NEW CONVENIENT TRAIN TO WINNIPEG.

CANADIAN PACIFIC.

The popularity of Canadian Pacific service, and the excellence of that road's equipment, has been so greatly appreciated by the travelling public that it has been found necessary to put into service an entirely new Through Standard Express Train between Toronto and Winnipeg.

Commencing Sunday, October 26th, the "Gate City Express" will leave Toronto at 2.30 p.m., and will run daily thereafter, arriving Winnipeg at 8.25 a.m. second morning. The train will consist of the highest class modern equipment: Observation Compartment Car, Standard Sleeping Cars, Tourist Sleeping Car, Dining Car, First-class Coach and Colonist Car. This will be found the most convenient and best train between Toronto and Winnipeg on account of the daylight departure from Toronto at an hour when the Union Station is not badly congested, and also on account of the early hour of arrival at Winnipeg.

The present "Vancouver Express" will continue to leave Toronto at 10.20 p.m. daily and will consist of the same equipment as the "Gate City Express." This train is the best to take for points west of Winnipeg, but for Winnipeg and east the "Gate City Express" is the right train to travel by.

Full particulars from any Canadian Pacific Agent or write M. G. Murphy, District Passenger Agent, Toronto. 1401

ROCKLYN

Mrs. Mick, of Orillia, is at present visiting friends in this vicinity.

Mr. and Mrs. Morrison and daughter, Miss Eunice, of Strathavon, spent Sunday with Mr. and Mrs. Fred McCullough. Miss Eunice intends remaining all winter with Mrs. McCullough.

Miss Olive Yeadell, of Meaford High School, spent Thanksgiving at her parental home here.

Mr. and Mrs. D. Connell, of Holland Centre, spent Friday last with friends at the Lorne House.

Mr. Sam Black, of Toronto, accompanied by his brother, Mr. A. Black, and sister, Mrs. Secord, spent a few days this week with friends in this vicinity.

Mr. and Mrs. Walter McCullough spent Sunday last as the guests of Mr. and Mrs. G. Pritchard, of Vandeleur.

Harry Sugar, a married man with a family, and Fred Fraser, a lad of eighteen, were killed, and three others injured, as the result of a boiler explosion at Mr. Manley Chew's sawmill at Midland.

News to most women!

Oven-tested flour is for sale. Instead of buying ordinary flour you can buy flour whose baking ability has been proven in an oven:

A ten pound sample is taken from each shipment of wheat at the mill. This is ground into flour. The flour is baked into bread.

If this flour bakes into bread high in quality and large in quantity we keep the whole shipment of wheat and grind it. Otherwise we sell it.

More bread and better bread from this flour is a certainty!

PURITY

A Newspaper Snap.

The extension of the Rural Mail Routes has wonderfully increased the number of newspaper readers and many Rural Residents who formerly did not take any paper at all now subscribe for both their local weekly paper and a daily newspaper as well.

The approaching session of Dominion Parliament will see the inauguration of the new parcel post system which will add greatly to the comfort and convenience of the Farming community, as a telephone message to the local Merchant will bring an article by the next mail and will save many trips to town.

The Standard has arranged with The Toronto Daily World to club the two publications and those subscribing now will receive both papers until the 1st January, 1915, for less than the price of one year-s subscription. These two papers will be mailed to you to the 1st January, 1915, for $3.50. Send your subscription order in now and take advantage of the longer period.

Let Us Figure On Roofing Your House or Barn

If you intend to erect a house or barn, or have a building that requires re-roofing, let us figure on the job. Let us prove to you that, while high in quality, Brantford Roofing is very reasonable in price. Let us hand you samples of

Brantford Roofing

so that you can make tests and judge the quality for yourself. Note the toughness and pliability of Brantford Asphalt Roofing—and the Mineral surface of Brantford Crystal, the roofing that doesn't require painting. Look over the whole line: Brantford Asphalt Nos. 1, 2 & 3, Brantford Rubber, Nos. 1 & 2, Brantford Crystal, one grade only, Mohawk, one grade only. Get out the Roofing Book (free) and learn why Brantford Roofing outlasts ordinary makes.

A Good Time

To put in a BATH ROOM OUTFIT or FURNACE is

Right Now

We have a full and complete line of Bath Tubs, Basins and Bath Room Fittings from which to select.

A Large Stock of GENERAL HARDWARE, PAINTS, OILS, STOVES and RANGES always on hand.

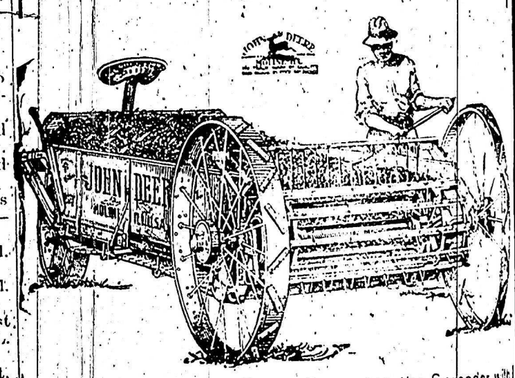
HARDWARE, MARKDALE.

The John Deere Spreader

The Spreader with the Beater on the Axle



On the John Deere Spreader, the Spreader with the Beater on the Axle, two hundred working parts that continually give trouble, are done away with. This spreader is so simple and strong that it does not get out of order. It has no clutches, no chains, no adjustments.

The John Deere Spreader is the greatest improvement in spreaders since their invention. It is as much in advance of ordinary spreaders as the self-binder was over the old reaper.

Simplest and Strongest Spreader Made

The Beater on the Axle

Mounting the Beater on the axle makes the John Deere Spreader possible. This feature is fully patented. You can not get it on any other spreader. The beater on the axle does away with all chains and clutches. It puts the strain and stress of spreading on the main axle—where it belongs—not on the sides of the box or the frame of the spreader.

Mounting the beater on the axle makes the John Deere Spreader easy to load — low down.

Roller Bearings

Roller Bearings, few working parts, the centre of the load comparatively near the team and the weight distributed over four wheels, make the John Deere Spreader light draft. There are four sets of roller bearings, two between the main axle and the beater and two in the front wheels. The beater being mounted on the rear axle and being a part of it, makes only one pair of bearings necessary for the beater and the axle.

Bridge-Like Construction

The substantial steel frame on John Deere Spreaders has high-carbon structural steel

Only "Hip-High"

Few Parts

To start spreading with a John Deere Spreader, move the lever at the driver's right hand until the figure on the dog meets the letter stop at the rear of the machine—there is no clutch. The John Deere Spreader is always ready for use.

We want you to come in and see the John Deere Spreader, the Spreader with the Beater on the Axle. We want to tell you more of its advantages, and to show its simplicity.

David Madill, Markdale
