FLESHERTON

(Special to The Standard.) Mrs. (Dr.) Ottowill visited her son in the city last week.

T. A. Blakely is visiting her daughter in Toronto.

Rev. and Mrs. Dudgeon were at Rosemont over the weekend.

Mrs. Gleason has rented Mrs. W. J. White's residence on Alice st.

Mrs. J. H. Jamieson visited friends in the city over the weekend.

Miss Florence Thurston is attending a wedding at Mitchell this week.

Mr. C. J. Bellamy left on a motor holiday to Toronto and Muskoka.

Miss Gladys Kindree, of Blenheim, is visiting her sister, Mrs. H. S. White.

Quarterly Communion will be held in the Presbyterian Church next Sabbath.

Miss Ina Smith, of Markdale, visited her aunt, Mrs. W. J. Stewart, last week.

Sergeant Emerson Bellamy was home from Niagara Camp for a few days last week.

Mrs. H. Ellis, of Powassan, visited Mrs. J. H. Jamieson and other friends here last week.

Mr. and Mrs. D. Strachan visited the past few days with their old friends in Toronto.

Mrs. Hickling and Mrs. Blackburn paid their sisters in Toronto a short visit last week.

Miss Danude, who visited for a few weeks with relatives here, has returned to her home in Toronto.

Mr. Harold Mitchell is now located at Windsor, where he has been transferred by the Standard Bank.

Mr. Jos. Duncan has moved to his own residence on Collingwood street, vacated by Mr. M. E. Wright.

Messrs. Avery Hawken, F. Duncan and Everett Henry motored to the city and holidayed for a few days last week.

Mr. Herb McLeod is another young man from this village who has enlisted for the war, joining the unit at Toronto.

Mr. Herman Hyland, of Toronto, and Mr. Roy Burgess, of Ingersoll,

were visitors over the weekend at Mr. W. A. Armstrong's.

Mr. H. Carrington has taken the position of caretaker of the Presbyterian Church in the place of Fred Plewis, who is moving to a farm.

The High School opened for this term with a large attendance and the principal and his two assistants have the classes now in full swing.

Mr. W. A. Armstrong has purchased a handsome new Overland car, delivered last week. Miss Laura already handles the wheel skillfully.

Rev. G. S. Milligan, formerly of this place, has been released by the Presbyterian Church from his charge near Sarnia, where he has labored the past two years.

Rev. P. K. Dayfoot, of Toronto, supplied the Baptist pulpit on Sunday, speaking in behalf of the Sunday Schools, and their work. The Methodist pulpit was occupied by Mr. R. J. Woods, of Corbetton.

A very pleasant time was spent at the home of Mrs. Oscar Phillips on Thursday evening last, when Miss Edna Patton, bride-to-be, was given a miscellaneous shower by her young lady friends in town.

Mrs. B. Passmore, sister to Mrs. W. J. Bellamy, accompanied by her son, Mr. Fred Passmore, wife and little son, motored from their home at Emsdale and spent a few days last week with Mr. and Mrs. Bellamy.

That motoring is not all unalloyed pleasure was experienced by four young men, who took a motor run to Port Elgin on Sunday. Getting hung up at Owen Sound, they had to leave their stalled engine for repairs and return home by morning train.

Rev. J. N. Laughland, who had a short pastorate in the Baptist Church here, and later was stationed at Massie, has graduated from a Theological College in the United States and received a call to an important church in London, England. Mr. Laughland, wife and two children expect to sail from New York on the 25th of this month.

The Misses Beatrice Thistlewaite, Addie Wright, Dell Thurston and Annie McMillan, students of the High School, who taught last summer, have gone to Toronto to attend Normal, together with the following, who passed this year: Stella Orr, Kate McMillan, Lillian McPhail, Ruth Spencer and Harry Field. Murray, Legate has gone to Stratford.

OWEN SOUND

Miss Mudge Walker returned from a vacation trip to Proton, Markdale and Hamilton.

Three Months. William Robb, brought back from Midland for selling liquor some time ago, got three hundred dollars or three months in gaol. He took the time up in Governor Miller's popular hostelry.—Times.

Wyandotte Was In. The automatic unloader, Wyandotte came in Saturday forenoon with fifteen hundred tons of slack coal on board, one thousand of it for the Union Cement Company and five hundred of it for the Davis-Smith-Malone Company. The steamer rapidly unloaded during the course of the day and cleared before nightfall.—Times.

Cement Works May Re-open. The Union Cement Works, which have been shut down for the past few weeks, may re-open later in the season. It was necessary to close down on account of the large stock of cement on hand and light sales. Recently large shipments have been sent out and the management is in hopes that the fall business will warrant the works being started again for a couple of months.—Sun.

Rutherford-Maitland. On Wednesday morning, September 5th, 1915, a quiet wedding took place at the home of the bride's parents, Fifteenth St. East when the marriage of Miss Audrey Maitland, only daughter of Mr. and Mrs. A. C. Maitland, to Mr. Fred. H. Rutherford, Clerk of the County of Grey and secretary-treasurer of the Board of Education, took place. Owing to the recent death of the groom's father, and the present illness of his mother, the wedding was very quiet, only the immediate relatives of the bride being present.—Sun.

Aeroplane Trial Successful. Mr. Robt. McDowall's new aeroplane engine was given its first tryout this morning in the yard at the rear of Ferguson's carriage works. The engine worked splendidly, with the exception of some slight trouble with the oil pump, which was quickly adjusted. The trial showed the propeller to be making 1120 revolutions per minute, which is sufficient to fly with, but which is not quite what the engine should make. With a little turning up it will make the twelve or thirteen hundred revolutions. Mr. McDowall's first flight will take place in the near future but no definite time has been settled upon.—Sun.

Tug Pedwell Burned. Friday afternoon, August 27 the tug Pedwell was burned to the water's edge at Warton and all the salvage that will be left will be the boiler and possibly the engine. The tug had just brought in a scow load of posts etc., and the men were unloading the scow, when the fire broke out in the tug. The tie rope soon burnt and the tug got away from the dock but only a short distance. The bridge got to the spot pretty quickly, even got on the tug, but the flammable condition of the tug made it impossible to save it. The boat was built about five years ago and the owner, valued her at \$12,000. It is understood that it was covered by insurance to the extent of \$8,000.—Advertiser.

Trial at Eugenia. This morning Mayor McQuaker, Superintendent Melinden of the Electric Light Works, Mr. R. D. Little, chairman of the finance committee, Messrs. J. Parker and John Legate of the public utilities commission, were in a party which went to Eugenia Falls to witness the first tests of the turbines of the Hydro-Electric generating station there, which is to supply Owen Sound with power. Tests of the dams and of the long tume leading to the power house have been made and were successful. If the turbines and other machinery run smoothly it will only remain to complete the sub station here and to wire the breaks in the line to the Falls and all will be ready for Hydro power in Owen Sound.—Times.

Hydro-Radial Progress. That the Hydro-Electric Commission is quietly and thoroughly going ahead with its hydro-radial railway, and gathering statistics and information through out Western Ontario, was the substance of an address by Mr. F. G. Gaby, chief engineer of the Ontario Municipal Association, at the convention in Toronto. He spoke of the necessity for radial railways in Ontario, and said data was being secured and surveying done on proposed lines of over 1600 miles in length between Toronto, Guelph, Berlin, Stratford and Owen Sound, also other short lines. "The estimates being com-

plied by the Commission include equipment of the highest standard, and would make the completed lines comparable in service and equipment with interurban services given in various parts of the United States." When asked as to expected revenue, Mr. Gaby stated that \$4,000 per mile per annum was a conservative figure, which might be increased to \$5,000.—Advertiser.

Will Recruit 250 Men. Lieut.-Colonel W. N. Chisholm has received permission from Divisional Headquarters to recruit a company of 250 men and five officers from the 31st Regiment for overseas service.

This company which is the largest yet permitted to raise will re-inforce one of the battalions already organized, and will replace a draft of similar proportions which has already gone overseas from that battalion.

The battalion to which the company from the 31st Regiment will go has not yet been specified.

Steps are now being taken to commence a recruiting campaign, to enroll men who are willing to enlist in a Grey County company to be commanded by officers from the 31st Regiment and also when they will be available for operations. It is expected that a lot of men who have not quite made up their minds to volunteer for active service, not knowing whom they would have as comrades, would be willing to go with a company of men whom they know. While recruiting has been rather slow lately, owing to harvest operations, it is anticipated that plenty of men will be available from now on and that little difficulty will be experienced in securing the required number.—Sun.

The Rhythm of Flavors (By Peter McArthur)

A couple of years ago a Japanese scientist-artist-musician-perfumer gave New Yorkers an entertainment that was perhaps unique in the world's history, and yet he might have made it more wonderful than it was. Owing to the versatility of his genius he knew that there are rhythms of form and color as well as of sound, and he perfected a mechanism by which he was able to throw colors and lights in certain forms on a screen to the accompaniment of music. At the same time he released jets of odor in the same rhythmic way. His purpose was to cater delicately to as many senses as possible. But why did he stop with the senses of form, color and sound and perfume? Why didn't he spread a banquet and cater rhythmically to the sense of taste? Our fruit, for instance, from the earliest stages to the latest peach give a range of flavors that a master artist might arrange into a symphony. The sense of taste can be catered to just as delicately and effectively as any other, and the housewife with a few drops of these fruits has a flavor indescribably individual.

By the way, is it possible to describe a flavor in a way that will convey to the person who has not tasted it what it is like? Of course we can give an idea of things like sweet, sour, salt, or insipid but the penetrating, aromatic flavors—how are they to be described? I know of only two attempts at describing them that were at all successful. One was the attempt by David Hume's sister to describe champagne. She said it was like drinking cider and smelling horseradish at the same time. The other was the answer made by a small boy when asked what vichy tasted like. He said, "It tastes like your foot's asleep." If I could have a heart-to-heart talk with that Japanese scientist-artist-musician-perfumer I would try to get him to prepare something for the annual banquet of the Canadian Fruit Growers and have him add flavors to his entertainment. But perhaps the Fruit Growers would object. They might agree with the average housewife that the flavors of our Canadian fruits are sufficient in themselves, and aroma also, and it is quite sufficient to set them to the music of tinkling glasses and silver spoons. This season when the fruits are so plentiful and so good every fruit cultivator in the Dominion should be a symphony of the divine flavors perfected by the sun in the great alembic of a Canadian summer.

SOME GOOD ADVICE

If you have dandruff, get rid of it by killing the germs.

If your hair is falling out, stop it! There is one, sure cure that will remedy these misfortunes and aid you to remain young.

PARISIAN SAGE, the great hair restorer, is a guarantee that permanently remove dandruff in two weeks, or we will give you your money back.

PARISIAN SAGE stops falling hair, it prevents the hair from fading, without being added to. It is the best beautifier for ladies' hair, soft and beautiful, lifeless hair.

PARISIAN SAGE is rigidly guaranteed. 50 cents a large bottle. W. TURNER & CO., Markdale.

CAN FLY WITHOUT BRAINS

Dr. Balance Purely Mechanical, Scientist Demonstrates

One of the most striking features of the meeting at Dresden of the German Scientific Society for Aeronautics and Aviation was a lecture by Prof. Conheim on balance in the air.

Prof. Conheim drew a bold parallel between birds and aeroplanes. He gave a demonstration with living doves and seagulls, from which the cerebellum magnum had been extracted, and showed that balance with these birds was purely mechanical. Having been deprived of their brain, the birds could exert no will power and maintained their balance simply by reflex movements of the head, tail and wings. Prof. Conheim argued from this analogy that it might be possible in time to invent automatic machinery which would keep an aeroplane stable without requiring any attention from the airman.

Helping Wizard Edison

That Thomas A. Edison is working on an invention that will permit the blind to read ordinary newspapers by the sense of touch is the announcement that comes from the home of the wizard of electricity, Helen Keller, the wonderful blind and deaf girl is assisting in experiments.

Leaders in Scientific Theory. According to a writer in Engineering Magazine mention can be made of but a few names among the many which hold an honorable place in the history of scientific system-making.

A man of the very highest genius was Laplace, who enunciated the nebular hypothesis. In geology, Hutton first arranged scattered facts into a coherent account of the geological process by which rocks are worn down and built up. Turning to the biological sciences, we find the systematizers whose work is closely linked together.

The first of these was Linnaeus, who classified living forms on the basis of the conception of a simple scale of ascending complexity. Lamarck arranged the classification by giving chief weight to differences of organic structure. Cuvier showed that organisms must be conceived as diverging from certain primitive types, as the branches of a tree spread out from the trunk. Darwin overthrew an hypothesis of Lamarck that acquired characteristics are inherited, and showed that evolution proceeds by means of spontaneous variation, and a life struggle in which the unfit are eliminated. And, finally, Herbert Spencer applied the theory of evolution to the institutions of society.

Deserted Town of Blackmalters. Only seven people now live at Dyea which in the days of the Klondike had a population of 20,000. Of the seven it is said only two are whites. The townsite has been filed on as farmland by three homesteaders, one of whom is an Indian woman and another a young man who is found on a fox ranch. Dyea, whose post office was established in 1896, became a next year the most crowded, lawless settlement in the world. The residents took toll from the men going in to seek gold and those coming out with pouches of the precious stuff. After completion of the White Pass and Yukon Railway, with Skagway as its sea terminus, Dyea collapsed and was abandoned.

Annual Stock Sale. Daily Papers.

On the 17th of May, 1915, there was held in the Markdale a sale of pure bred beef breeds of cattle. These animals were contributed to the breeders of Grey's sale was not the success that would have been desired but it was for sales bigger.

The breeder had their annual meeting on July 3rd and decided to have their sale in the hands of the Markdale. This is just two days earlier than the last sale and should attract many of the Western buyers.

East and West what they want at the Grey's sale. This means that our breeders will have to make it a point to get their animals in first-class shape if they are to command the highest prices for the Western trade.

All entries for the sale must be in the hands of the Secretary, Thos. H. Binney, of Markdale, Ont. R. R. No. 2, not later than January 1st, 1916, so that the animals can be inspected, weighed and weighed away from the sale.

We have good reason to believe that they will be very successful in this sale. The 1915 sale one which will beat in the years to come.
