A MODERN MEDICINE.

Dr. Williams' Pink Pills Cure D, ease Through the Blood.

Medicines of the old-fashioned kind will sometimes relieve the symptoms of disease, though they can never touch the disease itself—they never cure. Ordinary medicines leave behind them indigestion, constipation, biliousness and headache; purgatives leave the patient feverish and weakened. Dr. Williams' Pink Pills, on the other hand, do direct good to the body, blood and nerves. They fill the veins with new, rich, red blood; they brace the nerves; they drive out disease by going right to the root of the trouble in the blood. They always do good—they cannot possibly do harm.

DODD'S KIDNEY PILLS. A horse-hooper is supposed to be a sign of good luck. "And so it is," replied the sport. "If it goes under the wire first on your horse."

considered sufficient to justify the hanging of thirteen men. The men of the frigate Hancock, under the command of Admiral Bly, went to Oahu, for the purpose of bringing away some bread-fruit for acclimatization in the West Indies. For six months the ship lay there, and the luxurious and free life demoralized the men. Soon after the Hancock sailed with her cargo, twenty-three of the men deserted the captain while asleep, with eighteen of the crew, put them in a small, open boat, with only 150 lbs. of bread, 32 lbs. of pork, and 28 gallons of water, and cast them adrift. It seemed a cruel fate, but by the skill and courage of Admiral Bly, the frail craft was kept afloat for three months, and traveled 3,618 miles to the island of Timor, off Java. From here, Captain Bly and the twelve surviving men sailed to London.

SOME FAMOUS MUTINIES

WHEN BRITISH SAILORS WENT ON STRIKE. Richard Parker, Rose From Seaman to be "President of the Floating Republic."

Somewhat over a century ago, when England was fighting for her life, a mutinous spirit sprang like the plague through a great part of the fleet. And, strange to say, Government was almost as helpless in face of the outbreak as Russia. Our famous mutiny of the Nora commenced on April 14th, 1797. Quite unsuspecting of disaffection among his men, Admiral Boscawen gave the order for the Squadron to proceed to sea. The obeying the order, instead of the appointed signal of rebellion to the whole fleet. The men then made a demand for an advance in wages, to the amount of 30s. per month, and an increase in their allowances. They refused to obey the order, and no-thing remained to the Government but to yield to the men's demands. Order was quickly restored, and the ships set sail—all but three, which were left behind; and Government but, seriously to carry out its promise as the Russian hierarchy. On May 7th, a much more serious mutiny broke out on the ships moored at the Norfolk. It began when Admiral Colpoys ordered the men to get below and remain quiet. The men, however, refused to obey, and tried to get away on deck. Admiral Colpoys, through orphans the Marines to fire. Only a few officers obeyed.

KILLING FIVE MEN. The Marines fired down their arms, and the men, coming on deck, seized Lieutenant Bover, put a rope round his neck, and prepared to hang him. But, with fine bravery, he admitted of some time, and finally saved his own life by giving the order to fire. He and his officers were seized and locked in their cabins for twenty-four hours, after which they were sent ashore.

Then followed a terrible state of things, under the leadership of Richard Parker, who, from an able seaman, suddenly rose to be "President of the Floating Republic." The mutineers paraded the harbor, sent boats up the river to win over the ships lying at Long Reach. They stormed the merchant ships going up and down, and effected a veritable blockade of London.

By this time the mutinous fleet was a very strong force—thirteen ships of the line, together with many sloops, frigates, and gunboats. One of the favorite amusements of the men was to tie the sailors to the yard-arm, and then suddenly drop them into the water.

What the Government did in these circumstances seems curious. They offered pardon to the men if they would return to their duty. And Lords of the Admiralty to treat with the rebels, but the latter behaved with such insolence that the Admiralty Lords returned without doing anything.

Soon, however, three mutinous ships deserted. Then, on June 9th, when "President" Parker gave the order to sail, the ship obeyed. Next day, the officers of the Leopard, with few loyal seamen, succeeded in crowing the mutineers aboard, and bringing away the ship. On May 13th Parker's own ship, the Sandwich, surrendered, and that was the end of the mutiny.

Parker and a number of the leading spirits were tried by court-martial and hanged on June 30th. The men of the whole fleet, however, got their "rise" in wages of 6s. 6d. a month, an increased allowance of provisions, full pay while suffering from wounds, and other advantages.
