blends. Every leaf is fresh, fragrant full of its natural deliciousness. Sold in sealed packets only.

CHAPTER IV.—(Cont'd.)

They spent all the night in the They spent all the night in the That was fair terrible. You see, the ment that is contained in the various One and one-fourth teaspoonfuls of troop-train, which was crowded almost Germans could not drive us back nor grains that are used for cereals. The baking soda, one tablespoonful of was to suffocation. Where they were go-ing they didn't now, scarcely cared. Germans could not drive us back nor grains that are used for cereals. The baking soda, one tablespoonful of wa break our lines. That was why they methods used by manufacturers in pre-ter, one cupful of cooked outnead, one hours, then the train crawled on again.

Presently the morning broke and from saw a flat and what seemed to him, after Surrey, an uninteresting piece of country. Everything was strange to him, even the trees looked different from the trees looked different from the trees looked different from the trees for the people where seven the trees looked different from the trees for the people were burning, and all the time shells were falling contain a large amount of the outer coat of the grain, or they may be fine-to him, even the trees looked different from the trees looke

breakfast they were formed in marching order. Tom took but little notice of the country through which they marched, except that they were on a straight road, which was paved in the middle. As the day advanced the lower part of the country through which was paved in the middle. As the day advanced the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of the country through which was paved in the lower part of th middle. As the day advanced the sun grew hot and scorching, but the men marched on uncomplainingly; there was little merriment, but much thought. Presently noon came, and with you if you like and show you sary to soften this cellulose, so that This is the great square; one the digestive juices may act upon the this time Tom realised that he was in-deed in the zone of war. He saw what looked to him miles of motor wagons filled with food and muniknocked into smithercens. See tions, numbers of ambulance waggons marked with the Red Cross. More trees around, how they are twisted and burnt? That house there I saw shellthan one body of horse soldiers passed him, and again he saw numbers of the shelling by that time, but I tell you it gave me a turn. It was the biggest house in the Square, and a where there were soldiers, soldiers. Tom could not understand it, it was all so different from what he expect- great bomb caught it fair in the face; ed, neither could he see any order or purpose in that which was taking place around him. There was acticity and movement everywhere, but he could co-ordinate nothing, he was

Towards evening there was anoth er resting-time, and each man gladly German swine. threw himself full length on the grass. For a moment there was a silence. him a sickening sensation; he felt a sinking, too, at the pit of his stomach:

CHAPTER V.

—indeed, one of the most tremendous battles in the history of the world. A sergeant who was in a garrulous mood described it to Tom with a great deal

of spirit. "Yes," he said, "you have come to an unhealthy spot; still itmay be good The Devil sat by the lake of fire on for you. The blessed Huns thought they were going to break through here about last September when the battle of Wipers was fought. They had six hundred thousand men to our hundred and fifty thousand. Then that blooming Kaiser made up his mind that he would break through our lines with the color of the color o lines, and get to Calais. Yes, it was a touch and go with us. Fancy four a touch and go with us. Fancy four to one, and they had all the advantage in big guns and ammunition. You think those big guns? Wait till you have heard Jack Johnson and Black Maria. Talk about hell! Hell was Maria. Talk about hell! Hell was never as bad as the battle of Wipers. I thought we were licked once.' I was the part where our line was the thinnest, and we saw em coming to. Knows more about damnation than all wards us in crowds; there seemed to the imps of Hell. be millions of 'em; we had to rake Give my job to Kaiser Bill, or to Fer-out every cook and bottle-washer on dinand the Tsar; the show. Lots of our men were or the show. Lots of our men were or to Sultan Abdul Hamid, or some smelt powder, or felt the touch of steel. But, by gosh, we let em know! I hate to leave the old home, the spot Four to one, my boy, and we licked I love so well.

'em, in spite of their lig gun; and But I feel that I'm not up to date in reason. their boasting. Aren't you proud of being a British Tommy?" Tom listened with wide, staring

eyes and compressed lips. There And muttered, "I'm outclassed by the he could picture all of which sergeant spoke. As he looked he could discern too, here and there, dotted along this brown line, clouds of black, smoke. All around him our guns were booming, while the distant the United States is shown in Science in United States.
