CHAPTER XVII. (Continued.)

He had some cards in his pocket, and he took them out. He had a card from Miss Deane, and he looked at it. He had a card from Miss Deane, and he looked at it. He had a card from Miss Deane, and he looked at it.

CHAPTER XVIII.

It was a very large party, but there was no dancing. The music played, and the guests talked and laughed. Lady Roberton looked at the guests and saw that they were all enjoying themselves.

CHAPTER XIX.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XX.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

CHAPTER XXI.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XXII.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

CHAPTER XXIII.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XXIV.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

CHAPTER XXV.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XXVI.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

CHAPTER XXVII.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XXVIII.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

CHAPTER XXIX.

She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her. She looked at him with a smile, and he looked back at her.

CHAPTER XXX.

He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him. He looked at her with a smile, and she looked back at him.

wanted me to see people, go into society and here you are, you see? He said, and there was a greasy and interested look in his eyes which Decima felt.

"Oh!" she said, "I am not interested in you, but I am interested in the room. How beautiful it is! I mean the room, not you."

"And the dress and the jewels," she continued, "are quite magnificent, and I am a great admirer of your taste. But I am not interested in you, but I am interested in the room. How beautiful it is! I mean the room, not you."

Na-Dru-Co Laxatives

accomplish their purpose with maximum efficiency and minimum discomfort. Increasing doses are not needed.

25c. a box at your Druggist's.

National Drug and Chemical Co. of Canada, Limited.

HOME

Good Canning.

How often do you hear the complaint that the squash or beans you took so much trouble to can have a little bitter taste from the preserving acid you used? It does not affect corn or tomatoes in this way, but does almost every other vegetable. Secure the best vinegar you can buy on the market and try the following recipe, which has been used with success.

Wash four beans thoroughly. Some persons strain them, but they retain their flavor better whole. Measure them carefully in a quart cup, counting each quart as you put it into the kettle. Add just enough water to cover them. Then put in one tablespoonful of vinegar to every quart of vegetables. Cook until tender, but not a minute longer. Hot jars filled and standing in hot water. Seal to overflowing with the hot vegetables and put caps on instantly. The rubbers should be put on beforehand.

The same recipe applies to squash, butter beans and okra. A tablespoonful and a half of vinegar is sufficient for cucumbers. These are gathered just before they are ripe, and are peeled, not sliced. An inferior vinegar will ruin your work.

Danish Pickle.—Cut three medium-sized heads of Danish cabbage, commonly known in America as purple cabbage, and three quarters of firm onions in moderate-sized pieces. Mix thoroughly with the vegetables one large cupful of salt. Put in a thin bag to drip overnight. The next morning wash the cabbage and onions through several waters, and then boil them until tender in a porcelain or granite vessel. Then squeeze all the water from the mixture.

In one pound of brown sugar mix two tablespoonfuls of ground cinnamon and add three quarters of the best cider vinegar. In a little cheesecloth bag put one tablespoonful of prepared pickle flavoring, which can be bought in ten cent

MAGIC BAKING POWDER

TO GUARD AGAINST ALUM IN BAKING POWDER SEE THAT ALL INGREDIENTS ARE FULLY PRINTED ON THE LABEL, AND THAT ALUM OR SUPERPHOSPHATE OF ALUMINA OR SODIC PHOSPHATE IS NOT ONE OF THEM. THE WORD "NO ALUM" WITHOUT INGREDIENTS IS NOT SUFFICIENT. MAGIC BAKING POWDER COSTS MORE THAN THE OTHER KINDS, FOR IT IS THE ONE POWDER WHICH

Standard Flour

Standard Flour is the best flour for all purposes. It is made from the best wheat and is milled to the highest standard. It is the flour that all the world is using.

THE DROWNING MAN.

How He Acts in the Water and How to Rescue Him.

When a person is unable to swim he probably flings up his arms and shouts for help. In doing so he parts with a large quantity of air from his lungs. As his mouth is just about on a level with the surface of the water at the next inspiration he swallows a large quantity of water. The inhaled water acts up containing air and water are expelled. More water is then inhaled, until the lungs become surcharged and the body weight increased. The drowning man by his struggles for air makes convulsive grasps of anything within reach, and here is the great danger of attempting a rescue for the drowning man may grasp the rescuer and together they sink and drown. In attempting to rescue a drowning man, keep him at arm's length. Grasp him by the hair, if possible, and pull him ashore, or to a place of safety, and begin artificial respiration at once. Let it be remembered in this connection that the body is only very slightly heavier than the water, and will float more readily if the water around it is warmer. If self-protection is indicated and the air kept in the lungs, and now and then, when opportunity offers, a fresh supply of air is inhaled, one can keep oneself afloat for a long period. This is more quickly attained if some of the water swallowed can be thrown off and a steady breathing motion kept up. (C. H. Hayton.)

FINGER-PRINTS IMPROVED.

The Back of the Hand Will Now Be Photographed.

The finger-print system is generally regarded as the best word in scientific detection of crime, but a newer method is being experimented with.

The great objection to the finger-print system is that, though it is quite trustworthy as far as it goes, being based on the fact that no two people in the world have the same pattern on the skin of their fingers, tips, it is easily rendered useless by wearing gloves or by having the finger tips deliberately defaced. Every crack burglar knows this nowadays.

But the newer system will baffles even the wisest of burglars. The idea is to photograph the back of the hand of every convicted criminal, and to compare the pattern on the back of a man's hand with the pattern on his finger tips. The chances are billions to one that two men's hands showing the same arrangement of veins. The photograph is taken after the hand has been allowed to dangle down for a minute or two, so that the rush of blood may make the network of veins stand out prominently. One scientist has suggested banding the wrist with a tight bandage for the same purpose.

The advantage over the finger-print system is that no one can attempt to alter the arrangement of the veins without running great danger of bleeding to death.

GRIMSBY STORIES.

Two Good Ones From England's Great Fishing Port.

A young clergyman of the Church of England named Trebeck, was once dining at the house of his bishop. The young clergyman, whose parish was Grimsby, the great fishing port of England, showed a most unexpected knowledge of horses, and a severe old fisherman, who sat next him, listened in stern disapproval to his conversation. At last she said: "I think, young man, you said you feed at Grimsby. Let me advise you to leave horses alone, and make acquaintance with that warty, pink young creature, Mr. Trebeck, who has lately gone there, and who is doing such good work among the fishermen."

There was a roar of laughter, which the old fisherman could not understand.

"I happen to know him a little," replied his neighbor, "and I am afraid he is not very worthy of your praise."

"In 'Glimpses of the Past' Miss Elizabeth Wordsworth tells this story, and she says that Mr. Trebeck likes to tell himself."

"One stormy day a fishing smack was wrecked, and a fisherman, when the skipper came on deck, he said the man was fish-er-er-er-er."

"What? the name of that fish?"

"Yes, my name, I know it, but I don't know the old fish's name."

"I thought I told you to quit using tobacco," said the doctor. "I have quit it," replied the young man. "Then what is that in your mouth?" asked the doctor. "A cigarette," replied the young man.

Ontario Veterinary College

Ontario Veterinary College is the leading school of veterinary medicine in Canada. It is located in Guelph, Ontario, and has a long and distinguished history. It is the only veterinary college in Canada that is a member of the International Association of Veterinary Schools.
