

HAS NOTHING TO FEAR

Canada Need Not Worry About United States Tariff.

Ottawa Government Is Paying Little Attention to Present Revision as It Affects the Dominion - Favors Will Be Sought From Ottawa as Soon as Reaction Sets in, Says Sir Wilfrid Laurier.

Ottawa, June 1.—The Canadian Government is not at present worrying much about the late of the Payne tariff bill, now being revised upwards in the U. S. Senate. In respect to the commodities mentioned in yesterday's despatch from Washington—barley, hops, potatoes and oysters—which are now given even higher protection than under the Dingley tariff, the exports from Canada to the States are comparatively so insignificant that a still higher tariff will make but little difference to the country as a whole. In fact, on most of the items affected by the Payne tariff the protective duty either under the new or the old tariff is so high as to prevent almost an absolute prohibition of trade.

In the case of wool, lumber and wheat, however, Canada is vitally interested. The question of reciprocity in coal, raised by the Payne tariff, will undoubtedly be one of the main tariff issues to be discussed at the next session of Parliament. In respect to lumber and wheat, it is felt here that it is only a question of time before the United States will be compelled to come to Canada for more and more for its supplies. Western American millers are already seeking an admixture of the best grade of Canadian wheat to produce their flour, and this demand must steadily increase. All Canada need do is to wait until the time when the inevitable reaction sets in across the line, and as Sir Wilfrid Laurier has frequently expressed it, tariff favors are sought from Ottawa, and not from Washington. Meanwhile, pending the final action of the United States Senate and Congress on the tariff bill, the Government here does not propose to interfere either by threat of retaliation or otherwise. Canada is pursuing her own tariff policy independently of the United States, and is looking to continued steady development of the markets in the Motherland and with the sister overseas dominions after finding trade with her neighbor to the south practically barred by a prohibitive tariff on most of the items in which a mutual trade might be profitably developed.

German Aeronaut Comes to Grief After Record Trip.

Count Covers a Distance of 850 Miles In 37 Hours In His Great Dirigible - While Manoeuvring For a Landing He Catches In a Tree, and Machine Now Rests In Perilous Position.

Copenhagen, June 1.—After covering a distance of about 850 miles in 37 hours, Count Zeppelin's new airship, on its return trip from Bettendorf to Friedrichshaven, came to grief in an open field near here yesterday.

In manoeuvring for a landing the airship came in contact with a tree, and its position to-day is very dangerous.

The propeller was broken and a considerable time must elapse before the journey can be continued.

The position is unfavorable, the ground being very hilly. The bow rests on the ground, while the stern is about 65 feet in the air.

A strong breeze springing up last evening causing no little anxiety for the safety of the airship, which it was feared would be wrecked should a storm come during the night.

After considering the matter with the assistance of those who had gathered at the scene of the accident, Count Zeppelin was able to shift the position of his airship a little and thus to better protection from the wind.

But the collision was a heavy one is indicated by the broken and bent strips of aluminum lying about the ground and the half-split branches dangling from the tree trunk.

That the collision was a heavy one is indicated by the broken and bent strips of aluminum lying about the ground, and the half-split branches dangling from the tree trunk.

More New Mills.—Port Arthur, June 1.—The C.P.R. will probably induce some industries of considerable magnitude to locate on their lands in Port Arthur, in order to procure a renewal of exemption from taxation.

Ten years ago an agreement was made fixing the yearly assessment at \$50,000. This has now expired and the property is assessable at one million dollars, and as they now face \$20,000 yearly taxation, it is expected they will bring some independent company, most likely flour mills, here, to distribute wages sufficient to get exemption again.

William Whelan, Solicitor At-Large, has interviewed with the City Council yesterday and said as much, though they will not make any definite proposition until they return from Montreal, for which place they left last night.
