hor, Tribune Channel, about 80 miles these jaunty suits in bright green of LaGrippe, and I have frequently north of Vancouver, witnessed an act jersey cloth. of remarkable daring and agility, performed by one of their number, which from your local McCall dealer or will doubtless be talked about for from the McCall Company 70 Bond many a day in the Coast lumber St., Toronto, Ontario. "Dept. W" camps, where feats of daredevil bravery are as common as "scraps"

mong school boys. In the course of a shift to a new logging location it became necessary to attach a cable to a very tall tree at a point 120 feet from the ground. Usually this is done by a workman equipped with pole-climbing spurs and belt, but this time these means were not available. What was to be done? It would take several days to secure the equipment from Vancouver, and a shutdown of the operations for that length of time was not to be thought of owing to the heavy expense involved.

This is where tall Andrew Busby came to the 'rescue, if, reports are true. He was an expert chopper and skilled in using a springboard. With his axe and two springboards he began to climb the tree. Standing on the first board, he chopped a notch five feet above him, slipped the second board into the notch, climbed up, and, drawing the first board after him, repeated the performance a score of times. In an hour, while his companions below watched him breathlessly, he reached the top of the tree and affixed the rope. Standing on a board a few inches wide, he was apparently as cool at 100 feet from the ground as when he was only five feet from

COLD IN UPPER AIR.

Comperature Remains Practically Con stant All the Year.

The night the two Zeppelins came to grief was the coldest since last Winter, says the London Chronicle who expressed surprise that the babykillers should venture on a trip under such Arctic conditions know little about the upper air. The fact that the temperature decreases fairly uniformmeans of automatic registering appameans of automatic registering apparatus sent up in "balloons sondes," but ing your hand! He sees me going up
it has also been ascertained that the ladder with my hod full of mortar, means of automatic registering appathough the temperature at about 10, and he thinks I'm working. 000 feet is very low-in the neighborhood of 40 degrees of frost-it remains practically constant all the year round. However cold or warm it may be at the surface of the earth, the same degree of coldness is always encountered a few thousand feet above, and it was probably no colder in the "Zeppelin zone" that night than it is on the hottest day of Midsummer.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable-one bright, the next; cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets, They will regulate the stomach and bowels and drive 'out colds and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

GREAT INFLUX AFTER WAR. Many Canadians Will Remain in Eng-

land, Says Queensberry. A close student of British finance, who is ion a visit to Canada at present to make extensive investigations into Canadian conditions for afterthe-war investments, and the bringing out of settlers, is the Marquis of Queensberry, who is accompanied by Mr. H. Stanley Waugh.

"There is an enormous interes being taken in Canada, and thousands will leave the Old Land for this country as soon as the war is over," the Marquis declared. "I know thousands of Belgians who intend making Canada their future home. They are tired of the war, and don't want to return to their former country. I have heard even Englishmen say, 'Oh, if I could only get away to he wilds and forget it all.'

"We in England felt that black cloud of Germany all along. It interfered everywhere. I had arranged for the working of mines in Liberia, South Africa, and Germany interfered. I had a bill put through the Turkish Parliament several years ago, and Germany 'interfered. The
