SLAUGHTER AT TUKUM. A despatch from Berlin says:-A despatch to the Lokal Anzeiger gives details of the lighting and slaughter at Tukum, Courtland, on Decl. 18

and 19. When the rebellion broke out Courtland, 40 dragoons and three officers, were sent to protect the little town of Tukum. A force of peasants besieged the place and soon captured The dragoons surrendered wher their ammunition was gone and yielded up their weapons on a guarantee of personal safety.

The peasants, however, immediate ly the arms were, handed over to them, treated the dragoons in most brutal manner, gouging out their eyes, chopping offand cars, and finally killing 'Coli then committed atrocities upon the townspeople.

Meanwhile reinforcements of artil

lery arrived, and, finding the town possession of the rehels, they bombarded it. The inhabitants, victim to the artillerymen for protection. The artillery mon, supposing that the townspeople were rebels advancing to attack them, shelled them with terrible effect.

The correspondent estimates that 600 of the townspeople were, killed paratively few captures by the soldiers and 400 by the ropels. Another more likely estimate is that 600 were killed and wounded.

APPEAL, FOR AID.

A despatch from St. Petersburg says:--Eight hundred landowners o the Saratoff district have telegraphed to Premier Witte, appealing for the National Assembly, in order to satisfy the land hunger of the peas ants, the only hope of ending the agravita uprising. The landlords agrarian uprising, The landlords also demanded additional troops to prevent the sacking of the remainder f the estates in the Volga.

The Novoe. Vremya prints a desaying that the Lefts are completing Their armed organizations, and are ambushing and driving out the trdops from the country, destroying the bridges and transforming castles and residences of the lords into forts.

TIMBER WAS PROTECTED.

Forestry Report Says Fire Ranging System Was of Value.

A Toronto desputch says: Some ineresting facts regarding the progress if systematic forestry in the Province Ontario in the report of the Bureau of Forestry for 1904 has just appeared in print. After speaking of the progress made through the supplying of plant ing stock to the farmer by the Ontario Agriultural College, the document speaks of the value of the fire ranging system in operation on public forest ands under license. This, it states, is an increasingly useful institution in the protection of the standing timber, in which both the lumbermen and the pro-vince have such a large thancial interest. The number of fungers applied for

During 1901 a first protection service was organized along the line of the Temislaming and Northern Ontario Railway, which running through almost unbroken forest, was a source of danger. This was paid for by the Department of Crown Lands and the railway Commission jointly. It proved very efficient, and its value was increased by the fact that the rangers used railway velocipedes and were able to follow up the trains and extinguish lany incidient

The book contains a number of valuber of good illustrations.
