Fruit Prospects.

Ottawa, June 23, 1916. The July Fruit Crop Report which is now being distributed by the Fruit Branch of the Department of Agriculture contains the following information regarding the condition of fruits in all parts of Canada:

**APPLES:** In Western Ontario, there will be a light apple crop, and much of the fruit will be of a poor quality. East of Toronto Shires are light, but on the whole indications point to a crop nearly medium. Dutchess and Wealthy Ontario, Farnese and McIntosh orchards have been sprayed. The total crop in British Columbia is estimated as slightly larger than last year. Nova Scotia reports two-thirds of an average crop or slightly over one million barrels.

**PEACHES:** There has been considerable damage from "leaf curl" in Niagara. The crop is estimated at 75 per cent. of last year. British Columbia reports a crop about equal to last year.

**PEARS:** In Niagara Bartlett's are a good crop, Anjou and Kieffer fair and Dutchess very light. Prospects are generally favourable in British Columbia.

**PLUMS:** There will be a light crop in Ontario. There are practically no Japanese plums, except Burbank. European varieties will average a half crop. In Quebec there will be about as many plums as last year. European varieties have set particularly heavy.

**CHERRIES:** In Niagara district sweet varieties will be about 30 per cent. of 1915 and sour varieties 20 per cent. of British Columbia reports sweet varieties light and sour varieties a fair crop.

**STRAWBERRIES:** Late varieties will be a good crop in Ontario. Warm weather is badly needed. New Brunswick will also have a large crop of good quality. A similar report comes from Quebec. In British Columbia there will be a decided increase over last year's crop.

Hot Weather Rules.

ests unite, therefore, with patriotic duty in stimulating the agriculturists of Canada to extraordinary productive efforts during the forthcoming season." As an appendix, a description is given of marketing operations in Australia. The article deserves and should attract wide attention. The WAR BOOK can be had by addressing the Publications Branch, Department of Agriculture Ottawa.

1. Load lightly, and drive slow.
2. Stop in the shade, if possible.
3. Water your horse as often as possible. So long as a horse is working, water in small quantities will not hurt him. But let him drink only a few swallows if he is going to stand still. Do not fail to water him at night after he has eaten his hay.
4. When he comes in after work, sponge off the harness marks and sweat, his eyes his nose and mouth and the dock. Wash his feet but not his legs.
5. If the thermometer is 75 degrees or higher, wipe him all over with a damp sponge, using gal water if possible. Do not wash the horse at night.
6. Saturday night, give a bran mash, lukewarm and add a spoonful of sulphate.
7. Do not use a horse-hat, unless it is a canopy-top hat. The ordinary bell-shaped hat does more harm than good.
8. A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing.
9. If the horse is overcome by heat, get him into the shade, remove harness and bridle, wash out his mouth, sponge him over, shower his legs, and give him two quarts of tonic spirit of ammonia, or two ounces of sweet spirits of nitre, in a pint of water; or give him a quart of coffee warm. Cool his head at once, using cold water, or, if necessary, chopped ice, wrapped in a cloth.
10. If the horse is off his feed, try him with two quarts of oats mixed with bran, and a little water; and add a little salt or sugar. Or give him oatmeal gruel or barley water to drink.
11. Watch your horse. If he stops sweating suddenly, or if he breathes short and quick, or if his ears droop, or if he stands with his legs spread sideways, he is in danger of a heat or sun stroke and needs attention at once.
12. If it is so hot that the horse sweats in the stable at night, tie him outside, with bedding under him. Unless he cools off during the night, he cannot well stand the next day's heat.

These rules are prepared by the Boston Work-Horse Relief Association, whose office is at 15 Beacon Street, Boston, Mass. We also publish Stable Rules, Drivers Rules and Feed-Feeding Rules. Copies of any of these Rules will be sent free on application. Our office is open throughout the year. Henry C. Merwin, President, Lewis A. Armistead, Secretary.

Canada's Great Lakes

(1) Port Arthur, Ont. (2) Huge Grain Elevator at Head of Great Lakes. (3) The Soo Locks. (4) M.S. Keewatin. (5) Entrance to Harbor, Fort William.

THE late afternoon sunshine beams with memories as you slip out of Port McNicol, which would Marquette say to this so-wonderful keewatin with her broad decks, her comfortable berths, her unexcited cuisine that tempts the gulls to dip into after mile in head water.

Sit on deck in the long throbbing twilight. You are in the north tier and you can read at nine o'clock at night. You can watch the past slip by in its canoe, dodging behind the dark islands of Georgian Bay. You can smell miles of water in the breeze and miles of northern and beyond again. You can listen to the strange cries of the wheeling birds, the tingling liquid lap of the waves against the boat side, the soft audible converse of Canadian fish, which is great with Canadian future, which is unbelievable.

When you go on deck in the morning the sun is there before you and the rolling wind, tamed to a breeze by the still-green banks of the St. Mary's River gay with cottages. Soon you'll reach the Soo and the far-famed canal that Canada and the States have made.

What's that against the skyline, like black-barrowed skeleton hand playing "Simon says Thumbs Up"? That's the Canadian Pacific Railway's Cascade Bridge, which splits accommodating in the middle, using its wonderful thousand-ton side-weights, and opens itself like scissor blades, a hundred and sixty-eight feet in the air! Truly a strange town, the Soo, where boats walk upstairs in canal-lifts and bridges go jacking against the horizon.

See that weird boat yonder, like a hane, and appetized, or become in the air—dinner is a joyful procession

Wheat and the War.

One of the most comprehensive articles in The Agricultural War Book of 1916 deals with the subject of "Wheat and the War." It is written by Mr. T. K. Doherty, LL.B., Commissioner of the International Agricultural Institute. The author traces the course of events, as regards the wheat market, in the momentous years of 1913, 1914, and 1915, the first named, sharing with the last two years some of their importance, although preceding the war—by reason of the decline of prices from those of 1912. In 1914-15 prices per bushel of British wheat jumped from \$1.05 to \$1.61. In this connection Mr. Doherty asks readers to examine a table giving quotations of prices since the year 1800. In 1812 the figures reached their zenith, Britain having wars with France and the United States on her hands. Wheat was then \$3.36 a bushel, or more than three times the standing of today. During the first quarter of the nineteenth century the lowest price was \$1.37 this was in 1822. In the second quarter, the lowest figure was reached in 1835 when wheat stood at \$1.35. In the third quarter, prices ranged from \$1.17 in 1851 to \$2.27 in 1855, fluctuating after that from \$1.22 in 1864 to \$1.95 in 1877, the price was \$1.73. In 1878 the quotation was \$1.40. A period of steadiness followed until 1883, when there was a drop to \$1.25. The decline continued, the even dollar being reached in the following year. Then, for the first time in the period covered in the table, or in 1886, below that figure was reached 94 cents being the quotation. In 1891 the price was \$1.13. In 1898 it was \$1.03, the lowest point, namely 98 cents being touched in 1894. Fourteen years elapsed before a dollar was again exceeded. In 1909 the highest quotation stood at \$1.13. Mr. Doherty briefly outlines the cause for these fluctuations, and proceeds to deal with the situation arising from the supply and demand in the last three years. He also deals with the output of other crops during these years, referring to the best known authorities in support of his details and deductions. He goes largely into the requirements and productions of the world in wheat, giving tables showing the yield in 32 centuries of wheat and 22 of oats. In his conclusion he also suggests that every aspect of the wheat situation appears to indicate the improbability of a return to the low average prices of 1910, 11 and 12, and that following the declaration of peace there will be a greatly increased demand. His final words are "Economic inter-

SOME GOOD ADVICE

If you have dandruff, get rid of it by killing the germs.

If your hair is falling out, stop it.

There is one sure cure that will remedy these misfortunes and aid you to remain young.

**PARISIAN SAGE, the great hair restorer, is guaranteed to permanently remove dandruff in two weeks, or we will give you your money back.**

**PARISIAN SAGE stops falling hair and prevents the hair from fading.**

**It is the best beautifier for ladies' hair, as it makes harsh, lifeless hair fluffy, soft and beautiful.**

**PARISIAN SAGE is rigidly guaranteed. 50 cents a large bottle.**

**W. TURNER & CO., Markdale.**

The Standard will forward your subscription for Toronto Daily Papers.

Waiting for you to read. Don't trouble how, why or when, go to it, right now, at the Markdale Bakery. Note the name, P. & E.

**Constipation--**

the bane of old age is not to be cured by harsh purgatives; they rather aggravate the trouble. For a gentle, but sure laxative, use Chamberlain's Stomach and Liver Tablets. They stir up the liver, tone the nerves, lead from the stomach and bowels just like an internal bath.

**CHAMBERLAIN'S TABLETS**

Woman's best friend!

From pinhead to old age, these little red tablets restore an unfeeling, sluggish liver to a clean, healthy, normal condition. Take a Chamberlain's Stomach and Liver Tablet at night and the bowels lead from the stomach and bowels just like an internal bath.

All drug stores, 25c or by mail from Chamberlain Medicine Company, Toronto.
