Flour that gives half nourishment and double work to digest is not good Flour. Cheap and inferior Flour gives the digestive organs double work and half pay. Inferior Flour contains indigestable waste. This waste must first be overcome by nature—that means extra digestive work. Indigestibles destroy the nutriment of Flour, therefore poor Flour gives more work and less nutriment to the system. ROYAL HOUSEHOLD FLOUR is in a class by itself. It is the only really FURR Flour and it is pure because it is purified and sterilized by ELECTRICITY. It is the most easily digested and most nourishing because it is absolutely pure.
