"There's a reason," and it is explained in the little book, "The Road to Wellville," in pkgs. Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

__¥_ LEAVES LIKE CHAMPAGNE. Natives Who Chew Them Become

Intoxicated. An interesting plant called "khat" has recently been obtained by the government plant bureau from Aden, in Arabia. When its leaves are chewed they are said to affect one like a bottle of champagne, being most agreeably stimuating. Presumably it would grow very well in our southwestern counry, but seeds of it will not be distributed until something more

loid which it contains. Khat is a shrub known commercially in only two localities in the world-on the west coast of Arabia, and near Harrar, in Abyssinia. It will thrive only in the mountains of six bad cases of Catarrh, including my 3,500 to 5,000 feet above the sea level; it will not live anywhere near remedy because it is capable of going salt water, and in cultivation it has

manure. The plant has thick, dark green foliage, and is propagated from cuttings, yielding its first commercial crop of leaves the second year. When the Arab cultivator sees birds eating the leaves he knows that E. KRAMER Belleville, Ont. they are ripe and of good flavor for market. The leaves are used everywhere throughout Arabia. To the work would be unendurable without khat, and there is no coolie too poor to buy his daily portion of the plant. It is the great fact next to

Five eighths of the surface of the earth is covered with sea to an average depth of 21/2 miles. In the open sea the rise and fall of tides is less than 2 feet, but, where the water is narrowed and shallowed by land, the rise and fall increases greatly.

DREAMS IN SCIENCE.

Years Ago.

Almost all ecientific observer agree that the materials of which dreams are made are memories of past experiences of the individual. Curiously enough, the memories that occur most frequently are those of the previous day and those of early spildhood,

In many cases where the incidents of a dream com to be entirely unfamiliar it has been shown by careful investigation that they correspond to actually experienced events that have escaped the memory of the waking self. Delboeuf records an interesting example of

In 1862 he dreamed that he found two lizards in the snow. He took them up, warmed them, and placed them in a hole in a wall, together with a small fern, which he know they liked the cat. The harme of the they liked to eat. The hame of this forn seemed in his dream to be Asplenium ruja muralis. On awakening he could not

member ever to have heard the name of the fern of his dream, although he discovered that a leri called Asplenium ruta mururia really existed. Sixteen years later, nowever, he happened to be turn ing over the pages of a friend's album of dried flowers, and to his surprise came across the very fern, much overcome by constant headaches, with the Halin name written under neath in his own handwriting.
