NEW ANESTHETIC FOUND. Urethane Said to Be Less Harmful

than Ether. Interesting experiments with new anesthetic have been conduct

ed at the Cambridge laboratory. The substance, which is called Urethane, is a combination of urea and alcohol. It is administered hypodermically, and drowsiness soon becomes a very deep unconsciousness, and insensibility to pain is only to publish the lists showing complete. There is perfect security when it is used in any operation. The advantage claimed for the new in, but to print details setting forth anesthetic is that heart failure never occurs when it is properly used, while a majority of the deaths from chloroform are due to heart failure. When the breathing stops, as ministration of an inhaled anesthealways that the heart is still beat-The assurance, therefore, that in cases of an overdose of this anesthetic the breathing would be affected before the heart will be of

Another advantage is that the choking sensation experienced with but relieves the stables and the sta-blemen of the dust and germs which usually accompany the currying of experimenters have not yet them horses. The groom has no need to blow and hiss as he works. It also saves more than half the time over the job.

WOOD BLOCKS BEST ROAD. Is Used In All English Cities—Also In Europe.

It has been stated that creosoted wood blocks would make the ideal pavement if the following faults could be eliminated: (1) The ten-That's Why Mrs. Wellington Dundency to expand, resulting in bulg-lop Says Dodd's Kidney Pills are ing, and sometimes upheaval of the pavement, discoloration of curbs, etc.; (2) slipperiness; (3) bleeding of oil. Of all the wood pavements that I saw in London, Paris, Berlin and other places, none exhibited any of in the Engineering News.

Creosoted wood is the most highly would get some better and then get the city, the total mileage of creopaved streets, and in most cases fares.

There is not much wood-block paving in Berlin, but a condition which seems rather remarkable exists in that on streets paved with where the grade becomes too steep and the asphalt will prove unduly slippery. Most of the approaches to bridges are paved with crossoted wood-block. This city has probably he finest sheet asphalt paving in the world. The wood paving

rough and comparatively noisy. Creosoted wood-block paving Paris is more noticeable for quantity than it is for quality. The report of the Chief Engineer of Bridges and Streets of Paris, at the London Road Congress, stated that the average life of the hardwood paying was six years.

## BABY'S OWN TABLETS

When a mother uses only medicine as long as there are little to be confusing, if not actually painones in the home it certainly bears ful.
