ABSORPTION OF HOLLAND.

The German Wolf and the Dutch Red Riding Hood. How comes it that the best car-

cons drawn against the Germans are the work of a "neutral"-Louis Raemaekers, the Netherlander? Per haps geography enters into the answer of this question. Holland borders both on Germany and Belgium. Hollanders and Belgians have some times disliked one another, yet they are, after all, alike in a good many respects, and Holland has ministered to many suffering Belgians, and there s no way of transmitting distrust nto sympathy like doing one's oneime enemy a considerable service. Obviously, what Germany did to Belgium she might still do to Holland ven though the likelihood of that catastrophe diminishes as. German "The deliveries of munitions from possibility of a clash between Holstrength is gradually diffused. INFANTILE PARALYSIS.

By Chas. M. Bice, Denver, Colo. The present epidemic of Infantile Paralysis in New York, Montreal, and other Eastern Cities, and its liability to spread, for it is very cantagious, brings us face to face with one of the most mysterious plagues of child-

hood the world has ever seen. Science seems powerless before it, and so far, has found no certain remedy. Closely allied with this terrible plague, is the ever-present pest of the common fly, chiefly concerned

in spreading the contagion. Dr. Simon Flexner, of the Rockefeller Institute, in his advice about protecting children from this dreadful disease, called medically polioneyelities, directly charges the fly with carrying the virus of the disease on its hairy legs and feet. He also says that the disease is conveyed by the bite of the common stable fly.

In fantile paralysis is caused by a virus which will pass through the fin-safety. est filter without leaving a germ behind such is its miuteness. No bacillus can be detected in this. The virus blows about in the dust, and is after scattered about by coughing and sheezing, besides being carried by flies. Hence the necessity of protect- gin. ing foods of all kinds from exposure, and keeping every thing perfectly clean with which children come in con-

Dr. Flexner first demonstrated the existence of this virus by inflecting monkeys with partious of the spinal cord of children who had died from the disease, and he is preparing an

No one can tell just when the par DURING HOT WEATHER lysis is going to strike sometimes the it was the strict at the s

and the intercosta Co., of this disease varies from 10 to 20 per cent.

So little is known of the dispare that even when paralysis has set, it is impossible to tell whether will progress to the point of causing death, or merely of making a cripple, or will pass off leaving the this

uninjured. The Drs. admit they have dis ered no specific form of therapy which paralysis can be prevented the inflammatory process may hastened. Hence, about the way is to prevent the spread of the disease to other persons, and by give ing such remedies as are known to procure relief, and that often restore muscular power in other afflictions,

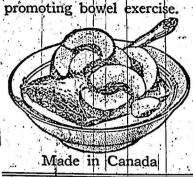

preventing deformities. The genral treatment is that of other infections, such as scalllet fever and the like.

Wrapping the affected limb in cotton wool blankets, and hot water bags a great comfort. If deform make their appearance, then a me ical treatment, or massage is helpful and muscle training is essentia Children should be quarantined fo Healthy children are more liable

the disease than feeble children. When a man'is down his enemies stop kicking him and his friends be-

Home Privileges.

In one of the hotels where non-resdents are admitted to the table I hote luncheon and diriner a man and a woman sat at a litble table in a corner. He had a meek look and such sad eyes, while she had a vitu-perous tongue, which she was using bly. When their guarreling had disturb-

ed every other diner in the room the "Pardon me, madam," he said to he lady, who was obviously the senior partner in the combine. "I must beg of you to be more restrained. If you

hat to continue your-er-discussion lease do it outside." "Rubbish!" snapped the lady tartly, You advertise this as a family hotel on't you?"

SAVE THE WESTERN CROP.

No Lack of Men to Gather in Canada's Greatest Asset. Statistics from the Government authorities show that the wheat crop this year promises to be greaten than ever but the problem that is troubling the minds of the farmers in Western Canada is how can the crop ne harvested? That is the predominent problem of to-day in Canada apart from recruiting for overseas The railways are providing special excursions to carry the men to their destinations but the effort will almost be fruitless if the labor does not come forward for the work-in view. There is and disguising the seriousness of the situation this year so coat, which is so useful in many men having gone to the front or are on their way. Despite this fact, however, there should be no lack of men to gather in Canada's greatest asset if the country is to still continue the good work of the past two years in helping the Mother County in the greatest war the world has ever known. While Canada

has sent some hundred thousand men to the war there are still hundreds of thousands more left who have not en-listed and who are not assisting . in the making of munitions. These have, now an excellent opportunity of doing a little bit at home to help the war abroad Canada's crop is of vital necessity to Great Britain and hei Allies so that everyone who helps gathering in the harvest will in assisting in carrying on the war to a successful issue. The effort will not only be a health

giver but give excellent remuneration.
You who are not helping your country directly are invited to take the not phly earn three dollars a day and board but also feel that you are helping the powers to end the war successfully for our side. Any railway agent will furnish you with all the information to enable you to go Western Conaga and do your "bit" by helping the farmers to harthe great crop on which so much depends.

Minera's Liniment Cures, Burns. LORD KITCHENER'S RELIGION.

His Conduct at Cairo Proved a Tonie to That City. Rev. J. H. Molesworth, late incum-

bent of All Saints', Cairo, writes as follows on Lord Kitchener's religion: pany without realizing that he was a many who viewed life sériously. may illustrate this from the effect be produced on society in Cairo, when ne went there to take up his nosition as British Agent and Consul General. Cosmopolitan places like the capital of Hgypt, which are largely the hatats of, pleasure, are often over to a frivolity which is not seen in chies of commerce and business. There is frequency a relaxing morphs beyond what is wither elsewadre, and it goes without "I should say it was. There were ing that in such places Sunday and seven different kinds of forks at each Sunday worship are at a discount. "It would be foolish to assert that Cairo was free from these vices. But the coming of Lord Kitcheney in-Railway Mileage Increasing. stantaneously wrought a change. He was known to be a man of unswerver ing devotion to duty, of disciplined ministered to the place. So far was regular and punctual in church attendance, and this att told beneficially upon the Sunday

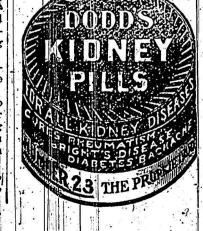

habits of the community. "He was president of All Saints' Church committee, and J never member his omitting to take: chain, even when hard Ipressed by

State business. "Ear Kitchener was indeed a of that simple manly, straightforward (thristianity which we associate with the dest English laity, which does not trouble itself indeed about subtle questions and controversies, but resis of the broad facts of re-velation, and in simplicity practises its tenets."

SHARED UP TALKING SHOES Unlike Us, the South Sea Island Like a Squeaky Shoe.

Like the native Africans, the South "Why do they say that the first Sea Islanders are very proud if they year of married life is almost the most can del hold of a pair of European hold of a pair of European They are especially gratified has if they Africans call them, "shoes that

talk." A story is cold of a South Sea Islanders who came into church with shoes merrily a-squeak. He walked proudly to the front of the room, and, jemoving his shoes, dropped them cut of the window, so that his wife might also have the pleasure of coming in with "talking" shoes.
