FI MISH FREEDOM.

Liberty Only a Name In Russia's Subject Country. Finland is a country that excite but little interest outside Russia and its own boundaries, although it has an academic interest of its own to all lovers of freedom, that freedom which is but a name to the Finn of the present day. But the following will be of interest to those whose sym-

pathies are always with the under dog

in an unequal fight. The scene was the Church of St. Nicholas at Helsingfors; the occasion of the opening of the Finnish Diet. From the numerous galleries hundreds of faces peered down on the more favored persons who sat below. There was none of the excitement and color associated with such scenes in other countries. Everyone knows that the new Diet only marks another stage in the struggle with the Russian autocracy, and never have things looked so hopeless as they do now. Nevertheless the people who thronged to see the ceremony did not look depressed, but merely stolidthey are accustomed to suffer—and deep down in all of them is that vein obstinacy and love of freedom which enables them to wait for better Presently there marched slowly in

through the great door the members of the Finnish Diet, headed by their Socialist Speaker, with the vice-speakers on either side. It was a moving sight to watch the procession file by-the most democratic of parliaments threatened by the most reactionary of Governments. The Dollars (\$3,000) and interest clothes of most of the members were simple and homely, in keeping with their peasant faces. Here and there we noticed a woman in the line. It seemed mainly an assembly of farmers-careworn, silent men, with rugged, strongly marked faces. They took their seats and the service be-

When we left the church for the pulace, where the second part of the ceremony takes place, we were brought face to face with immediate grim realities. We stood in a gallery looking down over the baltroom of the palace, which in happier days was the scene of friendly hospitality extended by the Czars to their faithful subjects. To-day no Czar comes to the deserted building, which lives on its memories. Only when the Diet is opened does it regain a temporary

Presently a symbolic drama was played out before us. From one door entered the peasant Diet, led again by the Socialist Speaker, and looking curiously out of place in the polished and shining hall. They took up their position in a semi-circle opposite an imposing empty throne placed on a

After a few minutes a sharp mili-tary shout was heard and the Russian governor-general entered, followed by an endless succession of officers, both military and naval, in gorgeous uniforms. Glittering in steel and gold, they took up their positions opposite the sombre colored Diet. There was something curiously barbaric and Asiatic about them. One was inthe sum of Eleven Dollars voluntarily reminded of the group-

Nothing more happened. The uniforms trooped out at one door, the black coats and homespuns out at another. The muzzled Diet had had its session opened. In the streets outside were Cossacks.

The Bookplate. An ex libris, or bookplate, is a small piece of paper whereon is printed the owner's name and pasted on the inside cover of a book-in other words, it is a printed slip to denote the ownership of books. A proper ex libris should have, first of all, the name, boldly and plainly printed, and space left for the number of volumes con tained in the library; then, to make it more interesting and personal some decorative device of the owner's peculiar and individual choice as well some favorite motto; if desired In Europe those who have the right use family crests of armorial bearings for their ex libris.

ANCIENT JOYS.

Memory Experiences Them "20, and 30; and 40 Years On."

What has become of the circus of used to bring his girl to town on cir-cus days and treat her to pink lemonade? He always wore a bright red tightly rolled artificial rosebud in the left lapel of his coat, carried a striped cane and tried to ride the trick mules That circus—the old circus—was

one-ring affair, with few elephants, like as not no carmine sweating hippopotamus at all, and few specialists. The acrobats doubled in brass in the street parade, and the bareback riders, clowns and trapeze artists sang and danced in the refined concert after the big show. We have always suspected that the bearded lady is the side show wore trousers under her petticoats and drove one of the vans in the procession; we knew she drank beer and wiped the foam off her beard on a flounce of her dress. This was the old circus. Those who have dwelt always in urban places know little of the delights of watching it come into town. Like everything else in this country it was door

But in growing—and this is perhaps a surprising fact—the old circus has not lost its characters. It is still the same agglomeration of wonders that big that it is overwhelming, but it has not lost its glamor. It is the only thing in the world that ever grev up and still retained its youth. Or, if youth does not breathe out of the circus upon you now, that is not the fault of the circus; it is your fault, You are getting old. You need attempt to lie to yourself no longer; frost has touched your spirit. For the circus is the touch-stone. If you are one of that rare breed of men who never grow old at heart you can laugh at the eat peanuts with relish, applaud the elephant and thrill to the feats of the trapeze artists when you are 98, i your grandchildren will take you the show when you are 98. But if you don't care for the circus, even though you may be only 35, you are

Rebuilding Pompell.

in the sere and vellow leaf.,

When first they began to dig out long buried Pompeii everything found there was taken to Naples, leaving nothing in the excavated places but the bare ruined walls. Of late years a more rational plan has been followed of leaving in place everything but the smaller objects of interest and reproducing roughly the houses uncov ered: Under the present director, Professor Spinazzola, this idea has been developed still further. He has almost entirely rebuilt some of the houses, using all the material found, even to the fragments of the roof tiles. On the famous street of Abundance he has rebuilt even the upper stories and balconies and restored the windows and facades. This gives a new idea of the style of the city of pleasure. A recently uncovered fresco represents Venus standing in a chariot drawn by four elephants.

Compound Interest.

All interest is payable annually or oftener: therefore there is no such thing as simple interest in the long. One dollar at compound interest at 1 per cent. per annum will double in a little less than seventy yearsto be exact, it doubles in 69.66 years. As near as we can calculate, earth is about 3,000,000,000 years old If it took the earth 3,000,000,000 years to grow, how much will interest grow in that time? One cent at compound so much that one vigintillion balls of gold, each as large as the sun, will not then pay the interest for a billionth part of one second of time.

Wetting an Actor. Even water has its substitute on the stage. This is not water for drinking, however, but for garments where an effect of being wet is wanted. An actor might come upon the stage actually aside from his dripping hair he would not look wet. To make an actor look actually wet a great quantity of vaseline is rubbed over his clothes, when with hair dripping wet and the lights reflected upon the vaseline on his clothes, he has every appearance of having just been fished out of the river or ocean or whatever particular body of water he is supposed to have fallen or been thrown into.

Perpetual Pensions. Perpetual pensions are to be found in France as well as in England. On Aug. 21, 1755, the dauphin, son of Louis XV., when out rabbiting accidentally shot Yves de la Boissiere, one of his suit. As a compensation a pension of £240 was conferred on Boisstere, with remainder to his heirs in perpetuity. Despite the many changes in the form of government, this pen-sion has been paid ever since, and no member of the budget committee has ever suggested stopping it.
