Joe Hall Pleaded Guilty to Furious Driving.—Vaughan and McKenzie Will Be Tried in Owen Sound.

Kenneth Vaughan, John McKenie and Jos. Hall, of Glenelg, were peiore Magistrates Armstrong and Ennis on Monday evening on the charge of furious driving on the public highway, causing bodily in-jury to Miss Gertie Walker, daughter of Mr. and Mrs. George Walker, on the night of March 3rd, as reported in The Standard last week. The charge was laid under Sec. 285 of the Criminal Code, and is a serious offence, which, if parties were found guilty, were liable to a term of two years imprisonment. Mr. W. D. Henry, who was counsel for the complainant, Mr. Frank Dinsmore, cousin of Miss Walker, announced that if the young men would plead guilty the charge would be reduced to that of Sec. 7, Chap. 47, of the Provincial Statutes, and by paying a fine and the costs of the case no further action would be taken. Joe Hall agreed to this lenient proposal, pleaded guilty, and paid a fine of \$10.00 and costs, in all \$17.95. Vaughan, and McKenzie refused to accept this proposition, so the Magistrates committed them for trial, and the case will be tried before a County Judge or a jury in Owen Sound, the date having not yet been decided upon. In the meantime they gave their bond-for \$500 each, as also did the father of each of the young men, as a guarantee of their appearance at court. Messrs. W. H. Wright, of Owen Sound, and P. McCullough are counsel for the defendants. interest has been excited in the case, and the old council chamber was packed to the doors on Monday evening. Miss Walker is still n a serious condition as a result of the injuries she received.

Eclipse of the Moon.

Distinctly Visible Last Wednesday Night. - Much Superstition About this Phenomena.

Between nine and twelve o'clock on Wednesday evening last one of the marvels of nature occurred—an eclipse of the moon. The night was clear and bright, not a cloud was in the sky and therefore the phenomena was distinctly visible. The eclipse was not total, but just sufficient to cover nine-tenths of the surface. The moon entered the pe numbra, or outer shadow of the earth about nine o'clock and gradually the dark portion crept off lunar orb until about 11.30, when the moon that shone so brightly was, obscured. This was the time of the greatest shadow: then, the process reversed itself, and the shadow slowly vanished.

Much Superstition. Eclipses of the moon are greatly dreaded by superstitions people. Christopher Columbus, during one nights. of his voyages to the West Indies, person, however, can deposit a ful- tives into providing him with food and shelter. Knowing the time of an eclipse to be near he entered into a parley with the chief and threatened to remove the moon if he were not cared for. The natives scorned the idea at first but soon across the brightly lit moon and the natives hastened to supply his needs, praying and hegging of him moon to them.
