THE S. S. LESSON

INTERNATIONAL LESSON. AUG. 16.

ext of the Lesson, I. Sam. Ivil. 5-16. Golden Text, Ps.

The R. V. of chapter xvii., 15, is at David went to and fro from ul to feed his father's sheep, but w after his great triumph and his tually leading the hosts of Israel victory Saul will not let him rern any more to his father's house erse 2), but promotes him, as ated in this verse of our lesson. at David was accepted by the ople makes us think of Mordecal, whom it is written that he was st. to the king, accepted of the lititude of his brethren, seeking wealth of his people and speakpeace to all his seed (1st. x., 3), s being promoted by Saul seems ery small matter when we considthat he had already been anointby Samuel to take Saul's place

due time. -9. And the women answered one other as they played and said, nd hath slain his thousands and vid his then thou sands, * * * and il eyed David from that day for-

his was part of the song with ch Saul and David were greeted their return from the victory, r the Philistines and which stirin Saul a spirit of jealousy and red of David, so that he said, hat can he have more but the gdom?" If Saul had remembered believed the words of Samuel in pter xy., 28, he would/have wn that the kingdom was as ly David's as if he was already oossession of it.

). 11. And it came to pass on morrow that the cyil spirit from I came upon Saul, and he prophein the midst of the house, and id played with his hand as at er times.

s David played on his harp at er times the evil spirit departed n Saul (xvi., 23), but now Saul too much under the control of evil spirit and did not seem to re its departure, for there was der in his heart, and he attempto kill David. As to the evil it from God so often mentioned .. 14, 23; xix., 9) and similar. ningly difficult statements; the ole truth was that Saul, having sed to obey God and follow Him, off by God to the guidance of one he preferred.

14. And, Saul was afraid of id, because the Lord was with and was departed from Saul. * And David behaved himself. ly in all his ways, and the I was with him.

though Saul humbled him to be captain only of a thousand se. 13), Pavid kept evenly on his and warked wisely in the sight he Lord; conscious of His presand approval. " The phrase "bewisely" is the same as "prosor "have good success" (Josh, S; Jer. xxiii., 5), and in Ps. ., 8, it is "instruct." By the it of the Lord mightily upon (xvi., 13, R. V.) he was so inrted that he could say, I will myself wisely in a perfect (Ps. ci., 2), and by the grace od he did. If we allow oures to be affected by or come un-

the power of people or circumces, we do not prosper or behave ly, but to have a heart only for -that is/ true prosperity. grace of God David so lived that name was much set by; or preciverse 30 and margin), in the of , the people. The words. e Lord was with him" (verse 12, nd 28), remind us of Joseph and rials and that both as slave and oner the Lord was with him and was 'a prosperous man (Gen. x., 2. 3, 21, 23).

Wherefore when Saul saw that chaved himself very wisely he afræid of him.

n and a guilty conscience make ards. Adam, having sinned, was id and sought to hide from God. tham was afraid that they ld kill him for his wife's sake, he and she consented to lie, and lso did Isaac and Rebekah (Gen. 10; xii, 12; xx, 11; xxvi, 7). testimany of an upright life is buke to one living in sin, and is a conscience that also up-God knows and the guilty n knows; they know together science) even if no one clse

But all srael and Judah lovavid, because he went out and

in before them. ng afterward, when he was and king at Hebron, they spake m in these words: "When Saul ing over is, thou wast he that st out, and broughtest in Is-(11 Sam. v. 2). "Going out (11 Sam. v. 2). "Going out coming in" in a phrase that to cover all one's daily life. Solomon became king, he said od: "I am but a little child. ow not how to go out or come (I. Kings iii, 7). So the beaupromise in Ps. cxxi. 8, "The shall preserve t'v going out thy coming in from this time and even foreyermore," assurance in Deut. xxviii, 6, ssed shalt thou be when thou out includes the whole life. eed not fear the hatred or ill of any one, but may find all sary comfort in such words as

"I, even I, am he that comshouldst be alraid of a man and forgetteth the Lord, thy er?" (Isa. li. 12,13). And reto say : "The Lord is my light my salvation; whom shall I The Lord is the strength of ife: of whom shall I be afraid?" old, God is my salvation; trust and not be afraid." at sime I am afraid I will trust nee" (Pis. xxii, 1; 1, 3, 4, 11;

If you want to forget your trestic want to renew your youth; if you was to have week of unadulerated, pure enjoyed int. will visit Hamilton during Can vi the great show at single fate 4 ten

POULTRY IN SUMMER TIME

DISTOSE OF OLD HENS BEFORE MOULTING PERIOD.

Dominion Department of Agricule ture Issues Some Practical Hints.

The following practical poultry advice in given by Mr. F. C. Hare. Chie of the Poultry Division of the Dominion Department of Agricul-

Sale of Fowls-It is most profitable to dispose of old hens before the moulting pariod. There is then a ready market for fowls on account; of the scarcity of chickens. At the present time six cents a bound live weight is offered for hens by a large produce company in Toronto; eight contain pound plucked weight is paid: in Montreal. In several months live hickons can be bought by the produce merchants for the above rate, or for a small increase in

If the hens are held until fall they will not realize as great! a profit as they will this monthowing to the reduction of the market price for fowls and the loss of, flesh in moulting. Hens should be sold when they are two years old y All male birds shoold be sold in the support and cockerels used for breeting the following season. Pullets for Laying.—The advan-

tages of retaining the early pullets for all and winter egg production have been repeatedly stated. Parly pullets will lay in their first year five times as many eggs as old hens. The cost of feed will be practically the same for the pullets as for the The profit from the pullets will be correspondingly greater. The most promising utility-type pullets should be selected now, fed liberally so that early winter laying may be encouraged, and later on placed in Convortable winter quarters. Trans

ferring mature pullets to a strange pen defers egg production. Utility-type Powls-For poultry familing the utility type of breeding fowl should be selected. This type of fowl can be had in the proper breeks, Plymouth Rocks and Wyandottes. Utility-type fowls should be broad, blocky, and of medium size and weight (mature weightcock seven to eight and a half pourds; hen five and a half to seven pounds). The breast should be full, broad and carried well for-ward. The legs should be set well apart, short, white or yellow in color and without leg or foot feathering. The utility-type fowl corresponds to the shorthorn type in cattle : a square and broad-bodied low-

set fowl. Sifle of Chickens.-From eleven cents to twelve cents per pound live weight is offered in Toronto and Montreal for chickens weighing over one and a half pounds each. The prices correspond approximately to fourteen cents and fifteen cents per pound plucked weight, and twenty cents and twenty-two cents per pound drawn weight. It is evident that an increased profit will be realized by selling the earlier and heavcerels of the flock of This profit corresponds to the creased revenue derived by market garffeners and fruit growers who place staple articles on the market before the regular supply is avail-

Craste-firtted Chickens-The increased consumption of chickens in Canade is due to the improved quality and appearance of the chickens that are offered for sale. This improvement has been established through the business of crate-fattening thickens introduced by this Department or Approulture; and to the methods of killing, plucking and shaping the chickens, before they are marketed, Every farmer in Canada should be in possession of the details of the crate-fattening business: . It is a business that can be managed by any member of the household; the required number of crates are easily constructed; the chickens will gain from one and a half pounds to three pounds each during the awenty four days fattening, and the cort of food per pound of gain in live weight will average from five cents to six and a

'Eall Fairs.-Fowls that are to be exhibited at the fall fairs should be shaded from the spn during moulting. This will prevent the new feathers having a faded or mottled appearance. Breeders of fancy fowlsare very particular in this respect and cover the tops of the yards used by the moulting birds with old carin Hamilton. It will be a great day. There pets, lumber, etc. The fowls are will be a Trades Parade in the morning with given liberty during the late aftergiven liberty during the late afternoon and evening only. Animal food and vegetables are necessary for moulting fowls; the animal food, such ast waste meat or raw bones will increase the supply of protein or all ones for the growth of feathers; be vegetables are useful in regulat-

ing the system. W. A. CLEMONS: Publication Clerk.

LOCKED IN A CAR.

A Man Travels From Halifax to Vancouver. A Winnipeg despatch says :-- Wher

innipeg checkers opened a C. P. R. reight refrigerator car here on Wednosday they found a man named. Henry Johnson concealed therein. Johnson was hidden in the car at Halifax and came through with the car on a passenger train. He had been four days without food, but was nut much the worse for wear, He was charged at the police station with beating his way without a ticket, but the Magistrate released him with a warning.

TIME NOW DRAWS NEAR.

Alaskan Boundary to be Settled Next Month.

A London despatch says :- The first sitting of the Alaska Boundary Commission will take place on Sept tornier 3. It will probably tab place at Burlington House.
