FLESHERTON (Special to The Standard.) The Annual Convention of the East Grey Teachers' Association was held in Flesherton high school on Thursday and Friday last and was largely attended, there being 86 members present. The morning session on Thursday opened with devotional excercises conducted by Rev. Mr. McDonald, after which Messrs, Andrews and Wallace and Misses Black and Wilson were appointed a nominating committee. The chief event of the morning was an address by Mr. H. C. Duff, B.S.A., who said that the teacher should try to help the child not only from the educational and moral standpoint, but also from the material. One method by which much is being accomplished is in the introduction of fairs. In connection with these, the children are given seed by the Department of Agriculture. Each received official word last week pupil sows his seed and cultivates that her son Herb at the front had the plot of ground during the been wounded. summer. In the autumn an official is sent by the Department to is also reported wounded. judge the different plots. At the Rev. G. W. lose, of Corbetton, fair in the fall, prizes are awarded who is always appreciated liere for the best produce grown on the supplied the Presbyterian pulpiplies and also for the best poultry on Sunday in exchange with Mr reared from eggs sent out by the McVicar, who conducted Department, Rewards are also offered for specimens of wood earving, sewing, cooking, etc. Another feature of the fair is an oratory contest and the training for this is very helpful. At the afternoon session. Miss M. G. Oakley, M. A., of Peterboro Normal, gave an excellent address on English Composition. Miss Oakley pointed out that although English Composition is frequently looked upon as a minor subject vet is very important. Its study enables the pupil to express his thoughts clearly in writing; and also to use simple accurate language. Great care, however. must be taken in adopting the capacity of the pupil. In assigning topics for essays, themes should be given which require some research on the pupil's part.
