JOHN CAESAR, C. P. R. Agent, Markdale.

### Meeting of Presbytery.

The regular quarterly meeting of Owen Sound Presbytery held there July 2nd was well attended. Dr. Barbour, of Meaford, and Dr. Thurlow Fraser, of Owen Sound, present for the first time since the settlement here, personally introduced by the moderator to members of the church. Dr. McGillicuddy, of Toronto, and Dr. McGillicuddy, of Owen Sound, present as visitors were invited to sit with the Presbytery. Mr. Beveridge, of Rockport, was appointed to arrange with the Elders of Markdale for suitable pulpits during illness of Mr. Phalen and the Clerk was instructed to express to Mr. Phalen the sincere sympathy of his brethren and their hope for his early recovery to health. An appeal was made for volunteers to offer support for a Sabbath school without expense to him or the congregation. A case of special distressing destitution and disease was reported and Mr. Nicol and Dr. Thurlow Fraser were appointed a committee to do what

### English Boys For Farms Farmers' Club Picnic.

Fifty boys arrived in Toronto on Friday afternoon last. They came from crowded London in Old England and were enroute to Ontario farms. They were a sturdy crowd, picked lads from the working force of the world's metropolises, who have been given a chance to make good in Canada by means of a new immigration movement. "Junior Imperial Migration" is the title under which the movement is working, and it is expected that the bringing of these fifty lads to Ontario will be followed by an energetic campaign along the line of "Junior" immigration, backed by the Ontario Government, which will also go a long way in solving the labor problem on Ontario farms. The boys were met at the Toronto Union Depot by Hon. Jas. S. Duff, Minister of Agriculture, and Mr. H. A. McDonnell, Director of Colonization. A ready practical every boy in the crowd has been placed in a task that was easy enough in view of the type they were. "I never saw a finer looking bunch of boys come in in my life," said Mr. McDonnell, which is rather surprising, seeing that they were nearly all brought up in London. The boys range in age from 15 to 21. The Junior Imperial Migration movement works along original lines. The application each had must fill out declares that only farming work is available, and it points out a few discouraging features of life in the new land that the enthusiastic booking agents generally omit. Here are two of them: "The work will be found hard, dull and monotonous, the hours long and Sunday work unavoidable, and the lads will have to do housework when required." "The life is lonely, the neighbors are often miles apart, and there are no lights, streets, places of amusement sometimes within 100 miles." These warnings scarcely err on the side of optimism, but the boys, finding such a prospect, have still been eager to try their fortunes abroad. The money for fares and equipment is advanced by the men back of the movement, the Ontario Government bearing a considerable share of the expense. The boys are expected to repay this money from their wages. Through the instrumentality of the Grey County Board of Agriculture, and the local branch of the Department of Agriculture, six of these boys have been sent to Grey County and are adapting themselves to the new life. They have been assigned to the following homes: Thos. Nesbitt, Markdale; R. W. Wilson, Markdale; Thos. Lemon, Walters Falls; A. E. Myles, Kimberley; I. H. Shore, Clarksburg; W. S. Abercrombie, Clarksburg.

### What's What at Edson.

(Calgary Eye-Opener.) Real estate victims all over Canada will be interested to know that we spent an hour or more in the town of Edson. This little burg of one short, straggling street, is the scene of one of the wildest real estate impositions ever pulled off upon a gullible public. The city limits extend four miles in one direction and four and a half in the other. On all sides of this lone street is a forest of trees, and as for muskies, why, it's all muskie. Down around the T. B. station and yards, the land has been drained. Those who have purchased Edson lots from real estate agents in Toronto, Winnipeg, Vancouver, Seattle and other distant points, will have one devil's own time locating them, unless they happened to be within a few yards of the aforementioned street. By the time their great grandchildren are old men, however, these lots may be quite valuable. Why hurry? In the meantime they may consider themselves stuck.

### Mrs. Murphy Was Lost.

The Irish peasant farmers are taking readily to the motor car. So, too, is the Irish farmer's wife. Prosperous harvests have sent plenty of money into circulation through the four provinces. With new riches come new social responsibilities and the necessity of being "in the dog's." Mike Murphy, a contractor Mallow, County of Cork, celebrated one of several repeated business successes by presenting his wife with an auto and a French chauffeur. Mrs. Murphy "read up" carefully before blossoming forth in her new grandeur. Then she invited Mrs. Hannah Clancy for a ride in the car. "Whatever you do, Mrs. Clancy, don't talk to the shoofar at all, for a word or a whisper to him, for it takes his mind off what he is doing." So they started off at a rapid clip. The chauffeur went around another, sometimes the car would be on two wheels. Finally Mrs. Clancy touched the chauffeur on the back and said, "Mr. Shoofar, I beg your pardon; I was not to speak to you at all, but let me tell you that Mrs. Murphy has not been in the car for the last ten minutes."

### Christ Church.

A Sunday School and Congregational picnic will be held in River side Park on "Wednesday afternoon, July 17th. Everybody invited on condition he brings a basket. Next Sunday, 14th inst., the Rector will deliver an address on the origin and early history of the Anglo Catholic Church. All Anglicans should be present to hear this important subject discussed, and all others are invited to attend. Confirmation on Thursday evening, July 22nd, at 8 o'clock.

### School Reports.

Promotion examination report for S. S. No. 7, Holland. 4 jr. to 4 sr.—G. Shute, I. Livingston, E. Hamilton, B. Holley, H. Bull. 3 jr. to 3 sr.—M. Bull, R. Shute, D. Foster, G. Hilt. 2 sr. to 2 jr.—E. Kennedy, N. Lee, G. Kirkton, rec. 1 jr. to 1 sr.—M. Hamilton, A. Lee, M. Waring, A. Apin. Sr. Pr. to Jr. H. Shute, E. Lee, A. Campbell, H. Trovick. Average attendance for June, 31. Effie M. Hutton, Teacher. Report of S. S. No. 5, for June 4 jr. to 4 sr.—M. Cameron, L. Darcy, J. Connor, V. Norris, M. Murphy, A. Juan and J. Fogarty, absent for exams. 3rd to 4 jr.—J. Norris, S. Norris, E. Black, N. Sweeney, W. Black. 2nd to 3rd—M. Connor, L. Murphy, M. O'Healey and E. Norris recommended. Jr. 2nd to Sr. 2nd—A. Sullivan, M. O'Healey, T. McCarthy. Part 2 to Jr. 2nd—F. Darcy, J. Darcy, P. Connor. Pt. 2—K. Norris, O. Sweeney, W. Murphy, J. Norris. 1 jr.—H. Sullivan, J. J. McCormack, C. M. McCormack, D. O'Healey, W. Anderson, F. Norris. nor, K. Sullivan, W. Murphy, Patricia Norris, Jack Norris, D. J. McCaskel, Ed. McCarthy, L. Norris, A. McCarthy. Names not strictly in order of merit. Average attendances, 36. L. M. McGuire, Teacher.

### Prospects for Clover Seed in 1912

Many farmers will remember that last year warning was given that the prospect for clover seed was rather poor in the usual seed producing parts. This year it is, if anything, worse, and it will pay farmers who have fields of clover to keep the second growth for seed. If any are fortunate enough to have clover for pasture they should run a mower over the fields after turning the stock off the latter part of this month. If the piece is retained for hay the mowing should be done early, when the clover begins to bloom nicely, so that the second growth may have a better chance. Farmers who were able to raise seed last year profited well by it and in view of the probable scarcity of seed this season, every available field should be utilized for seed production. Dept. of Agriculture.

### Boyle--Kitson.

A pretty wedding was solemnized at the home of Mrs. Margaret Kitson, Ingleford, Sask., on Wednesday, June 26th, when her eldest daughter, Miss Isabel, was united in holy bonds of matrimony to Chas. J. Boyle, of Colton, Sask., youngest son of Mr. Chas. Boyle, Hawardale, Sask., formerly of Glasgow, Ont. The ceremony was performed by the Rev. Mr. Coulter, pastor of the bride. The bride was prettily dressed in a cream messaline silk dress, and was unattended. After the ceremony and dainty dinner was served to about twenty of the most intimate friends and relatives. Among those present from a distance were Mr. and Mrs. Mooney and the Misses Mooney, Weyburn, Sask.; Mr. and Mrs. Frank Boyle, Lyleton, Man.; Mr. Will Ledingham, Brandon, Man.; Mr. Charles Boyle, daughter Hannah and son Will, of Hawardale, Sask. The bride received a large number of handsome presents from friends and neighbors. Mr. and Mrs. Boyle will reside on their three-quarter section farm near Colgate where the best wishes of a large circle of their friends and acquaintances follow.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, darning and doing housework all day, and crawling into bed dead tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when you are constipated, you should become both healthy and beautiful. For sale by R. L. Stephen.

### Experimental Plots.

Interesting Work in Connection With the Department of Agriculture, Markdale. A fortnight ago we had an article in The Standard describing the experimental work that the Department of Agriculture, Markdale, is conducting upon the House of Refuge farm. About sixty plots in all are being made up of, and experiments with fertilizers, and various kinds of grain are being conducted. We would like to urge upon all the advisability of paying a visit to these plots and making a careful examination of what the Department has there. Several of the experiments are just now at their best, especially the one where different fertilizers are being tested with O.A.C. No. 21 Barley. Ten fertilizers in all are being tested, and there is a marked difference in the growth of the grain on each plot. Complete Fertilizer, a mixture of Superphosphate, Muriate of Potash and Nitrate of Soda, is showing up the best, the length of straw and healthy appearance being almost double that where no fertilizer whatever has been used. A mixture of Superphosphate and Muriate of Potash, in second and superphosphate, used alone stands third, thus showing that superphosphate as a fertilizer for barley gives the best results on our soil. Muriate of Potash also gives very good results but the nitrate of soda has but very little effect. Upon another plot lime has been used and if anything it seems to have had a detrimental effect, as it is the poorest crop of all. Evidently there is not sufficient acid in the soil of this particular section to demand the application of lime. Another good experiment is the testing of three varieties of oats, Siberian, Lincoln and Regenerated Abundance are the three being tested and so far the latter seems to be doing the best although it is not likely to give the highest yield when harvested. An experiment with Alfalfa is also being conducted. Two varieties, namely, Grimm's and Ontario Variegated, both show a strong, vigorous growth. These were both treated with the nitro-culture prepared by the Bacteriological Dept., and just alongside is a plot of another variety that was not treated. Already a slight difference is noticeable, the variety not treated having a slight yellow cast over it and lacking somewhat in vigor as compared to the other two. The experiments are indeed very interesting and an hour's examination of the plots would be very profitably spent.
