Vegetable Pudding.—One cup grated carrot, one cup grated potato, one cup brown sugar, one cup seeded raisins, one-half cup chopped suet or butter, preferably suet; one teaspoon soda put dry into one heaping cup flour, one-half teaspoon each of cinnamon and cloves, no water for wetting; the mixture from vegetables is moistened enough steam in three or four baking powder cans, filled half full and covered. One and one-half hours; uncover and brown in oven one-half hour. Sauce for the pudding: One cup pulverized sugar, one tablespoon butter; mix well, then stir in white of one egg, unbeaten, now beat well. This is almost like whipped cream. This sauce is enough to serve four people; increase according to number served.

Steamed Salmon Loaf.—The following salmon loaf has never been seen in print and is perfectly delicious either hot or cold. Two cans of salmon, one cup cracker crumbs, one large onion fried in four tablespoons of butter and then strain out the onion, four eggs well beaten, one cent bunch of parsley cut fine, salt and pepper. Mix all together and steam two hours. Put in greased loaf pan. Serve with a good white sauce. If you wish the sauce to look pink add a little tomato catsup and it will not only look pretty but taste good.

Rhubarb Custard Pie.—Two cups rhubarb, two eggs, one cup sugar, one tablespoon flour, three tablespoons pulverized sugar. Peel and cut up the rhubarb, pour boiling water on it, let stand five minutes, then drain; beat the yolks of the eggs with the sugar, add the flour and mix thoroughly with a good plain paste, pour this mixture in it, and bake about half an hour. Make a meringue of the whites of the eggs and sugar, place on top when done, and lightly brown.

Two Mullins. These are called the two mullins because there are two measures of each ingredient, with the exception of salt. Served with eggs, fruit, and coffee; a better breakfast at this season of the year is hard to find. Two eggs, two teaspoons sugar, two teaspoons melted butter, two cups hot tea, two teaspoons baking powder, and enough sweet milk to make a soft batter. Bake in a greased pan in mullin tin.

Weak Loaf. Two cups of one and one cup of celery cut in small pieces, one-fourth can of sweet red peppers, but two, one teaspoon of salt, one teaspoon of extract of beef, one envelope of gelatine. Soak the gelatine in one cup of water for five minutes, add one and one-half pints of boiling water, salt, and extract of beef. When beginning to set, add celery, wal, and peppers and turn into mold. When cool slice and garnish with parsley.

Raisin Pie.—One cup of raisins boiled until tender, one egg, one egg, one cup cold water, two tablespoons melted butter, two tablespoons flour, one tablespoon vinegar. Let cool before putting into crust. This is a good selling pie.

Delicious Oil Mayonnaise.—The yolk of a hard-boiled egg, mashed well, one teaspoon salt, one teaspoon of dry mustard, the yolk of a raw egg, beaten and mixed with the other ingredients. Add oil very slowly, as much as desired, (one pint is a good amount). Add lemon juice or vinegar to taste. The difficulty in making oil mayonnaise is to avoid having oil separate from other ingredients. To prevent this mix ingredients in a chilled glass.

Salt Water Taffy.—This taffy, especially near the seashore, is a great favorite and is sold in large quantities. It is made by simply taking the vanilla taffy receipt and cooking it at a slightly lower temperature. When it is done remove it from the stove and stir into it a tablespoonful each of butter, salt and plain glycerine. Pour out and leave the same as other taffy, leaving it white or coloring and flavoring it in different ways. The proper way to finish this candy is to cut it into small pieces with a pair of large shears, and wrap them in thin wax paper to prevent sticking together. This makes a peculiar waxy piece of candy, leaving the last taste in your mouth slightly salty. Pure glycerine is absolutely harmless, as any druggist can tell you, and is used to give the candy that waxy effect.

Useful Hints.—If the finger nails are too brittle rub them with vaseline at night. When taking spots out with gasoline, put a piece of blotting paper under the cloth, and no circles will remain after the material has been cleaned. Baked potatoes are delicious if a slice of bacon is put inside. Make a hole in the potato with a potato

Her Great Love;

Or, A Struggle For a Heart

CHAPTER XVIII.—(Continued.)

It was the one thing needed. The smile came back to her face, and she looked at him with a new interest. "Are you pleased?" she asked, and she smiled approvingly at him.

At last Lady Deborah looked round at the ladies, and rose, and they filed out. Gaunt was near the door, and he opened it for them. As he passed, he looked at her, and she looked at him. "You are a very nice girl," he said, and he smiled at her.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

Living in British Towns

INCREASED 25 PER CENT. IN SEVENTEEN YEARS.

Food Prices 12 Per Cent. Higher in London Than in Other Towns.

The declining purchase value of the sovereign emphasized in the report of the British Board of Trade of the economic position of the working class household, which has been published in a book by the principal towns were taken and since 1905 the board estimated on a similar inquiry, a comparison of the cost of food and other necessities is possible. The same report discloses several outstanding facts.

Rents have changed very little on the average, while the prices of commodities consumed by the working classes have increased materially, though they are still lower than a generation ago.

Sir H. Llewellyn Smith compares the average increase in working-class food and clothing taken together at about 10 per cent. There has been a distinct upward movement in wages, the most noticeable increases in rates of wages in all classes being:

Building trade, skilled men, 2.6; Engineering trade, skilled men, 5.5; Laborers, 3.9.

Printing trade, compositor, 5.5; There are cheap and dear towns in London, the cost of living in the city being the highest and the lowest in the other districts of the town.

Though in London the cost of living is higher than in other districts, they are still much higher than in some of the other districts of the country. The average level of food prices in London is the highest in the country, and the cost of living in London is the highest in the country.

The number of these cylinders, in fact, makes a line of skirmishers whose operations may inflict terrible damage on the enemy. The inventor claims that only 30 per cent. of the enemy would be saved after an attack of these automatic troops.

The skirmishers would be placed in rows behind other, to be used successively for resisting various attacks and as the cylinders are hidden in the ground, no enemy can know where the line is before the firing starts.

PROHIBITION FOR SWEDEN.

Royal Family Favors a Law Against Liquor.

There is a prospect that Sweden may soon be placed under national prohibition. A law making it an offence to drink spirituous liquors, anywhere in the country are contemplated, and there is a reasonable chance that they will be adopted.

Prime Minister Staaf, in a recent address before a congress of totalitarians in Stockholm, declared that prohibition was the only effective means of preventing drunkenness. All other attempted methods of reform, he said, had proved ineffective and insufficient to stop the evil.

The Prime Minister's speech is considered an indication of the Government's policy, and is believed to foreshadow the introduction into Parliament of a bill for the prohibition of all spirituous drinks in Sweden. Such a law would command the support of the Royal family. The King is a strong temperance advocate.

A prohibitive law would be likely to meet with opposition from France. Sweden has a big trade in wines and spirits with France, and she depends upon the French market to finance many Swedish enterprises. There are fears that the exclusion of French wines would encounter retaliation in the form of exclusion of Swedish securities from the Paris bourse.

A proposal to increase the duty on wines in 1914 had to be dropped because the French Government protested and threatened to bar Swedish consols from the Paris Stock Exchange.

So Much For History.

Hurace sat and gawped his men, concentrating a look of hatred on the blank sheet of paper before him. From his seat he could see every member of the class writing, as if for dear life, an essay on Henry VIII.—their allotted task.

"Two minutes more," came from the teacher. Then Hurace, in desperation, seized his pen and made a bid for fame—as follows:

"Henry VIII. was a King of England, and the greatest widower ever was. He was born at a place called Anno Domino, and he had sixty wives. The first he ordered to be executed, but she was beheaded. He revoked the second, and the third died and then he married Annie Bowling, the daughter of Tom Bowling. When she died he was succeeded on the throne by his Aunt Mary. Her full name was Mary Queen of Scots, or the Lay of the Last Minstrel."

NEW WAR ENGINE.

"Soldier-Automaton" Said to Be Substitute for Skirmishers.

Yet another terrible engine of war is likely to be added to the equipment of modern armies, if the invention of an engineer named Aassen of Copenhagen fulfills expectations. This engineer has perfected an invention which he calls a "soldier-automaton," an automatic machine for replacing the line of skirmishers for defensive purposes. Briefly, it consists of a cylinder which is buried in the ground and which, like submarine mines, may stay there for years without being damaged. A signal station at a distance of four or five miles away is connected with the cylinder. By pressing a button an electric current is transmitted and the cylinder shoots up, until it is about two feet from the level of the ground, firing at the same moment 400 shots in a horizontal direction.

The value of such an invention in repelling invaders is obvious. It means that one of these cylinders can take the place, at any point, of 400 soldiers, and if a number are buried in proper systematic order over a certain stretch of country, a continuous hail of bullets can be fired at an invading army, without the latter seeing a single enemy.

The number of these cylinders, in fact, makes a line of skirmishers whose operations may inflict terrible damage on the enemy. The inventor claims that only 30 per cent. of the enemy would be saved after an attack of these automatic troops.

The skirmishers would be placed in rows behind other, to be used successively for resisting various attacks and as the cylinders are hidden in the ground, no enemy can know where the line is before the firing starts.

INCREASE IN FOOD PRICES.

The following table outlines the approximate percentage increase in the cost of food which has taken place since 1905:

Potatoes, 100; Wheat, 100; Corn, 100; Rice, 100; Beans, 100; Lentils, 100; Peas, 100; Sugar, 100; Tea, 100; Coffee, 100; Butter, 100; Eggs, 100; Milk, 100; Meat, 100; Fish, 100; Fruit, 100; Vegetables, 100; Spices, 100; Condiments, 100; Alcoholic liquors, 100; Tobacco, 100; Miscellaneous, 100.

From Sheer Habit.

Miss Mullitt had received a letter from the "Band of Sisters" for the "Blessed Bachelors," and she was shown her prison for the first time.

One of the sisters, evidently a young educationist, evidently her mother, she said, she entered her cell, looking for the "poorness" of the apartment.

Miss Mullitt could not help but admit that she was in a very bad way. "I am in a very bad way," she said, and she looked at her mother with a sad expression.

"How very interesting," said Miss Mullitt, "were you ever in prison?"

Self-Confidence.

"I will not give up my self-confidence," said the man, and he looked at the woman with a determined expression.

"You talk like a man who has never been in prison," said the woman, and she looked at the man with a sad expression.

"One good turn deserves another," said the man, and he looked at the woman with a determined expression.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

"I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him. "I am glad to hear that," she said, and she smiled at him.

THE MARKET

STANDARD

Every Wednesday Afternoon by the Standard Printing Co.

Subscription \$1.00 a week in advance, or \$1.00 a month in advance. No paper discount. All orders are subject to the condition that the advertiser pays for the space in advance.
