

VACCINATION OF BABIES

Under Sections 7 and 8 of the Act, the father or mother of every child born within the Province shall, within three months after the birth of such child, take, or cause to be taken, the child to the medical practitioner in attendance at the appointed place, for the purpose of being vaccinated, unless the child has been previously vaccinated; and upon the eighth day following the vaccination the father or mother shall again take, or cause to be taken, the child to the medical practitioner, in order that he may ascertain by inspection the result of the operation.

SCHOOL LEAVES AND VACCINATION

In spite of the unmistakable terms of the Act, and the penalty for non-compliance, the law is so far ignored and treated as an unmeaning thing that not till application is made for admission of children to the Public schools, at ages varying from five to ten years, is it discovered that their parents are violators of the law.

The Public School system becomes the net to catch these offenders; under Section 16 of the Act, which declares that it shall be lawful for the trustees of any Public, Separate, or High school to provide that no children shall be permitted to attend any school without producing a certificate of successful vaccination when demanded by the teacher.

From this, it would appear that all parents who delay vaccination of children till compelled to vaccination by the provisions of the Public School Board, are guilty of an offence under Section 7 of the Act, and are liable to a penalty not exceeding \$5.00, recoverable on summary conviction before the Police Magistrate.

A STINGING PROTEST

Conducting a sale at Aldenhams, Herts, under a distress for rent, an auctioneer recently had a novel experience. Upset at having his goods sold, the owner rushed into the midst of the bidders and pitched a hive of bees upon the ground.

VACCINATION OF THE ADULT

Nor does it appear that the most strict enforcement of the law would effect the purpose for which

the law is supposed to exist. For example, Section 15 makes provision that in every municipality where smallpox exists, or in which there is danger of its breaking out through communication with infected localities, the Council of the municipality may order the re-vaccination of all persons resident in the municipality who have not been vaccinated within seven years, and the medical practitioner shall adopt the same measures to secure the re-vaccination of all such persons as he is required to do with regard to children.

A row of willows would prevent this in a great measure, as their roots are very fibrous and hold the soil in a network against the stream's broads. They grow naturally along streams and hold them to their course. Willows readily grow from cuttings, no matter what size they may be, if planted in wet soil. They absorb a great deal of moisture, so that cannot be planted in marshy land that cannot be drained, or in damp places on the farm. Being easy to plant, growing quickly and having a fine appearance they add beauty as well as being useful to the farm.
