LAND'S SHORES.

Happenings in the Emerald Isle of
Interest to Irishmen.

At Seddun, Harbour Parish Church
of the Earl of Darnham, K.C., has un-
veiled a memorial to the late Marquis
of Londonderry.

The rebels were so
badly beaten that those which were captured
were put to death with great effect.

When the two regiments arrived people
were welcomed with cigars, cakes, sandwiches
and all kinds of drinks.

In Right Hon. James H. M. Camp-
bell, K.C., has been sworn in as
Attorney-General for Ireland and has
appointed Mr. John Erskine, B.L., on
as legal adviser.

Captain Jack Evans of the Royal
Engineers, native of Belfast, has
received the D.C.M. in recogni-
tion of conspicuous gallantry during a
recent engagement.

High Tribunal imposed
of officers each on 43 carpenters
engaged with having taken part
in a strike while engaged on munition
work.

Germans May Have Nothing to Wear Next Winter.

The economic aspects of the world
war were little understood in 1914, es-
pecially on this side of the Atlantic.

Indeed, many people made inquiry
as to why financial publications should
devote so much space to the war.

Now that Germany in her economic
isolation is calling loudly for peace,
the interwoven relations of modern
finance and commerce become steadily
more apparent, especially with
rubber in Germany \$3.00 per lb. and
copper there 80c. bid, says the Wall
Street Journal.

To the question what Germany
lacks, the answers have been various.
Some have said she could not fight
without copper. Others have declared
rubber a war necessity. All sorts
of particularizations have been made
as to Germany's lack in food, milk,
frying fats, beef, etc.

If German babies have suffered for milk it is because
the Germans have slaughtered
their own cattle for the trench
defenders. If there has been lack of
fat for the frying pan, it is because
the army has used the fats for glycerine
in explosives manufacture.

Through the request of Mrs. Mili-
gan Fox, daughter of the late Mr. Se-
ward Miligan, the library of Queen's
University, in fact, will acquire the
Royal MSS. and other relics of Ed-
ward Hunting.

The local police are endeavoring to
find the perpetrator of an outrage
at the Brookwood and Newry Train
Company's line, where recently
it was incidentally torn up be-
tween Newry and Craigmore and laid
across the rails.

Deep regret has been occasioned in
Colombia by the death of Mr. Archi-
tectural at the age of 100. For
years he had acted as land steward
of the Lucan estate and
had conspicuously served under three
British vicars.

Following meeting of the West
Weston County council, at which Sir
Walter Nussey, Bart., M.P., and Mr.
E. Raynor were present, a big
meeting was held in Mullingar,
and it was unanimously offered
to assist the civil and military
authorities.

Local bands of guardians have
decided to submit to the Margrave for
help for the workhouse in
the three months to come.

FOREST PROTECTION.

How Enormous Areas of Timber May
Be Saved From Destruction.

Twenty-two of the leading Boards
of Trade of Ontario have made repre-
sentations to the Ontario Government
for a reorganization of its forest pro-
tection system.

The Boards have specified two re-
forms: the reorganization of the
rangers so as to provide for super-
vision and inspection, both in the head
office and the field; secondly, that the
government should make some effort
to keep down the timber damage re-
sulting from settlers' clearing fires.

For the latter purpose, it has been
suggested that a system of "permits"
issued by fire rangers to settlers in-
tent on burning slash in the neighbor-
hood of forests should be tried out
in a few localities, so as to determine
the best procedure. The permit system
has been successfully operated in Que-
bec and British Columbia for several
years. It has not antagonized the
settler, while saving enormous areas
of timber.

The widespread demand for a gen-
eral reconstruction of Ontario's forest
protection plan is finding sympathetic
consideration by the Minister of Lands
and Forests, who during the past year
has been exceedingly busy with other
special duties. The present forest
guarding system of the province has
been retained for a great many years
practically without alteration. It is
complained that the rangers, while
numerically sufficient, are left to
their own devices and, as with a body
of artisans in a factory, cannot and
do not perform their fair duty in the
absence of strict discipline and a guar-
antee of permanent employment. For-
est ranging, according to modern prac-
tice, requires skilled men and skilled
oversights, or the expenditure of public
money is considerably wasted. The
proposals of such bodies as the Com-
mission of Conservation, the Canadian
Forestry Association and their sup-
porters, is that the forest guarding
system of Ontario be placed under a
special qualified officer of the depart-
ment, who will have authority to re-
build the present service.

For highest accomplishment
one must have the
best values in food—food
which builds well-balanced
bodies and brains.

Grape-Nuts

FOOD

has that kind of value. It
contains all the nutriment
of whole wheat and barley,
including the important
mineral elements so often
lacking in the usual dietary.

And when you skirmish
around you'll find that this
power—which is just power
of mind and body—depends
to a remarkable degree on
the food one eats.

For highest accomplishment
one must have the
best values in food—food
which builds well-balanced
bodies and brains.

Grape-Nuts comes ready

eral of India.

farmer to pile his slash in the middle
of his clearing, not against standing
timber, and not to select a dry or
windy day for applying the torch.
With these simple instructions follow-
ed, he issues a permit for a number
of days. The service to the settler is
decidedly of value for perilous fires
are obviated and the timber assets of
the district are kept alive. Ontario
now has no means of preventing
wholesale destruction of precious pine
and spruce and hardwoods from set-
tlers' fires and the losses to the prov-
ince annually are great.

Timber destruction in all parts of
Canada is going on at a rate which,
if unchecked, must lead over 5,000
wood-using industries into serious dif-
ficulties. Ontario alone has 2,000
wood-using industries and 82 per cent
of their wood requirements are obtained
within the province. These indus-
tries, distributed in nearly every town
and city, are no more secure than
the living trees, which are intended to
uphold Ontario's industries and pay
taxes should be insured by govern-
ment against the plague of fire as
that buildings and plant should be in-
jured.

When it is considered that the limit
holders mutual associations in Quebec
Province have built up efficient sys-
tems of forest protection at a cost of
about one-third of a cent per acre
for fire protection, an efficient system
in Ontario would involve little, if any,
additional cost. A third of a cent in
fire protection makes a very minute
contribution beside a magnificent pine
forest reduced to charcoal for lack of
decent care. It has been estimated
that forest fires in Canada, mostly
preventable, destroy more wealth than
would pay the annual interest on the
list Dominion loan of 100 million dollars.

A RIVER OF HORROR.

No White Man Exploring its Riches,
Ever Has Returned.

There is a river of mystery and
horror in Peru, and the legends of
rich rubber regions and untold wealth
in gold are accompanied by tales of
those who went up it never to return.

Casimer Watkins, a naturalist, re-
cently returned from South Amer-
ica, tells of the stream.

"This river," he said, "is the Col-
ombia River, the richest river in Peru.
Great groves of rubber trees lie along
its course, and gold has been found
in it. But the Micos, a tribe of
cannibals, infest it. They still practice
cannibalism and will kill a man
on sight. Expeditions have been fit-
ted out to explore the stream, but
have been heavily armed and
equipped, and yet have not succeeded.

"I advise anyone suffering from
kidney disease to use Dodd's Kidney
Pills. Anyone who wants to know more
about my cure has only to write to
me and I will tell them all about it."

Dodd's Kidney Pills are no exper-
iment.

They have been curing kidney
disease in all parts of Canada for a
quarter of a century. Ask your
neighbors about them.

A PATHETIC INCIDENT.

Not long ago, a gentleman who had
been living fairly well, suddenly died.
As was natural, one of the first things
after his death was the straightening
up of his estate, and when matters
were looked over and an inventory
taken of what he was supposed to be
possessed of, it was found that it was
not quite as he had stated.

He had, however, a sum of \$10,000
which he had carried about with him
in his pocket, and this was the cause
of his death.

It was heartrending to see them
endeavoring to retain some articles of
furniture most dear to them. It looked
as though the house which they
had been accustomed to live in would
have to go, but in packing up and
imagine what was their relief when
they came across a policy for \$5,000.00
which the late husband had been
carrying unknown to his family in the
Crown Life Insurance Company of
Toronto.

Notice of the death was sent to the
company and a cheque was promptly
issued.

The mortgage was paid off, the fur-
iture was sold and there was a consider-
able amount left over for present
needs.
