CONFEDERATION LIFE BUILDING - TORONTO, CANADA

The World in Review

General Smuts has given some explanation of the events which led to the declaration of Martial law and the deportation of Secretary Bain and his companions from Sputh Africa. He stated that Secretary Bain was one of the most desperate men he had everenceuntered. He had known him when he was employed as a secret agent in the employ of the Boor Government of which General Smuts was a prominent member. If this is true then it seems certain that Secretary Bain, as the leader of the old Dutch party, would be in communication with General Herzog as leader of the old Dutch party being desirous of getting rid of Botha. Whether this eventually proves to be true or not remains to be seen, but it is more than likely that behind, the drama of the strike lay the trail of a political intrigue which had as its motive the elimination of General Hotha and the substitution of General Hotha che work of forcing out the government by a general strike and General Herzog. Apparently Secretary Bain was to do the work of forcing out the government by a general strike and General Hotha called out the citizen army, and the burghers as well as the British responded immediately. The whole mobilization of the troops was, according to reports now dribbling through. Most admirable. There was not a hitch anywhere. Over 100,000 men were under arms and after the senset of the strike leaders the movement collapsed. There was ond outbreak at the Jagersfonteln mines, where \$000 mains the strike leaders the movement collapsed. There was ond outbreak at the Jagersfonteln mines, where acceeded but for the herve of the mannager who with forty white men held the natives at bay, having to shoot into the correpound and would have succeeded but for the herve of the mannager who with forty white men held the natives at bay, having to shoot into the forcing excellents of the save the low.

It Pays to Advertis A Peep Behind the Scenes.

It Pays to Advertise.

Listen to this tale of wee from an American exchange: "Additional and before a Senate committee shows how Canadian government money has been used to lure American farmers over the border, with American arural newspapers as the gobetween. A press association with headquarters in Omnia, by the admission of its president, was getting \$42:000; a year from the Doinnloin Government to furnish to small country sheets "holier plate" articles setting forth the superfority of Canada over this country as a place for farmers to make money. This is one of the methods by which \$600,000 Americans have been drawn to Canada within the past decade. A Canadian official lowns up to an annual lox condition of \$70,600 is year to induce immigration, but the American authorities put the figure as high as \$250,000. The shameful thing is that hundreds of American publishers can be found willing to sell themselves to aforeign country." Everybody adm is that it pays to advertise, but the less advertisement Canada has yet received are the thousands of testimonials sent back by satisfied settlers to their old homes advising their friends to come and share their prosperity.

Radium is Being Testod. It Pays to Advertise.

issed settlers to their old homes advising their prosperity.

Radium is Being Tested.

Since the dawn of creation nature has cavefully concealed the secret of radium in the innormest recesses of her womb, until at last, a Pollish woman, Madame Curle, discovered it, Science does not fully understand or appreciate the possibilities of radium. Scientists know that it is the reest wonderful for all innerals yet discovered. They know its innerals the result innerals are probably limities. But the cost is very great and the scarcity of radium makes experiments almost impossible.

In London, Paris, and Berlin, experimental colleges have been established, aupported by the government, where radium is being tested by eminent men of science. A practical study of its uses said possibilities is being made under accomment supervision.

There is not the remotest chance for the alchemist to find bidlum. It is too correfully concouled. After the pitch-bidnes is collected if even now requires months for the extraction and purification of the radium salts. All of the skill of the radium salts. The later is the salt of the part of the purification of the radium salts. The later is the salt of the skill of the part of all possibilities and the salts. The of the skill of the part of all purification of the radium salts. The later is the salt of the skill of the part of all purification of the radium salts. The later is the salt of the skill of the part of all purification of the carregion and purification of the radium salts. The later is the salt of the skill of the part of all purification of the carregion and purification of the carregi

twentleth century seignes, must be excited to extract an almost infinitesimal
amount of radium from a considerable
must of material.

But if radium can cure that most maliganut disease, cancer and it has proved itself remarkably capable in this
terfect, all the world will watch the
sources of production with such interest
and care that failure will become an international ward in the changery court
of prediction.

A despatch from Chatham says:

Rank Morton, a young English
man, employed by Robert Stenton
on the town line of Harwich, was
fatally crushed in a gravel pit ownsources of prediction. For Better Things.

The evolution of ext industrial system is certain to work up to a square deal between expical and labor. If the universal intrinum wage was \$5 and the universal days work was eight hours, we would all say harrain. But these archivements work by conditions, and will certainly be reached if they holong to the trend of human happiness willth, of course, they will not if there are fewer five dollars to but and fewer clicht days work to do all of which depends upon, the world's absorption of labor's products after those changes take place.

If there is in the situation an unearned increment that will keep down the incidental high cost of living, we may hope for this happy change. But there is the first out, in flying like we have to throw out ballast, but if there is no balliost to throw out, then see an out do what we want to, but we can make conditions govern. We cannot do what we want to, but we can make conditions hetter and build upon the improvement. These conditions are largely political, social, economical and all hingo directiven the manhood of living.

Spain in America.

Spain in America.

Byain in America.

It is reported in Madrid that King Alfonso of Spain is to go to Argentina text June to make the acquintance of a country whither so many Spaniards have emigrated who remain profoundly attached to the motherland."

No Spainish Sovereign has yet righted stracted to the motherhand."

No Spanish sovereigh has yet visited that great empire that Spain discovered and conquered and held for over three centuries. The last remnant of which, in fact, she did and lose juntil 1895, but shove, and beyond her political possessions for the ruins of Spain's Indes has been built a commercial empire far more valuable as values are measured in these modern days and as regards both practical and sentimental advantages, Spain still-a name to conjure with its South shall central America. If Ferdinand's successor should sail over the seas to visit the ancient dominions that were once the envy of the world, modern Spain new guerdon in the New World and take in neaccful trade far more treasure than her galtions bore home of old across the Spanish Main.

Great Britain and Germany are fully that the surface of their operators; who

Logislafure Unfounded. despatch from Toronto says: Sir James Whitney is progressing very favorably towards recovery from his serious illness, sitting up frequently and receiving visits from members of his family. It is not being planned, however, to remove him from the hospital as yet. The auggestion that has been made regarding the possibility of Sir James attending the opening of the Logislature is quite without foundation, neither Sir James nor his physi- at San Francisco. A TERRIBLE EXPERIENCE. Kingston Man Travelled Four Miles On Hands and Knees.

approaching satisfaction, altogether

to the contrary I can certainly as-

sure you. When we present our

despatch from Kingston says Frank Collins, a young lumberjack, whose home is in this city, was brought to the Hotel Dieu on Thursday morning. He had both feet badly frozen, and it is feared that they may have to be amputated. He was working at Easter Camp, about one hundred miles north of North Bay, and set out to walk to another camp at Cache Bay, a distance of 30 miles. After

covering about 24 miles he was overcome with the cold, it being about 30 degrees below zoro, and had to drag himself as best he could four miles farther to reach the nearest farm. Part of the way he had to make on his, hands and knees, and he suffered terribly. He had a man drive him to Cache Bay, and here he started on his ourney home.

FOR SMOKING OPIUM.

The Death Renalty Has Been Proclaimed in China.

A despatch from Pekin, China, says: Proclamations announcing the death penalty for smoking o opium lave been promulgated, according to reports from various provinces. Although definite cases of executions for this breach of the quickly dug out, he lived but an law seldom come to special notice, it is reported from Wu Chang that a smoker among the soldiers of the garrison there was caught indulging in the habit and after "trial before a court made up of his comrades, he was sentenced to immediate execution and was shot to

SCHOOL TEACHERS

Also Have Things to Learn. "For many years I had used coffee and refused to be convinced of its bad effect upon the human syswrites a veteran school (Tea is just as harmful

because it contains caffeine, the same drug found in coffee). "Ten years ago I was obliged to give up my much-loved work in the public schools after years of continual labor! I had developed a well-defined case of chronic coffeepoisoning.

"The troubles were constipation, flutterings of the heart, a thumping in the top of my head and various parts of my body, twitching of my limbs, shaking of my head, and at times after exertion, a general 'gone" feeling, with a toper's desire for very strong coffee. I was a nervous wreck for years.

"A short time ago friends came to visit us and they brought a package of Postum with them, and urged me to try it. I was prejudiced because some years back I had drunk a cup of weak, tasteless stuff called Postum, which I did not like at all.

"This time, however, my friend made the Postum according to directions on the package, and it won me. Soon I found myself improving in a most decided fashion. "The odor of boiling coffee no longer tempts me. I am so greatly benefitted by Postum that if I continue to improve as I am now, I'll begin to think I have found the Fountain of Perpetual Youth. This is no fancy letter but stubborn facts which I am glad to make

Name given by Canadian Postum Co., Windsor, Ont. Write for a Postum now comes in two forms: Regular Postum - must be well

Instant Postum - is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and, "There's a Reason" for Postum.

Cold Storage Bill Ready for Presentation to Legislators. despatch from Ottawn says:

The bill respecting cold storage which, as recently intimated, the Government will bring down this session, is now in course of preparation, after having been, under consideration of Hon. Martin Burrell for some time. Generally speaking, the measure will provide for a stricter inspection and control of cold storage plants and for returns showing the exact quantities of provisions which from time to time they contain. The ideal is to protect the public against any corneting of markets to unduly enhance prices. The details of the bill are now under advisement. It will embody the results of an investigation made in the principal American cities by Dairy Commis sioner Ruddick regarding the cold storage system generally.
