Huron County is the latest to make a generous advance in its original appropriation for the National Patriotic Fund. The County Council has increased the monthly grant from \$1,000 to \$6,000, and is bringing the 33rd Battalion into the County at its own expense to stimulate local recruiting.

Don't forget that the St. Vincent Agricultural Society proposes to have a larger and more successful show on Oct. 1st, 1915, than ever held in Meaford before. Much sympathy is extended to Mr. and Mrs. Dymond, this being the second bereavement in a short time, the infant brother, Heber Nesbit, having died a few weeks ago. The remains were laid to rest in St. James' cemetery, Toronto, by the side of his little brother. —Wing-lam Advance.

Standard readers are reminded not to forget the Rocklyn Fair, Oct. 5th, an annual event people look for. This is one of the best local fairs, and this year promises to keep pace with previous records. Exhibitors will do well to come early and have the exhibits placed in a good time. A good staff of expert judges has been secured. Send in your entries early, don't leave this important part until too late. The McCracken Minstrels have been secured for the Concert in the evening; this will be one of the best concerts ever put up in Rocklyn. Don't fail to be there.—J. W. Patton secretary.

Fine Yield of Corn.

Of the wonderful crops which have been produced in Grey Co. this summer, probably corn shows the most surprising growth. On Wednesday, Mr. Reeker, assistant at the Government Agricultural Department, made his inspection of corn field crops in Derby. At the farm of Mr. A. S. Donald, Kilsyth, he found a most remarkable yield. The test showed that the corn weighed 27 tons and 1800 lbs. to the acre. Mr. Donald has 25 acres of corn, and one of the two fields of corn average fully 19 feet in height.

Markdale Council.

At a meeting of the Council held September 21st, all members present, the tax rate was struck, viz. thirty mills on the dollar. Is this not somewhat disappointing, as it was rumored that 35 mills would be the rate if Hydro carried.

A resolution was passed giving effect to the following decision regarding the taxes for 1915: All taxes paid to the Treasurer prior to the 15th November will be subject to a discount of two per cent. Those paid between that date and December 15th will be at par, and all not paid by the 15th December will be subject to an additional five per cent.

Musketry Training at Niagara-on-the-Lake.

(The Globe, Sept. 20.)

Niagara-on-the-Lake, Sept. 19.—The battalions now in training here are receiving musketry instruction, 500 men at a time. The course takes from six to eight days, depending on the weather, and through their ranks to-day, Lieut.-Col. Beckett's Battalion, the 75th, will begin training next week.

Major G. F. McFarland, senior musketry officer in the division, three stages. Lectures on the rifle are given first, or rather the recruit is given a rifle to play with and ask questions. At an earlier stage of the course soldiers with previous military experience were numerous, but most all who now come forward have never handled a rifle before. When the men have learned to handle a rifle they graduate to gallery practice at 25 yards. Finally they go to the range, and shooting at distances from 100 to 700 yards. A platoon was sent to the head and shoulders of an enemy, and exposed to fire, when a (dodge) representation visited the range this morning.

Subjects of instruction in the subjects dealt with in the course of instruction are the rate of fire, discipline, fire control, aiming. Rapidity of rifle fire has always been a strong point with the Imperial forces, and it will be remembered that early in the war the British army's excellence in this respect led the Germans to believe the British had more magazine guns in use than was really the case. Rapidity in loading with the charger, which carries five shells, is a phase of the instruction here. Some of the men have become very proficient in this," said Major McFarland.

Officers note little difference in the abilities of the various battalions, except that they note the marvelous record in musketry of the 35th Battalion, a composite company of which was organized at Toronto Exhibition.

A musketry school will be opened at the Exhibition grounds in Toronto when the school at Rockledge, where officers get course, in three weeks, is closed for the season. That will depend on the weather.
