LENGTH OF DAYS ON MARS
Year Has Double Number of Days
Year on Earth Here

The planet Mars, according to the subject in the North American Review, is more distant than the earth from the sun—150,000,000 miles on the average, instead of 93,000,000. It is therefore a little colder, because the diameter of the planet is only 4,000 miles instead of 8,000. Martian days have almost the same duration as ours, but the axis of the planet being more inclined toward the sun, the polar regions where the sun remains more than one day on or below the horizon are more extended, as is also the length of the day.

The inequality of days and nights at the same latitude is greater on Mars than on the earth; at the latitude of 45 degrees north, the day is 24 hours and 39 minutes, and the night 37 hours and 45 minutes; at 30 degrees, the day is 24 hours and 54 minutes, and the night 36 hours and 6 minutes; at 15 degrees, the day is 25 hours and 9 minutes, and the night 35 hours and 11 minutes. The duration of the year on Mars is almost double, being 687 days instead of 365 1/4 days on the earth. The orbit of Mars is an elongated ellipse instead of being nearly a circle like the earth's. There are there more differences between the seasons both in respect of duration and of temperature than on the northern hemisphere because of a long summer, is warmer than the southern hemisphere.

Not Such a Much
My wife writes me from London that our daughter was presented at court over there," said Mr. Niggard. "This is a great honor and she is nearly a thousand dollars richer."

"I was presented at court in the same way some years ago," replied Mr. Niggard. "It cost me five dollars and costs, and I don't see where it is such a great honor."

LITTLE VICTIMS OF ST. VITUS DANCE
Most Common Among Children of the School Age

If your child—whether boy or girl—is fatigued, emotional and awkward, you should watch it carefully. Frequently children cannot still, they move with jerky actions, their limbs jerk and their features twitch nervously. Speech is confused and the muscular system not under control. These are among the symptoms of St. Vitus dance, a nervous disease, frequently deranged by the school year, which a splendid cure has been discovered by the use of the new, richly flavored, and strengthening medicine, thus restoring the nerves, thus restoring the nerves, thus restoring the nerves.

SUFFERED 2 MONTHS WITH HEMORRHOIDS
Began with itching sensation, kept awake at night. Caused Great Pain. Thought Operation Only Cure. Cuticura Soap and Ointment Entirely Cured in 6 Weeks.

Some years ago, in the district of Jalpa, Bengal, there was a sudden epidemic of peaty thieves and burglaries. The police completely baffled for some time, finally arrested an individual on suspicion, who, after a preliminary magisterial investigation, was remanded in custody with a view to further inquiries as to his antecedents. On being searched, a police officer, suspecting he had something concealed in his mouth, ordered him to open it, when embedded round one of his back teeth, was found a hard substance, which, on being extracted, proved to be a small, semi-circular clasp-knife. The suspect, who had hitherto protested his innocence, now made a full confession, and eventually turned out to be a member of the notorious criminal tribe of Gopala, in Oudh, and had already been convicted of fourteen previous offences. He admitted that the knife had been specially made for him, and that he used it for cutting open packages of cloth and also for pocket picking.

CZAR AND CZARINA WORRIED
Loss of Jewels Thought to Foretell Royal Family's Health

The Czar and Czarina of Russia are more than usually perturbed over a most unfavorable omen that has occurred in the Royal Palace. They have heard before how superstitious they are—the Czar particularly—his wife, being continually surrounded by him, has become almost as bad as he. Every now and then some mysterious monk is brought to the palace, and as long as his luck lasts, he is in clover; but once things begin to go awry, he is dismissed without delay, and his Royal master begins to look for some one else to guide him. For nothing of moment is undertaken by the Czar without some supposed preternatural guidance.

MAKE PLANTS DRINK IRON
Amount in Spinach Increased Sevenfold by Experiment.

Experiments are under way in the agricultural bacteriological station in Vienna to increase the quantity of iron carried by certain plants, with a view to the effects on the human system when those plants are used as food. Artificially prepared foods containing iron do not always produce the desired effect, because the iron is not completely assimilated. This difficulty, it is thought, may be avoided by causing plants to take up an increased quantity of iron during their natural growth. By adding hydrate of iron to the soil in which it was growing the experimenters have succeeded in producing spinach containing a percentage of iron seven times as great as that found in ordinary spinach. It is believed that the process will prove successful with other ferruginous plants.

CITY LIFE AND PHYSIQUE
Town Men Better Developed Than Countrymen.

A good deal used to be said and written about the debilitating effects of urban life upon individual physique. It was, indeed, so far taken for granted that the rural militiaman was physically superior to the townsmen, that one of the stock arguments for the encouragement of English agriculture by corn laws and other protective legislation was the necessity of preserving that vigour of England which was alleged to furnish the military sheen of the kingdom.

AN AMBIGUOUS QUESTION
"That's a swell umbrella you carry."

"Isn't it, some by 'e honestly?"

"I haven't quite figured out if it started to rain the other day, and I stepped into a doorway to wait till it stopped. Then I saw a young fellow coming along with a nice large umbrella, and I thought if he was going as far as my house I would beg the shelter of his bumbrella. So I stepped out and asked, 'Where are you going with that umbrella, young fellow?' and he dropped the umbrella and ran."
