STARTLING INCIDENT

Suffragette Threw a Document at the King.

A dispatch from London says: A somewhat startling incident occurred during the King's visit to Bristol on Friday to attend the Royal Agricultural Show. As His Majesty was driving through the streets a young woman dashed out of the crowd past the police and military cordon, and threw a document into the Royal carriage. The document fell into the lap of Lord Acton. Immediately after the paper was thrown an officer on horseback with a drawn sword placed himself between the woman and the Royal carriage. She did not make a further attempt to reach the King, and submitted quietly to arrest. "It was only a document begging the King to use his influence to give us women our rights," he said in response to angry remarks. She was Mary Richardson, aged thirty years, and a member of the Women's Social and Political Union.

FLAG-WAVING STARTS RIOT.

Stars and Stripes Trampled in Dust at Winnipeg.

A despatch from Winnipeg says: At an early hour on Friday morning the Stars and Stripes was trampled in the dust on Main Street at a time when thousands of Winnipeg and other Manitoba soldiers were returning from the annual camp at Seward, near Brandon, where they had been managing under Sir Ian Hamilton. The sight of a young man waving a large American flag in the face of the returning One Hundredth Regiment started a small-sized riot. The flag was trampled under the feet of the marching soldiers, and several of those who took part in the fight that followed the appearance of the flag received black eyes and cut faces.

WINDSTORM AT BUFFALO.

One Life Lost and a Score of Boats Swamped.

A despatch from Buffalo says: One body has been recovered, a number of boats were swamped, and many damage was done by a terrible wind storm that swept Buffalo and the lakes late of Friday afternoon. The eyes of the life-savers were bright in sixteen holes who were clinging to the floating logs. An exuberant steamer saved a man and a woman from death just as their boat went down. A number of empty boats were found drifting in the harbor after the storm abated, it is feared that several persons were drowned.

FATAL ICE CREAM FREEZER.

A little Girl Fell In Head-Holes, and Was Drowned.

A despatch from Winnipeg says: While searching for a tin can which was floating in the tub of an ice cream freezer on Wednesday a two-year-old Gertrude Wolf slipped and fell in head-first, and drowned in six inches of water.

THE WORLD'S BIGGEST SHIP

**NEW HAMBURG-AMERICAN
LINER IMPERATOR.**

Every Modern Device for Safety, Comfort and Luxury is Found on Her.

Waiters' towels, and 2,000 linen covers.

In the building of the Imperator 1,800 artisans worked more than 1,000,000 working days, or three years. The contract was given to the Vulcan Works at Hamburg on June 18, 1910; she was christened by Emperor William and launched on May 23, 1912.

\$7,600 IN PRIZES.

Will Be Given at the Ontario Rifle Association Meet This Year.

There promises to be much military activity at the Long Branch Rifle Range from August the 16th to the 22nd during the five days annual meet of the Ontario Rifle Association. Capt. Armand A. Miller, Secretary of the Association, has just issued the annual programme, and it is full of interesting features. The aggregate of this year's prize list is seven thousand six hundred dollars, about one thousand dollars ahead of any previous year. The cities of Toronto and Hamilton have vied almost with each other in donations to the prize funds. Among the well-known Toronto people whose trophies will be contested, are His Honour the Lieutenant Governor, Mrs. H. D. Warren, Sir Henry M. Pellatt, and Colonel W. C. Macdonald. Mrs. Warren has donated prizes to the amount of \$275.00 for competition among school cadets. Last year the youngsters to the number of one hundred attended the meet, and this year, as the Council of the Association is offering to pay half the railway fare of each cadet from Ontario, there should be a regiment of them anxious to shoot bullets along side the grizzled veterans of the militia. Teams of six members each from the nine provinces may shoot for Sir Henry M. Pellatt's magnificent new cup in the Interprovincial Match. Each marksman of the winning team will get a miniature of the cup and a share of the one hundred and twenty dollars in cash that goes with it. Sir John M. Gibson's generosity has made possible a new match called the "Lieutenant Governor's," with 200 prizes, amounting to over \$1,000.00, in addition to the Lieutenant Governor's gold medal. This match will be a permanent one on the programme of the Association, and will stand as a fitting memorial to his Honour's many years of active service to the advancement of rifle shooting and military education in Canada. An individual competitor in the Lieutenant Governor's Match, who is lucky, may receive a Ross Rifle, offered by Hiram Walker & Sons, of Walkerville, and other prizes totalling in all \$150.00 in value.

The Imperator will also carry a gardener, one chief engineer, three watch engineers, all firsts, twenty-five engineers and electricians, three doctors, two medical assistants, trained nurses, apothecaries, a paymaster and three assistant paymasters, storekeeper, provision superintendent, five provision overseers, three baggage masters, a superintendent of materials, three wireless telegraphers, two telephone operators, four barbers, a hair-dresser, an editor, three printers, cabinet-maker, tailor, four purrs, four elevator operators, two chief chefs—one for the first-class kitchens and the other for the Ritz-Carlton restaurant—116 assistant cooks and scullions, including five pastry cooks, five butchers, twenty-one silver and glass cleaners, sixty-two stewards for subsequent work pertaining to meals, a total serving personnel of more than 500 stewards, bathroom attendants, rubbers, manicures, chiropodists, florist, stenographers, photographer, interpreters, handmaster and band, and perhaps guides, with a crew of 1,180 all told, selected for their long service on other ships. She has accommodation for 2,406 passengers.

An Immense Crew.

The Imperator will also carry a gardener, one chief engineer, three watch engineers, all firsts, twenty-five engineers and electricians, three doctors, two medical assistants, trained nurses, apothecaries, a paymaster and three assistant paymasters, storekeeper, provision superintendent, five provision overseers, three baggage masters, a superintendent of materials, three wireless telegraphers, two telephone operators, four barbers, a hair-dresser, an editor, three printers, cabinet-maker, tailor, four purrs, four elevator operators, two chief chefs—one for the first-class kitchens and the other for the Ritz-Carlton restaurant—116 assistant cooks and scullions, including five pastry cooks, five butchers, twenty-one silver and glass cleaners, sixty-two stewards for subsequent work pertaining to meals, a total serving personnel of more than 500 stewards, bathroom attendants, rubbers, manicures, chiropodists, florist, stenographers, photographer, interpreters, handmaster and band, and perhaps guides, with a crew of 1,180 all told, selected for their long service on other ships. She has accommodation for 2,406 passengers.

Always in Touch With Shore.

No wireless telegraph will carry to either shore of the Atlantic, working over a radius of more than 1,500 sea miles. The ship has two receiving antennae, two receiving instruments, for long and short, Hertzian waves and designed for news service and rescue work. She is in communication with land throughout the entire crossing.

The current is developed by five turbo dynamos and a motor dynamo driven by a benzine motor high above the water line on the boat deck. The ship has more than 10,000 electric lamps, four electrically operated passenger elevators, five provision elevators, pivotal cranes, call bells, heating apparatus, etc.

Wave Motion Absorbers.

There are also Schlinger tanks, or wave motion absorbers, which reduce the rolling motion.

The ship is nearly one-fifth of a mile long—919 feet—and 98 feet broad, and her tonnage is 50,000.

On her trial trips, it is sworn, she made twenty-three knots an hour.

She carries no more, or but few more, passengers than do ships of half her tonnage. Besides the dining rooms, there are ball rooms, grill rooms, smoking rooms, gymnasium, roof gardens, public baths and lounges and the main lounge, which is hung with Gobelin tapestries and fitted with a stage for theatrical and operatic performances, can be converted into a ballroom.

Seeing the Wind.

If you take a saw and hold it at right angles with the wind, teeth upward, and look along the tips of the teeth, you can see the wind streaming by and through the teeth, the notches just like a flowing stream. The explanation, says Mr. Lawrence Hodges, must be practically the same as for the little streams of wriggly air we sometimes see over our radiators; that is, that the air is broken up into currents of different densities, and consequently, light coming through these currents is bent to our eye and their form noted. The wind, coming with some force, is impressed or dense air streams through the notches. The form of the stream is visible to us by the refraction or bending of the light that reaches our eyes from objects or particles seen through the streams.

Provisions for an Army.

At New York, preparatory for a trip to Hamburg, the Imperator will take on board 45,500 pounds of fresh meats, 45,000 eggs and 121,000 pounds of potatoes. Her larder contains, besides 25,500 pounds of fresh vegetables, 16,000 lbs. of canned vegetables, 10,500 pounds of fowl and game, 9,000 lbs. of fish and shellfish, 800 pounds of mushrooms, 4,000 cans of preserved fruits, 12,500 quarts of milk and cream, 400 pounds of tea, 500 pounds of chocolate and cocoa and 7,000 pounds of coffee.

Each room has a brass bedstead,

a marble wash stand, hot and cold water, and a convenient arrangement of mirrors, dressing tables and electric lights. In the first-class are 714 beds and 184 sofa beds.

In the hotel's \$50,000 linen supply, are, on the outward voyage,

the strong, healthy man or woman.

It stands to the true theory

of health. There is reason,

it is explained, in the little book "The Road to Wellville," in

which the author, a healthful

and happy life is described.

He has said that the

best way to live is to eat

what you want, when you want

it, and to exercise every day.
