

After all, it is

# QUALITY

that counts

During the past few weeks of Slaughter Sales the people of Markdale have had a great opportunity to choose between my exclusive high-class clothes tailored up to a standard and those of the other kind made down to a price. Never before have I been so well satisfied with the foundation of "quality" on which I built this business. My ideal has always been high-class goods at a fair price—fair to the buyer, fair to the seller.

To-day that policy is giving its best results. While others are driven to questionable methods to unload their "cheap" clothing, my hand-tailored garments for men stand out in a class by themselves and sell at 100 cents on the dollar, and the customer knows they are worth the money.

At present I am showing a beautiful range of two and three-piece Summer Suits cut in a smart two-button model (same as illustration) made from "Hewson Homespun" in grey, brown, leather mixtures, prices \$10, \$12, \$15, \$18. See these exclusive lines before you buy.

### The Life of An Editor.

Many people believe that a newspaper falls together without work, concerted plan or action. The Rev. McLeod, a Presbyterian minister of Pasadena, was of the opinion, and asked to be allowed to edit one edition of the Pasadena Star. This is how he confessed himself at last at the end of his task, which, it must be said, had been done quite creditably: "My time is now almost up as I pen this last line. Never again shall I criticize newspaper men; more if they have my heart's forbearance, henceforth and forever. They are the hardest worked, shortest lived, poorest paid brain workers on this weary old world."

Ottawa has a population of over one hundred thousand.

The school is new and was graded high in every department by the Provincial Inspector. It is provided with a good library to which additions are constantly being made. It has also a well equipped laboratory, where students are encouraged to perform experiments in Science.

In connection with the school is a branch office of the Department of Agriculture, under the direction of Mr. H. C. Duff, B.S.A., where students may obtain information on Agriculture and where classes will be organized during the coming winter.

The staff will consist of Mr. W. C. Rogers, as principal, who has an M.A. degree with honors and medal in Chemistry, Mineralogy and Geology, and a full B.A. degree in Arts in the following course, English, Mathematics, Physics, Botany and Zoology. Excellent private board may be obtained in the village at reasonable rates.

### School Fairs in South Grey

Mr. H. C. Duff, District Representative of the Department of Agriculture, at Markdale, is endeavoring to introduce a very interesting and educational idea into the community. The Science of Agriculture will no doubt be, in a few years, one that will appear in the curriculum of all Public Schools and the Government is gradually getting the public accustomed to it, by means of School Fairs. At present there are but two townships in Grey Co., interested in the project, one being Egrement and the other Proton. It is the intention of the Department to introduce them to other townships with no doubt, some in this vicinity will be anxious to undertake the project.

The School Fairs are under the supervision of the District Representative. Seeds and instructions are issued through the teachers in the spring and the children plant what they choose at home. Then in the fall, September, the fair is held at the school-house. The corn, oats, barley, etc., that the children plant are ranged along with anything else they may have chosen to prepare for the fair, such as poultry, collection of weeds, collection of insects, mounted and correctly named with common names, cooking, sewing and flowers.

Prizes ranging from ten cents to a dollar are given for the various entries, and without taking into account the education a child interested receives, very pecuniary reward is within reach of the successful ones.

No entry fees are charged to the children exhibiting. It exhibits must be the work of the property of the exhibitor. All exhibits of poultry, grain and potatoes must be the product of material supplied by the Department.

The School Fair in Proton takes place at S.S. No. 3 on Sept. 16th and will be open to School Children from S. S. Nos. 3, 6, 9, 11 and 14; the Egrement Fair will be held on Sept. 17th at S.S. No. 10, S.S. Nos. 2, 3, 4, 6, 8, 9, 10, 12, 13 and 14 of the Township of Egrement. These Fairs are the first in Grey County and no plans or expense will be spared by the Department to demonstrate the object and possibilities of this branch of Agricultural education.

The authorities of some of the neighboring townships should take steps to secure the benefits of the scheme and thus enable a more scientific knowledge of Agriculture to be obtained by the children in rural districts.

The body of Herbert Kirenner, the Hanover young man who was drowned at Sauble Beach last Friday, was recovered on Wednesday. It was found by Rev. Mr. Jackson, a camper, and his daughter, at the mouth of the Sauble River.
