THE WORLD IN REVIEW

Twenty Years After.

According to a prominent French engineer the Panama Ganal locks will be obsolete in twenty years, and a water level canal will be necessary. Under the precision will advised when he endeavored to perfect and will be necessary. Under the precision will advised when he endeavored to perfect the sole right to build a canal through Nicaragua wherever it chose, in return for three million dollars. Some other concessions were to be made, but this was one of the most important. As the United States has built the Panama Canal through Irom the Atlantic to the Pacific must be controlled by her or else the enormous expenditure on Panama might be deem controlled by her or else the enormous expenditure on Panama might be deem ed wasted. But in the nuxt twenty years that the Panama Canal with its locks will be unable to handle it. In that case another canal through Nicaragua might become a necessity. Considering the tremendous possibilities of the western mendous possibilities of the miles of the material will be unable to handle in the metal of the miles of the material will be unable to handle it. In that case mendous possibilities of the western mendous possibilities of the western mendous possibilities of the mendous possi

Vacuum-cleaning the Blood.

International Medical Congress in London, there was nething more promising of future results of great value to human kind than Professor Able's account of his attificial kidney. Ho opens one of the large blood vessels of an anaesthetized animal, inserts a glass tube, and conveys the blood to a series of small tubes made et or purse enables you to stop a cold of celleidin. From these the blood passes with the first sneeze. Large size costs of celloidin. From these the blood passes through another glass tube back into the ahimal and re-enters the latter's circulation. The celloidin tubes are porous to all diffusible substances in the blood, and being placed in a saline solution act as a sort of filter. As the blood passes through this little set of artificial capital bries it is set to great washed or liter.

Another Antarctic Expedition.

the globe untrod by man.

Effects of the Balkan War.

There will be bitter suffering in millions of families of Europh this winter: Coarse food will give place to coarser, be'ts will be tightened in place of meals, rations, will be ehortened, and every public and private agency of relief will be taxed, to capacity to keep hardship from becoming disaster. For more than a thous, and million dollars of Europe's liquid apital has been burned up in the Balkan war, or has gone into unproductive. Increase of armies already too great for taxilly yers to support. The coming hardships will press most heavily upon lands which felt the devastation of war—Turkey and Bulgaria and the fought-over regions of Thrace and Macedonia. In the first-ness to privation, and in Turkey the inchoate character of society will increase the ills of poverty. But, while these lands shifter worst, no part of Europe is wholly exempt. Fifteen thousand men fare already out of work in Berlin, and the authorities of that city are expecting a rejetition of the bread riots of last year. Martial law prevails over large districted Austria and Russia. Workers in Italy are striking for a living wage, and even in prosperous France and Holland the pinch is felt.

The Power of Publicity.

The Power of Publicity.

Advertising not only pays, but its value as news is coming to be more and more appreciated. There is not an enterprising corporation or shrewd business firm that is not now informing the public through the medium of advertisements what kind of new business each is engaged in and what are prospects for the future.

The old time methods of silence on the part of public utility corporations have been abandoned. No one is advertising to a greater extent than the heads of big transportation companies and those corporate bodies engaged in the dissemination of intelligence by telegraph, telephone and wireless. These are sonsible moves.

Mr. Daniel F. Fraser, of Bridgeville, in Mr. Daniel F. Fraser, of Bridgeville, N. S., says about GIN PILLS, "For twenty years, I have been treated by many doctors but found little relief. I had given up all hope of getting cured when I tried GIN PILLS. Now, I can say with a happy heart, that I am cured after using only four boxes of GIN PILLS."

50c. a box, 6 for \$2.50, Sample free if you write National Drug and Chemical Co. of Canada, Limited, Toronto. The Power of Publicity.

pages and wireless. These are consible moves.

The public is intelligent enough to appreciate all publicity based on the truth. The truthful advertiser succeeds all the time, and he is deserving of all the increased patronage he is sure to receive. When there is a lull in business from any cause chrowed men of affairs get busy and advertise.

another canal through Nicaragua might become a necessity. Considering the tremendous possibilities of the western coasts of North and South America, the millions of people they are able to support, and the comparatively few which they maintain at present, it seems quite likely that in due coarse two canals will not be one too many. To look ahead twenty years in these modern days takes some imagination and daring. Most of us are satisfied with trying to make certain of leoking ahead a day or two. There is no knowing what may nappen twenty years after the canal is opened. If Now York is to become the China of the United State, and all the west coast is to take the place of Europe, one wonders what nation will be in control of the canal.

BURNING OF THE VOLTURM

Harrowing Tale of the Sea Told By Captain France cis Inch of the III-Fated Vessel

A despitch from New York eays:—France of Inch, the youngest of all transatlantic Captains, and certainly as brave as the bravent of them, the boyish skipper who commanded the doomed Volturno, arrive of in New York on Thursday night, a pactor of the Red Star liner Kroonland of the resouring fleet of cloven liners that speeded to the assistance of the Volturno when the wireless fisched the news of the disaster off the Grand, Bunks. The lill-fated Volturno's gallant commander was as youthful in appearance as the youngest of his interviewers, and though a smile played over his features from the moment he began to tell of the discovery of the blaze that doomed his ship there was behind it all a note of sudnay. In the Secioning, said Capt. Inch. I want to say that the Carmania did the very best that she could. I have nothing but praise and gratitude for those gallant secunes who eteamed full-speed to the assistance of my poor ship, and this includes Capt. Barr and the Carmania.

Nobody Brutal on Volturno.

Loss Will Be About \$6,000.

A despatch from Sarnia says:
Fire at 8 o'clock on Sunday night destroyed the seven-roomed Public school at the corner of Brock and Devine Streets. The origin is supgirs into discipline necessary in such einergondes. As a matter of fact my pistel was burned up in the wreschage of the bridge. It night add that none of my of flers or any of the seamen used any and of wonpons in the maintenance of order among the passengers.

The logs of our lifeboate immediately following the discovery of the fire is, of the course, the saddest chapter in the awfurstory. It was my first duty to order two of blats provisioned and made ready for launching, and the disaster that followed the dropping or the attempt to drop them
