which once belonged to Harriet Mellon. Duchess of St. Albans.

Harriet Mellon, who was originally an actress, had a romantic career. Handsome and vivacious, she was one of the stage favorites of her time. She married. Thomas Coutts, an octogenarian banker, and when he died she inherited the whole of his fortune, and five years later married the ninth Duke of St. Albans.

She died in 1837, and during the long years since her silver has lain undisturbed in the bank vaults until it was renioved last week for the present sale. The wrappings had been entirely eaten away by insects, but the plate itself appears to be entirely new.

Most of the plate was made by Paul Storr, Philip Rundell or John Eriggs, three entirely silversmiths of the day.

Most of the plate was made by Paul Storr. Philip Rundell or John Briggs. Most of it was purchased by Thomas Courts.

One of the most striking pieces is a pair of silver centrepieces, which weigh 1.23% ounces. They are fitted with circular baskets chased with wreathed of ity and acanthus borders.

The stems are fashloned to represent foliage and round them are grouped facenandlan figures. This was one of the nitsterpleces of Paul Storr, and was made in 1816.

Monorail Train to Travel at 500 Miles.

While expects continue to discuss the practicability of M. Bachelet's aerially suspended rallway. J. Esson, a Birming-lam manufacturer, announces that he has invented a train which will travel 500 miles, an hour, 200 miles an hour faster than the Bachelet train.

This latest invention is of the monorail type, but has one of the Machelet features, inasmuch as it will fly after attaining a certain speed, it does not retain the propellers. The model is driven, by either the propellers. The model is driven, by either the strendty, by rods terminating in the propellers. The model is driven, by either the strendty, by rods terminating in the propellers, these rods serving to

give a demonstration soon with a working model.

The train is connected with the cable at either extremity by rods terminating about a ton:

In flamped wheels, these rods serving to convey current to motors fore and aft. The inventor declares that the train is so designed that when it has attained a sufficient velocity it will lift itself from the velocity buffer spring and fly. This, he claims, will mean a huge saying in maintenance charges.

they are the work of John Trussell, a
member of a family resident for centuries at Billesley, near Stratford-onAvon, and Mayor of Winchester, where

dom of God!-Wealth can give many advantages. To those who possess it in large measure it must be very easy to depend upon it entirely for what one needs and desires, and gradually to trust in riches rather than in God. A man of large wealth is likely to become exclusive in his associations, unsympathetic with his less fortunate brothers, and to "lose the continuous." The life of such a man would have little room for the qualities of humility, teachableness, and open-mindedness such as Jesus of large wealth is likely to become your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach headache, you can get blessed relief in five minutes.
