With ideal weather over all the Province the farmers are harvesting the second largest wheat and oats crop in the history of the western section of the Canadian prairie. Some fields will run 50 bushels of wheat to the acre. Many will run between 40 and 50, while the average, says the best informed grain men, will be above 35 bushels to the acre for all the province. We laud those who "do their bit," then why not encourage the youth of twenty who is helping to feed the nation? Having offered this suggestion may I ask why he was designated "The Happy Fool" was it because he was awake at 5.30 in the morning while his town cousins slept? - A Farmer.
