This is the queer state of affairs that exists in some of the interior cities of Persia. A German traveller, Fetter, just returned from the Orient, brings back some interesting tales of mentally deranged men wonderful beings.

One particularly crazy man, cording to Mr. Fetter, is the craziest man he ever saw or heard of, does nothing all day long but voice :--

"Ali! Ali! Ali!"

This is not a temporary form of madness, either, for he has kept it up for twenty years or so, He started in when he was still a young man, and his idea, of course, is to venerate the name of the god he knows by ceaselessly shricking his name.

He is privileged to break up any kind of meeting or assembly, and all stop and listen to his cries as long as he is of the notion to stay

At his death a huge monument has already, been promised on which will be carved the word "Ali," so it will tell to generations to come the story of the man who spont the best years of his life and all his waking hours shricking the name of the deity he worshipped.
