

FROM SUNSET COAST

WHAT THE WESTERN PEOPLE ARE DOING.

Progress of the Great West Told in a Few Pointed Paragraphs.

British Columbia is sending six hundred overseas, attached to the Medical Corps.

The great bore in the Selkirk is being opened for passenger traffic in the new Compton tunnel.

Situation is improving between miners and their employers in the strike at South Wellington, B.C.

Gold prices are being received for brighter at Vancouver, as the catch is getting smaller all the time.

The first annual stock and pol-

ic meeting was composed of 1,000 single en-

Hon. Ralph Smith, new Minister of the Interior, gave a stirring address at their dinner at Vancouver.

At South Vancouver, the ladies of the Officers and Sailors Red Cross Rainbow Bazaar.

Vancouver District Prohibition Workers are permanently organizing to see that the prohibition laws are strictly carried out.

Lieut. J. C. Williams, of the Royal Flying Corp., who brought down a German Hun aeroplane, is home on furlough in Vancouver.

The Council of North Vancouver, under the Municipal Act, which forces the owner of property to pay interest on tax arrears.

Vancouver City will take steps to protect the Kitsilano bathing beach against encroachments of the Vancouver Harbour Commission.

Hospitalized men make appeal to the Provincial Executive, B.C., to ask that disabled companies be allowed a continue to receive workmen's compensation.

Mr. Russell, of Vancouver, says that if miners were to pay a percentage of their wages at the varied railway rates, it would mean about \$25,000 for the city.

At New Westminster, B.C., the collection of the salmon of sooty sculpins on the Fraser River is said to be effective in preventing fish being sold by Indians along the Mission roads.

Miss Poetry, representing the Local Lodge of Women at Vancouver, and Mrs. E. A. Munro, wore the badge of delinquency that day service work

is to be done.

ENTERTAINMENT BOOK.

On the Death of Edward.

The Queen's new dress, now being worn in the Royal Palace, is to be sent to Berlin.

Admiral Sir W. R. B. was awarded to Adm. Constantine.

Other funds from the Bank of Canada have been used to help the poor in Lincolshire, are making contracts with merchants for growing mustard next season \$132 bushel.

STYLING THE CHILDREN.

France Sends Many Back to the Front After Being Cured.

One of the poor in Berlin lack Nourishment.

A correspondent writing in the London Times says:

A short time ago it was announced that a study of the scheme for dealing with the disabled soldier evolved by the French Government was being made by German officials.

This study will soon, it is hoped, bear fruit in a considered policy; meanwhile, a short description of the methods employed by our allies and of the means devised by them to meet the difficulties of the situation may be of value.

A few days ago a meeting of the Royal Society of Medicine discussed this subject in consultation with Dr. Pierre Quisiner, of the Grand-Palais, Paris, who has played a leading part in perfecting the French scheme.

In his conversation Dr. Quisiner described the work on which he is engaged, and gave a general idea of its scope and purpose.

The disabled French soldier, he said, is regarded by the Government as an important national asset.

As soon as his wounds have been attended to his future be-

come a matter of serious consideration.

Will he be able to return to the ranks, or will it be necessary to discharge him as permanently unfit?

In the latter case, in what manner can he be fitted to earn his living and take a place in the working ranks of the community?

The answer to this question is to be found in the arrangements which have been made at the Grand-Palais.

No longer does the visitor to this building encounter paintings and sculptures; in the well-known rooms there is now gathered together all the apparatus of the mechano-therapy, electro-therapy, and balneology.

Strait from the hospital ward where his injuries have been healed and his deformities corrected the soldier comes to this great refitting department and without a day's delay his "after-treatment" is begun.

He is still a soldier, for a measure of discipline has been found essential if the often laborious treatment is to be carried out successfully.

A number of officers are in control, in addition to the doctors, and their work is of the utmost importance.
