CURE FOR CHAPPED HANDS.

After the hands have been in water they should always be thoroughly dried with a soft towel, then common natmeal well rubbed into them. A Bowlful of the latter should be kept in a convenient place for this purpose. Regularly applied, it will usually keep the hands delightfully soft and white. Warm gloves or millens should always be worn when the hands must be exposed to the weather, and the hands should never be allowed to become thoroughly chilled.

A PORTABLE SUBMARINE. A new type of sul marine forpedo load is undergoing tests in England. The boat is only 31 feet long by 6 feet inches in diameter, and can be carried on the deck of a battle-ship, and launched when it is desired to bring it into action. It has a speed, when submerged, of eight knots, carries two torpedo tubes, and is navigated by a crew of three men.

One good turn-has often to hold up two bad ones in a variety show. Be a man of few words-but don's say them over and over.

20TH CENTURY:

Recently there might have been seen sign painted in gilt letters over a shop at Chartres, in France, which informed all and sundry that the proprietor a Monsieur E. Pichot, was a dealer in firewood, a polisher of floors, an undertaker and embalmer, a purveyor of festival and wedding dinners, and which wound up with the luconic statement

'Debtors evicted." Every English village has its general shop, which is often combined with such subsidiary attractions as "watchmaking," cobling, the letting of apartments. By proprietorship, and the offices of post-

purposes of transport, farmer and storekeeper, besides doing an important trade in a peculiar oven which he had patented. This gentlenian's seven handsome daughters assisted him in his varcrown as this. It means, too, that jous business enterprises, all of them marrying wealthy men except one, for shom no husband could be found other

THE LOCAL SEXTON. At Basle, in Switzerland, the writer boarded with a lady whose mornings were occupied with a class which she instructed in massage and Swedish gymnastics, whose dwelling-house was divided into a "pension" and a grocery establishment, who wrote poetry for the local papers, and whose spare moments were filled by a matrimonial agency and the conduct of a circulating library. is lady, too, was a special adept at In conducting review, teachers may laying-out and shaving corpses, for prehend. which latter operation she often received

SOMETHING LIGHTA WHISTLES

A big triple whiste, the largest ever constructed, has been put into use by Company. Four times a day this mam-noth whistle is blown, and it can be heard for ten miles north, south, eastand west. Connected with an electric clock widch is guaranteed not to vary five seconds in a year, this whistic will prove the most valuable public time dispenser eyer invented. Residents in the immediate neighborhood of the powerhouse anticipated all sort of trouble when the big whistle was first talked about. But no one has had any reason acid increases the strength of people in to complain of discord at whistle-time a most extraordinary manner. For in-a most extraordinary manner. For in-stance, one delicate subject who could at one in the afternoon, and at six in scarcely lift anything but the lightest the evening, the great triple whistle an weight was able to lift, five times the pageons the correct line to all within amoint after being experimented upon. ten inties' hearing.
