
VALUE OF SKIN TANNING.

t is an excellent thing for the onic dyspeptic to get his stomach med. Special appliances now make a possibility by the use of the light so directed that the rays concentrated over the diseased This tanning of the skin is of

e as a means of aiding digestion. the use of the electric light we uce a solar crythema, or sunburn by which the vessels of the skin be-

in some internal part they would apply blasters over the part, and produced irritation of the skin, and the internal trouble would be relieved. The philosophy, of the success of this treatment is that it produces a diversion of blood to the surface. There are some branches of the blood vessels of the liver which run to the skin over the liver. If one gets more blood into the skin, there will be less blood in the liver, and so the liver will be relieved. The same thing is true of the bowels and stomach, and half dozen boxes I was again in perlikewise of the spinal cord; if that is feet health. I believe all weak girls will relieve the spinal cord. By the fill of they will take when the door was thrown open and the electric light switched on the lore companies would be held reactinic rays of the sun more powerful than the sunlight and gives a more decided effect.

FOOD VALUE OF MILK.

In his address before the British Sanitary Inspectors' Association Sir James Crichton Brownie, in addition to renewing the stock arguments for use of milk by children, pointed out its advantages for adults. He showed its and the vessel is well out to sea well write no replect and the vessel is well out to sea we write nor cipher, and yet could analyte the stock arguments of when you come to the do not keep any armed guest on swell, and the vessel is well out to sea we write nor cipher, and yet could analyte the showed surface and have yourself comfortably duty at all, for, the strong-rooms because the most frequented in the water. look about for ing placet in the most frequented tical questions.
