

Young Folks

PALE, FEEBLE GIRLS

Weakness Generally Comes on as Womanhood Approaches.

Now is the time of year when the fashionable maiden makes her plans for the winter campaign. How successful this planning is depends in a great measure upon the careful planning of her wardrobe, for whatever they dress to please men, they have an innate love for beautiful things—and who of us hasn't seen the not impossible "he" whose smile makes the costume.

A fastidious woman wouldn't have much trouble in selecting an evening gown, it is elaborately trimmed—tasseled, ruff, furs of every imaginable description, even lace made of metallic threads are seen in the shops. Evening gowns at any figure are possible, the bands of Russian satin with little white fox-trimmed panne.

Russian blues and colorings are noticeable on the fashion docks. The usual shade of blue which made appearance last season is again popular in pannet, plush and velvet, velveteen, with white fox, is another most effective combination, and is very good effect this season.

Fabrics of all descriptions, fur-lined and cloth-trimmed, are made. Doucet showed redingotes in velvet with high fur collars and on or Georgette crepe skirts in rich colors, but it is Paquin who takes up the fashion created by him, or Lady Duff Gordon, as she is known, and presented it anew many of the cloth frocks designed his house.

It was a bright, windy day in October. The fashions were "very muddy," fat and thin and dry on her perch, fat and thin a spatter on two. "Hullo!" said Dick, "I'm glad we're back from school!" She has no business to be anywhere!

Dick had fed the little hands drop, and then, but he said nothing, she began to do that, he thought, I can grab her if she stays up anyhow!"

THE "WASTERS."

Many Directions in Which the British Could Save.

Only when the items of our expenditure are examined in detail can we fully realize in how many directions we could save and assist the nation to find the £3,000,000 a day necessary to carry on the war against Germany, says London Answers.

Gentlemen used to figures give us the appalling information that the average spent by each household in the country on strong drink per week is £6. 6d. If this sum were reduced to £5. 9d., we should save £80,000,000.

Ten years ago we drank 10 oz. of Dr. Williams' Pink Pills have saved thousands of young girls from what might have been life-long invalidism or an early death. They are a blood-builder and a tonic, equal in richness, strengthening weak nerves and producing a liberal supply of red, healthy blood which every girl needs to sustain her strength. Dr. Williams' Pink Pills have proved their great value over and over again to young women whose health was failing. Miss Minnie Dufield, Eramosa, Ont., says: "It gives me great pleasure to tell you what Dr. Williams' Pink Pills have done for me. When I was approaching the age of womanhood I suffered greatly from bloodlessness, or anaemia. My work was a drag to me, I had no appetite and never felt rested in the mornings. I could scarcely walk for five minutes at a time without taking a rest. I was troubled with severe headaches, and things looked gloomy indeed. I doc-tored myself for a long time and got but little, if any, benefit. I was advised to try Dr. Williams' Pink Pills, and did so, and after taking them for a time, felt better. I continued taking the Pills until I had used six boxes, when I felt like a new person, and was again enjoying splendid health. I would strongly advise any girl who is weak or run down to try Dr. Williams' Pink Pills."

You can get these pills from any dealer in medicines or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

WHERE DOES GOLD GO?

Many a Treasure of Ancient Days Has Vanished Completely.

What becomes of gold? queries The Chicago Journal. It is one of the oldest metals in human use—there are gold beads dating back to the stone age. It is an object of almost universal desire. It's proof against almost all the influences which destroy other metals, and it has been mined in enormous quantities, yet to-day more than two-thirds of the gold in use has been dug since 1849.

What becomes of the rest? Where is the gold that set Jason wandering into the Black Sea, that filled the treasures of Croesus, that paid the terrific tribute which Persian kings assessed against the Punjab? What

has happened to the yellow dust and "electrum"—an alloy of gold and silver—which negro traders brought for years what British statesmen are urging their people to do—he steals his savings over to the Government to be used for the nation's purposes, he receives interest. The thrifty Dane buys shares in co-operative producing agencies of one kind or another, furnishing thus the capital that has made of his country one of the marvels of the modern intensive farming. And so with many others. Nevertheless, the deposits in the savings banks are some index of the progress the people are making in thrift.

The most enduring of metals, and yet the most evanescent; perpetually sought, and yet constantly escaping the hands of even the successful seeker—that is gold. What is the reason for its curious elusiveness?

CORNS CURED QUICK

Applied In 5 Seconds

Sore, blistering feet from corn-parched toes can be cured by Putnam's Extract in 24 hours.

"Putnam's" soothes away that drawing pain, eases instant-

ly, makes the feet feel good at once.

Get a 25c. bottle of "Putnam's" to-day.

HOW SHELLS DISABLE MEN.

Changes in Atmospheric Pressure by Explosions Are Odd.

HEALTHY CHILDREN

Not hysteria, but the most profound nervous demoralization may result merely from the blasts of wind produced by shell explosions, according to the London Lancet, which gives some of the observations of Paul Raoult, as related by him to the Academie de Medicine de Paris.

M. Raoult observed a case in No-

vember, 1914, where, after a shell ex-

plosion, a man was carried to the am-

bulance station suffering from para-

esthesia, which is a paralysis of the

lower half of the body. In March,

1915, the explosion of a bomb a trifle

over a yard away left a man paral-

ysed on his left side and unable to

walk. In both these cases all feeling had

been destroyed in the paralyzed parts

and there was nowhere any external

wound. The second case got well in

twelve days, except for some stiffness

in the left leg.

In another instance an explosion

made one victim almost comatose.

Violent headaches and deafness in the

left ear were observed.

Be not thou one of them that

strike hands, or of them that are

sureties for debts.

The rich rule over the poor, and

the borrower is servant unto the

lender.

The sluggish will not plow by

reason of the cold; therefore shall he

not even turn his head.

With a soft little tap on the eyes, suddenly

she opened them. This was the bright world, not as usual, half-way between Dick and Ginger.

She gave a half-frightened look as she looked at him. "They don't even look at me," she said. "They don't care a

bit about me, and I'm not even worth a cent."

He who could find the little hands drop, and then, but he said nothing, she began to do that, he thought, I can grab her if she stays up anyhow!"

It was a bright, windy day in October. The fashions were "very muddy," fat and thin and dry on her perch, fat and thin a spatter on two. "Hullo!" said Dick, "I'm glad we're back from school!" She has no business to be anywhere!
